tests are designed to reflect the effectiveness with which a parent responds to typical childcare situations and the degree to which a parent truly knows and can satisfy the needs of a particular child The volume also sets forth concepts derived from extensive research that are particularly helpful in understanding parent child interactions and provides a specific system of nonadversary communication strategies that can be used and modeled in all interchanges with evaluation participants and in the wording of all written reports Readers will also welcome the numerous suggestions from evaluators all over the country on specific custody dilemmas they have faced The book is based on many years meticulous research and is informed by a number of conceptual approaches that include The proven premise that whatever certain parents intend to communicate is often not what their children are in fact perceiving and reacting to The Utilization Model of Milton E Erikson The Thomas Chess and Birch goodness of fit model of parent child interaction Bandler and Grinders assertion that the meaning of a communication is the response it elicits regardless of the intentions of the sender Clearly spelling out the targets of a truly comprehensive and reliable evaluation The Custody Evaluation Handbook will be an invaluable handbook for custody evaluators and marriage and family therapists as well as other involved mental health professionals **No Ordinary**
