How Clean Is Clean How Safe Is Safe Pb 1993:

Contaminated Soil'93 F. Arendt, G.J. Annokkée, R. Bosman, W.J. van den Brink, 2012-12-06 F Arendt XxX Conference chairman w Harder TNO Conference co chairman The 1993 Berlin conference on contaminated sites is the fourth in a series of meetings initiated by the Netherlands Organization of Applied Scientific Research TNO in 1985 and later continued with the Karlsruhe Nuclear Research center KfK of Germany The present economic stagnation or recession in many countries is leading to various proposals to reduce the level of costly environmental activities restricted funds are used for really urgent cases rather than precautionary measures The level of soil contamination caused by the former centrally planned economies adds to this tendency The Conference tries to broach this controversy by discussing once more the targets and strategies of soil remediation with follow up use of the site as an important parameter Both new regulations and modifications of existing lists for a tolerable level of contamination are reviewed alike Immobilization and enclosure of pollutants are often less expensive than complete remediation and consequently may grow in significance We consider the conference of great significance for demonstrating the experiences gained with management and remediation of contaminated sites internationally among others to avoid mistakes and excessive costs Two new types of soil contamination became apparent after the end of the cold war Many military sites airfields and training grounds are being abandoned After decades of use large sections and hot spots of these sites are polluted to a high average level

Vignettes in Patient Safety Michael S. Firstenberg, Stanislaw P. Stawicki, 2017-09-13 It is clearly recognized that medical errors represent a significant source of preventable healthcare related morbidity and mortality Furthermore evidence shows that such complications are often the result of a series of smaller errors missed opportunities poor communication breakdowns in established guidelines or protocols or system based deficiencies While such events often start with the misadventures of an individual it is how such events are managed that can determine outcomes and hopefully prevent future adverse events The goal of Vignettes in Patient Safety is to illustrate and discuss in a clinically relevant format examples in which evidence based approaches to patient care using established methodologies to develop highly functional multidisciplinary teams can help foster an institutional culture of patient safety and high quality care delivery *Developing Home Port Facilities for Three NIMITZ-class Aircraft Carriers in Support of the U.S. Pacific Fleet, (CA, WA, HI) ,1998*
