Future Of Imprisonment:

The Future of Imprisonment Michael Tonry, 2004-04-08 The imprisonment rate in America has grown by a factor of five since 1972 In that time punishment policies have toughened compassion for prisoners has diminished and prisons have gotten worse a stark contrast to the origins of the prison 200 years ago as a humanitarian reform a substitute for capital and corporal punishment and banishment So what went wrong How can prisons be made simultaneously more effective and more humane Who should be sent there in the first place What should happen to them while they are inside When how and under what conditions should they be released The Future of Imprisonment unites some of the leading prisons and penal policy scholars of our time to address these fundamental questions Inspired by the work of Norval Morris the contributors look back to the past twenty five years of penal policy in an effort to look forward to the prison s twenty first century future Their essays examine the effects of current high levels of imprisonment on urban neighborhoods and the people who live in them They reveal how current policies came to be as they are and explain the theories of punishment that guide imprisonment decisions Finally the contributors argue for the strategic importance of controls on punishment including imprisonment as a limit on government power chart the rise and fall of efforts to improve conditions inside analyze the theory and practice of prison release and evaluate the tricky science of predicting and preventing recidivism A definitive guide to imprisonment policies for the future this volume convincingly demonstrates how we can prevent crime more effectively at lower economic and human cost *The Future of Imprisonment* Norval Morris, 1977-06-01 *The Future of Imprisonment* Norval Morris, 1974 House documents , 1895 *The Scale of Imprisonment* Franklin E. Zimring, Gordon J. Hawkins, Gordon Hawkins, 1993-09 Two of the nation s foremost criminal justice scholars present a comprehensive assessment of the factors behind the growth and subsequent overcrowding of American prisons By critiquing the existing scholarship on prison scale from sociology and history to correctional forecasting and economics they both reveal that explicit policy changes have had little influence on the increases in imprisonment in recent years and analyze whether it is possible to place limits effectively on prison population The Scale of Imprisonment has an exceptionally well designed literature review of interest to public policy criminal justice and public law scholars Its careful review analysis and critique of research is stimulating and inventive American Political Science Review The authors frame our thoughts about the soaring use of imprisonment and stimulate our thinking about the best way we as criminologists can conduct rational analysis and provide meaningful advice Susan Guarino Ghezzi Journal of Quantitative Criminology Zimring and Hawkins bring a long tradition of excellent criminological scholarship to the seemingly intractable problems of prisons prison overcrowding and the need for alternative forms of punishment J C Watkins Jr Choice *Race and Masculinity in Contemporary American Prison Novels* Auli Ek, 2020-10-28 This book offers an interdisciplinary analysis of how contemporary American prison narratives reflect and produce ideologies of masculinity in the United States and in so doing compellingly engages popular culture in order to demonstrate the

profound ways in which implicit understandings of prison life shape all Americans and their reactions to people both incarcerated and not

The Insidious Momentum of American Mass Incarceration Franklin E. Zimring, 2020-09-03 The phenomenal growth of penal confinement in the United States in the last quarter of the twentieth century is still a public policy mystery While there is unanimous condemnation of the practice there is no consensus on the causes nor any persuasive analysis of what is likely to happen in the coming decades In *The Insidious Momentum of American Mass Incarceration* Franklin E Zimring seeks a comprehensive understanding of when how and why the United States became the world leader in incarceration to further determine how the use of confinement can realistically be reduced To do this Zimring first profiles the growth of imprisonment after 1970 emphasizing the important roles of both the federal system and the distribution of power and fiscal responsibility among the levels of government in American states He also examines the changes in law enforcement prosecution and criminal sentencing that ignited the 400% increase in rates of imprisonment in the single generation after 1975 Finally Zimring then proposes a range of strategies that can reduce prison population and promote rational policies of criminal punishment Arguing that the most powerful enemy to reducing excess incarceration is simply the mundane features of state and local government such as elections of prosecutors and state support for prison budgets this book challenges the conventional ways we consider the issue of mass incarceration in the United States and how we can combat the rising numbers

New Borders Antonis Vradis, Evie Papada, Joe Painter, Anna Papoutsis, 2018-11-20 To many a border is a geographical fact But what happens when a border is subject to an emergency Today as millions are forced to migrate due to war famine and political unrest it is important to analyse how states use new bordering techniques to control populations *New Borders* focuses on the Greek island of Lesbos Since 2015 the island has come under intense scrutiny as more than one million people have disembarked on its shores During this time the authors spent two years studying the changing meanings and functions of the EU's border They observed how the reception of the refugees slid into detention and refuge became duress Examining how and why this happened they tackle questions on European policy the securitisation of national and EU borders and the real impacts this has had on everyday life determining who belongs where and when

The Politics of Prison Crowding Simone Santorso, 2023-02-14 *The Politics of Prison Crowding* investigates recent transformations in Italy's penal system to make the key analytical observation that conditions of overcrowding have become the new normal under which the modern prison system continues to operate and deliver punishment Engaging with the politics of crowding thus entails a direct and pertinent engagement with the modern state's politics of criminal justice and social control Worldwide over the last decades a growing number of jurisdictions have prison systems operating above or to the limit of their capacity yet little attention has been paid to these elements in the analysis of prison politics and day to day functions By exploring the crowding issue this book offers an original and interesting insight into the politics and dynamics characterising contemporary prison systems The hypothesis of this book is that the politics of prison crowding have

