Futaba Childrens:

Passages to Modernity Kathleen S. Uno,1999-04-01 Contemporary Japanese women are often presented as devoted full time wives and mothers At the extreme they are stereotyped as education mothers kyoiku mama completely dedicated to the academic success of their children Children of working mothers are pitied day care users both children and mothers are faintly disparaged for their inadequate home lives hired babysitters are virtually unknown Yet historical evidence reveals a strikingly different picture of Japanese motherhood and childcare at the beginning of the twentieth century In contrast to today child tending by non maternal caregivers was widely accepted at all levels of Japanese society Day care centers flourished and there was virtually no expectation of exclusive maternal care of children even infants The patterns of the formation of modern Japanese attitudes toward motherhood childhood child rearing and home life become visible as this study traces the early twentieth century rise of Japanese day care centers institutions established by middle class philanthropists and reformers to provide for the physical well being and mental and moral development of urban lower class preschool children Day care gained broad support in turn of the century Japan for several reasons For one day care did not clash with widely accepted norms of child care A second factor was the perception of public and private policymakers that day care held the promise of social and national progress through economic and moral betterment of the urban lower classes Finally day care offered working mothers the opportunity to earn a better livelihood with fewer worries about their children In spite of emerging notions that total devotion to child rearing was a woman s highest calling Japanese nationalism a signal force in the genesis of the modern Japanese state economy and middle class culture fed a deep wellspring of support for day care and fostered significant reshaping of motherhood childhood home life and view of the urban lower classes Passages to Modernity is an important and original contribution to our understanding of the institutional and ideological reach of the early twentieth century state and the contested emergence of a striking new discourse about woman as domestic caregiver and homemaker **The Japan Magazine** ,1910 Japan Magazine ,1921 Annual Statistics of the City of Tokio Tokyo (Japan),1916 your name. Another Side:Earthbound (light novel) Makoto Shinkai,Arata Kanoh,2017-11-21 During the events of your name Mitsuha and Taki s miraculous encounter forever changed their lives and the fates of everyone in the tiny mountain village of Itomori But their earth shattering ordeal represents just one chapter in Itomori s history and Mitsuha s experience form only a single thread in the fabric of her community Every story has as many sides as there are characters to tell it and every life affects countless others In Another Side Earthbound the stories of Mitsuha s family her friends and the boy from Tokyo come together to weave a greater picture of the circumstances surrounding the comet and the forces that bind the people of Itomori together Earthquake Children Janet Borland,2022-03-07 Japan as recent history has powerfully illustrated is one of the world s most earthquake prone countries Today it is also one of the best prepared to face such seismic risk This was not always the case Earthquake Children is the first book to examine the origins of modern Japan s

infrastructure of resilience Drawing from a rich collection of previously unexplored sources Janet Borland vividly illustrates that Japan's contemporary culture of disaster preparedness and its people's ability to respond calmly in a time of emergency are the result of learned and practiced behaviors She traces their roots to the 1923 Great Kant Earthquake which killed over 100 000 people when it struck the Tokyo region Beyond providing new perspectives on Japan's seismic past the history of childhood and everyday life in interwar Japan Borland challenges the popular idea that Japanese people owe their resilience to some innate sense of calm under pressure Tokyo's traumatic experiences in 1923 convinced government officials seismologists teachers physicians and architects that Japan must better prepare for future disasters Earthquake Children documents how children schools and education became the primary tools through which experts sought to build a disaster prepared society and nation that would withstand nature's furies

Huffman,2018-04-30 A sweeping work of original scholarship Down and Out in Late Meiji Japan examines the daily lives of Japan's hinmin poor people particularly urban slum dwellers in the late 1800s and early 1900s James Huffman draws on newspaper articles official surveys and reminiscences to recreate for readers life as experienced by the poor themselves something not attempted before in scholarship on this era He begins by explaining the causes behind the fast increasing numbers of poor neighborhoods in major cities after the late 1880s and goes on to describe in fascinating detail what those neighborhoods looked like and what their inhabitants did for a living collecting night soil weaving textiles making match boxes and other piecework pulling rickshaws building the structures that made Japan modern and supplying much of the era's entertainment including sex He also explores what hinmin did outside of work what they ate where they did their wash how they stretched their meager budgets by using pawn brokers and how they dealt with illness and other disasters and grappled with the painful necessity of sending children to work rather than to school Huffman argues that despite the tremendous challenge of day to day living hinmin confronted life as energetic agents embracing it as avidly as members of the more affluent classes Reading sources carefully and often against the grain he reveals that many of the poor found meaning in their work took an active and even influential part in their cities politics and nursed ambitions for a better life And nearly all took part in the pleasures and festivities that urban neighborhoods offered Later chapters examine poverty outside the cities and the large scale emigration of indigent farmers to Hawaii's sugar plantations beginning in 1885 In his conclusion Huffman looks at late Meiji hardship in light of twenty first century poverty and the global income disparity that has captured the public's attention in recent years

the post war period and the culturally complicated bilateralism of today Australians have used their cameras to express a divided sense of conflict and kinship with a country that has by turns fascinated and infuriated The remarkable photographs collected and discussed here for the first time shed new light on the history of Australia's engagement with its most important regional partner Pacific Exposures argues that photographs tell an important story of cultural production response and reaction not only about how Australians have pictured Japan over the decades but how they see their own place in the Asia Pacific Pacific Exposures presents the first study of the photographic exchanges between Australia and Japan its photographers personalities motivations anxieties and tensions based on a diverse range of archival materials interviews and well chosen photographs Dr Luke Gartlan University of St Andrews Pacific Exposures will become a key text on Australia's interactions with Japan and the way that photographs can inform cross cultural relations through their production
