culture war histrionics about evolution education and creationism Adam Laats argues that Americans do not have deep fundamental disagreements about evolution not about the actual science behind it and not in ways that truly matter to public policy Laats asserts that Americans do however have significant disagreements about creationism By describing the history of creationism and its many variations Laats demonstrates that the real conflict about evolution is not between creationists and evolution The true landscape of American creationism is far more complicated than headlines suggest Creationism USA digs beyond those headlines to prove two fundamental facts about American creationism First almost all Americans can be classified as creationists of one type or another Second nearly all Americans including self identified creationists want their children to learn mainstream evolutionary science Taken together these truths about American creationism point to a large and productive middle ground a widely shared public vision of the proper relationship between schools science and religion Creationism USA both explains the current state of America s battles over creationism and offers a nuanced yet straight forward prescription to solve them

How to Make Your Dreams Come True Mark Forster,2014-11-27 Most people think of life as either something that happens to them or as something which they have to bend to their will Life in short is seen as a series of problems requiring solutions As a result people spend much of their lives either in escape activities or driving themselves to achieve often both at the same time But life becomes qualitatively different when we see it as a theatre in which we decide what is going to happen and then let it happen in the way that an artist will allow his or her creation to appear This book is an example of the message that it teaches Forster records methodically how he himself stopped struggling to work against his own feelings and to let his life happen Exciting and inspiring his own story with accompanying exercises for the reader prove the life changing fact that when we give priority to the workings of our unconscious minds we can trust them not to let us down