become the template for the daily administration of the prison system which incorporates not just policy and rules but day to day functions and practices regulating life behind bars Through interviews in modern Italian prisons the book brings to light a radical redefinition of a carceral system that harshens the delivery of punishment while justifying this exacerbation of pain by adding new bureaucratic logic to the administration of the penal system within a narrative of compliance to human rights standards By shedding new light on prison politics to open new critical perspectives and research paths *The Politics of Prison Crowding* offers a fundamental tool to scholars students and all professional policymakers and practitioners dealing with prison policies and the politics of justice *American Prisons and Jails* Joan Mullen,1980 **Education in Prison** Emma Hughes,2016-04-29 The role of education in prisons prisoners decisions regarding education the impact of prison culture on either encouraging or discouraging such activities and the potential consequences of education for prisoners reentry into society all have important implications This extended analysis of prisoner education represents a unique contribution to an under researched field whilst also making important and original connections between research on education in prison and the literature on adult learning in the community Through offering crucial insights into the varied motivations and disincentives that inform prisoners decisions to study in prison whether it be through distance learning or prison based classes the reader is also able to consider factors that inform decisions to engage in a broader range of positive and constructive activities whilst in prison These research findings provide insight into how prison culture and prison policies may impact upon rehabilitative endeavour and suggest ways in which prisons may seek to encourage constructive and or rehabilitative activities amongst their inhabitants if desired Based on interviews and questionnaires completed by British adult prisoners studying through distance learning this qualitative study offers a valuable complement and counterpart to prison education studies that focus on measuring recidivism rates The learner centred approach used yields a nuanced and complex understanding of the varied ways in which education in prison actually operates and is experienced and considers the consequences of this for the students lives As such the findings offer further insight into important evidence resulting from recidivism studies reviewed within the book whilst contributing to the reemerging interest in studies of prison life and prison culture that are based on prisoner interviews Healing Corrections Chris Innes,2015-05-22 Unlike critics who see the organizational cultures of prisons jails and community correction agencies as a problem that needs to be fixed with simple sounding reforms Chris Innes argues instead that these types of organizational cultures are adaptive and a source of strength that can be used to genuinely transform them He shows how operational priorities including safety and security become much more difficult to sustain when organizational cultures become fragmented into disconnected subcultures To transform an organizational culture he argues this fragmentation must be healed by changing the patterns of communication that make up the day to day reality of an organization s culture Innes advocates an innovative approach based on the skills and practices of dialogue He describes in detail how Dialogic Practice can be used to transform organizational cultures

through an implementation process that begins with the leadership and cascades through the organization as an expanding circle as staff are trained and become engaged in the process Innes draws upon the research and policy literature in several fields the contemporary national debate on the role of the justice system in American society and his own experience during the last forty years in correctional research and policy and in working directly with correctional agencies This innovative approach to transforming organizational cultures will interest correctional decision makers administrators researchers and graduate students in criminal justice advocates and others who manage mission driven human services organizations

Marijke Malsch, Marius Duker, 2016-05-23 In many criminal justice systems a new trend towards incapacitation can be witnessed A ubiquitous want for control seems to have emerged as a consequence of perceived safety risks This can be seen not only in the mass incarceration of offenders but also in the disqualification of offenders from jobs in chemical castration in cases of sexual crimes the increased use of electronic monitoring and in the life long monitoring of individuals who pose certain risks Trends towards incapacitation are now even spreading to public administration and the employment sector in the refusal of licenses and the rejection of employees with past criminal records This book discusses the topic of incapacitation from various angles and perspectives It explores how theories of punishment are affected by the more recent emphasis on incapacitation and how criminal justice practice is changing as a consequence of this new emphasis Many contributors express criticisms with this trend towards incapacitation They argue for a better calibration of measures to the severity of the misconduct In addressing an increasingly important development in criminal justice the book will be an essential resource for students researchers and policy makers working in the areas of criminal law sentencing probation and crime prevention

Privatizing War William Feldman, 2016-06-17 This book offers a comprehensive moral theory of privatization in war It examines the kind of wars that private actors might wage separate from the state and the kind of wars that private actors might wage as functionaries of the state The first type of war serves to probe the ad bellum question of whether private actors can justifiably authorize war while the second type of war serves to probe the in bello question of whether private actors can justifiably participate in war The cases that drive the analysis are drawn from the rich and complicated history of private military action stretching back centuries to the Italian city states whose mercenaries were reviled by Machiavelli The book also takes up the hypothetical examples conjured by philosophers the private protective agencies of Robert Nozick's Anarchy State and Utopia for example and the private armies of Thomas More's Utopia The aim of this book is to propose a theory of privatization that retains currency not only in assessing current military engagements but past and future ones as well In doing so it also raises a set of important questions about the very enterprise of war This book will be of much interest to students of ethics political philosophy military studies international relations war and conflict studies and security studies

Invisible Women Angela Devlin, 1998 More and more women are being sent to prison at the time when this book was written UK numbers had doubled over the last five years and the Prison Reform Trust called this a rate of increase without precedent in the modern era Indeed the figures for convicted women shows an even greater increase 76% according to the National Association of Probation Officers more than twice the increase for men Though the media focuses on high profile prisoners like Myra Hindley and Rosemary West most women become invisible as soon as they pass through the prison gates and are subsumed into a world that is predominantly masculine and insensitive to their very different needs The author spent the past five years visiting twelve of the 16 prisons that take women interviewing prisoners and more unusually those whose job it is to care for them prison officers education probation and healthcare staff chaplains and counsellors In a book that is deliberately accessible to the general reader as well as to the prison professional she vividly recreates the realities of prison life for a woman at the end of the twentieth century as conditions worsen with overcrowding staff shortages and expenditure cuts Some of Devlin's findings will shock as well as inform she describes the over use of medication as a means of control the violence resulting from drug misuse the plight of ethnic minority and foreign national women and the self mutilation and suicide attempts of women in desperate need of help
