How High Is The Moon:

Observing the Moon Peter Wlasuk, 2000 *Observing the Moon* is a definitive work written as a reference book for anyone seriously interested in the Moon and its geology. It is of course a perfect companion for practical observers. Detailed and extensively illustrated chapters catalog all the interesting lunar features visible in modest telescopes. They are preceded by a crash course in modern lunar geology based on the vast amount we have learned during and since the Apollo missions and are followed by chapters on photographic and CCD imaging drawing and lunar topography. A CD ROM accompanies this book and contains an atlas of lunar images and much more. The CD ROM requires a PC running Windows 3.1 or higher, a minimum of 16MB Windows 3.1, 64MB Windows 95 up of memory and a 2x or faster CD ROM player. **Ultimate Play-Along** Jimmy Haslip, Barry Coates, 2003 Each work presented in an arrangement for bass guitar in tablature and staff notation followed by the original fakebook version includes chord symbols. Gentle Measures in the management and training of the young ... Numerous illustrations Jacob Abbott, 1872 *The Big Splat, or How Our Moon Came to Be* Dana Mackenzie, 2008-05-02 The first popular book to explain the dramatic theory behind the Moon's genesis. This lively science history relates one of the great recent breakthroughs in planetary astronomy: a successful theory of the birth of the Moon. Science journalist Dana Mackenzie traces the evolution of this theory, one little known outside the scientific community: a Mars sized object collided with Earth some four billion years ago and the remains of this colossal explosion, the Big Splat, came together to form the Moon. Beginning with notions of the Moon in ancient cosmologies, Mackenzie relates the fascinating history of lunar speculation moving from Galileo and Kepler to George Darwin son of Charles and the Apollo astronauts whose trips to the lunar surface helped solve one of the most enigmatic mysteries of the night sky: who hung the Moon. Dana Mackenzie Santa Cruz, CA is a freelance science journalist. His articles have appeared in such magazines as *Science*, *Discover*, *American Scientist*, *The Sciences* and *New Scientist*. **Billboard**, 1951-04-28 In its 114th year *Billboard* remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform. *Billboard* publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends. **Bulletin of the Nuttall Ornithological Club**, 1880 Billboard, 1951-06-30 In its 114th year *Billboard* remains the world's premier weekly music publication and a diverse digital events brand content and data licensing platform. *Billboard* publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends.
