## **How Nature Taught Man To Know Imagine And Reason:**

*How Nature Taught Man to Know, Imagine, and Reason* Eduard Hugo Strauch, 1995 This exposition retraces the four distinct lessons early man derived from his intimate contact with nature as individual and as species Nature taught man four archetypal lessons centered on omnipresent phenomena camouflage metamorphosis the limits of life and symbiosis Abundant evidence for these modes of perception imagination and thinking is found in ancient and modern writing This text describes each lesson nature taught man and explains how each is distinctly present in language writing strategies literature poetics and literary theories Together these modes compose the epistemology man has used over the millennia

**The Supraconscience of Humanity** Edward H. Strauch, 2010-05-25 Humankind evolved through three psychological stages subconsciousness conscience and supraconscience Ritual and myth cosmology and theism marked phases of psychic integration initiating our supraconscience evolution Four archetypes temperance the great chain of being Biblical interpretation and Divinity became the Cosmic consciousness of secular man Study of Scripture developed a communal supraconscience Mystics dedication showed us the deeper meaning of a life purpose Yet heretics taught man faith in the superior power of the free mind Heresy helped evolve humanity's secular supraconscience Indeed the exponential growth of psyche's powers and the continuous revelation of new secular knowledge seems the fulfillment of Revelation Finally the enlightened understood that when God created the earth he included evolution so that our kind would evolve a superior nature Hence religious and scientific secular and humanistic developments reveal themselves to be the primary powers accelerating human evolution Together they have nurtured humankind's ever evolving supraconscience

**The Creative Conscience as Human Destiny** Eduard Hugo Strauch, 2004 The Creative Conscience as Human Destiny explains how human nature derived from our biogenetic evolution Whereas human ingenuity and self realization replicate nature's creativity its morphogenesis human conscience epitomizes the integration of organic life its symbiosis These mutual processes became incarnate as humanity's creative conscience Similarly the co evolution of man and woman has enabled us to create cultures and civilization From our intimation of a Supreme Being in nature human beings have also evolved a supraconscience By acknowledging the wisdom of nature we have a philosophy of life for the future

*Sense and Goodness Without God* Richard Carrier, 2005-02-23 If God does not exist then what does Is there good and evil and should we care How do we know what's true anyway And can we make any sense of this universe or our own lives Sense and Goodness answers all these questions in lavish detail without complex jargon A complete worldview is presented and defended covering every subject from knowledge to art from metaphysics to morality from theology to politics Topics include free will the nature of the universe the meaning of life and much more arguing from scientific evidence that there is only a physical natural world without gods or spirits but that we can still live a life of love meaning and joy
