**Should You Choose to Live Forever?** Stephen Cave, John

Martin Fischer,2023-11-22 In this book Stephen Cave and John Martin Fischer debate whether or not we should choose to live forever This ancient question is as topical as ever while billions of people believe they will live forever in an otherworldly realm billions of dollars are currently being poured into anti ageing research in the hope that we will be able to radically extend our lives on earth But are we wise to wish for immortality What would it mean for each of us as individuals for society and for the planet In this lively and accessible debate the authors introduce the main arguments for and against living forever along with some new ones They draw on examples from myth and literature as well as new thought experiments in order to bring the arguments to life Cave contends that the aspiring immortalist is stuck on the horns of a series of dilemmas such as boredom and meaninglessness or overpopulation and social injustice Fischer argues that there is a vision of radically longer lives that is both recognizably human and desirable This book offers both students and experienced philosophers a provocative new guide to a topic of perennial importance Key Features Gives a comprehensive overview of the main arguments for and against living forever Uses lively examples from myth literature and novel thought experiments Highly accessible avoiding jargon and assuming no prior knowledge without sacrificing intellectual rigour Includes helpful pedagogical features including chapter summaries an annotated reading list a glossary and clear examples [Dark Angels](#)

Susy Smith,1999-12 This is a well documented highly entertaining book giving case histories that prove there is evidence that life is forever The Susy Smith Project at the University of Arizona is at present acknowledged as the source of the Afterlife Codes research but Susy Smith herself had

established a reputation as a writer of critical and objective books in the psychic field many years before she established the Survival Research Foundation and evolved the idea of scientific study of the possibility of communication from the dead by codes When writing *Life is Forever* published originally in 1974 Miss Smith made a comprehensive search of all the literature of the psychic field and chose the best example of each type of experience deathbed vision ghosts with a goal guardian angels possession voice phenomena and all the other curious and interesting means by which dead or dying people managed to provide evidence of their continued existence This important book has been out of print too long It will be welcomed back Visit the Afterlife Codes website of the Susy Smith Project at [www afterlifecodes com](http://www.afterlifecodes.com)      **Writing Beijing** Yiran

Zheng,2016-04-29 One of the oldest cities in the world Beijing was an imperial capital for centuries After the founding of the People's Republic of China in 1949 Beijing became not only the political center of the new communist country but also the signifier of socialist ideology and revolutionary culture Now in the 21st century Beijing embodies global conflicts and global connections Over the course of the last century then Beijing moved from the quintessential traditional capital to the symbol of communist urban form and finally to a cosmopolitan metropolis These three stages in the history of Beijing and its shifting representations are the topic of this study Like other capitals Beijing is much more than its physical entity It also functions as a concept a representation As city planners have and continue to present Beijing to the world as a model the fluctuating images of Beijing have become solidified in urban space Today the urban form of Beijing juxtaposes diverse spaces that span centuries embodying the various representations of the city by its planners in different eras These representations of space also provide possibilities for writers to rethink and rebuild the city in their literary works Chinese writers and filmmakers often essentialize those urban spaces by making them symbols of different urban cultures the old houses representing traditional patriarchal Chinese culture while soviet style buildings reflect revolutionary culture Finally the more recent sprouting of apartments condos and townhouses stands for the invasion of western modernity and provides evidence of global capitalism in contemporary China Inspired by Henri Lefebvre this study establishes a framework that connects urban spaces representations of space to writers and literary productions representational space I analyze the three major urban spatial forms of traditional communist and globalized Beijing and examine what these urban spaces mean to Chinese writers and filmmakers as well as how they use them to configure particular images of Beijing I argue that these different configurations are actually the projections of those writers and filmmakers own cultural imaginations they provoke a form of emotional catharsis and also produce alternative visions of the cityscape      **The Game of Life** Vanessa Lamar
