Future As Fairneb Ecological Justice

Andrew Dobson

Future As Fairneb Ecological Justice:

Future as Fairness, 2004-01-01 Twenty years after the establishment of the World Commission on Environment and Development the 13 contributions in this interdisciplinary volume offer a broad spectrum of perspectives and research based recommendations on environmental sustainability social justice and the human enterprise The cases explored cover global citizenly rights and obligations environmental health ecological building practices tradable fuel permits forestry and illegal logging local waste management employment and risk assessments the genetic modification debate nuclear and toxic waste global environmental governance and 500 years of globalization Future as Fairness Anne K. Haugestad, J. D.

Wulfhorst, 2004 Twenty years after the establishment of the World Commission on Environment and Development the 13 contributions in this interdisciplinary volume offer a broad spectrum of perspectives and research based recommendations on environmental sustainability social justice and the human enterprise The cases explored cover global citizenly rights and obligations environmental health ecological building practices tradable fuel permits forestry and illegal logging local waste management employment and risk assessments the genetic modification debate nuclear and toxic waste global environmental governance and 500 years of globalization *Global Justice and Neoliberal Environmental Governance*

Chukwumerije Okereke, 2007-09-03 An ethical critique of existing approaches to sustainable development and international environmental cooperation this book details the tensions normative shifts and contradictions that currently characterize it

Citizenship, Civil Society and Development Tiina Kontinen, Henri Onodera, 2016-04-14 The book investigates the intersection of citizenship civil society and development in today's global world The multi disciplinary collection considers the notion of citizenship in connection with the neoliberal development agendas participation security discourses and legal environments The contributions analyse the development citizenship nexus grounded in empirical work in African Latin American European and global contexts The book opens exciting avenues to reflect on the notion of citizenship and explores the following pertinent questions Does citizenship matter for development research Do international development policy and practice promote certain normative registers for how people should make sense of their social relations and in particular how they relate to public authorities What are their responses Contributors from various academic backgrounds such as anthropology law and political science affirm the importance of citizenship for the study of contemporary development processes Chapters provide empirical analysis of the processes of water privatization in Ghana the promulgation of new NGO Law in Ethiopia environmental politics in former Yugoslavia and the global interconnections between the Arab Spring and the Occupy Wall Street movement The book is relevant for students and scholars of political science and development studies as well as development practitioners globally This book was published as a special issue of the Journal of Civil Society

Geoecological and Geopolitical Risks for the Oil and Gas Industry in the Arctic Vladimir N. Bashkin, Olga P. Trubitsina, 2022-06-01 This book discusses issues of geoecological GER and geopolitical GPR risks due to hydrocarbon

development of the Arctic The authors explain the ethical and philosophical foundations of understanding environmental equity and justice in relation to the development of Arctic natural resources and consider various approaches to the moral aspects of making global management decisions in the field of environmental protection and environmental safety Special attention is paid to analysis of modern geopolitical and geostrategic challenges to the development of the Arctic region The monograph identifies the key geopolitical factors affecting the sustainable development of the Arctic and analyzes the similarities and differences in the geostrategic positions of the five Arctic states The authors reveal the need to consider geopolitical challenges in the process of GER analysis for oil and gas development in the Arctic region The book explores the intersection of the strategic interests for a number of states and describes Russia's inability to ensure environmental safety in the development of Arctic deposits The book analyzes in detail each type of GER with an emphasis on their potential to lead to additional opportunities and threats and assesses environmental rating as an indicator of the GER management process of Russian oil and gas companies operating in the Arctic Although the main focus is on the Russian part of this region many arguments and conclusions are quite applicable to the entire Arctic region The consideration of geoecological and geopolitical aspects of the development of Arctic resources with the example of Russian oil and gas companies sheds light on the entire Arctic region taking into account the interests of all other national and international companies involved in GER and GPR there

Intergenerational Democracy, Environmental Justice and the Case of Nuclear Waste Lee Towers, Matthew Cotton, 2024-10-07 This book explores the interplay between intergenerational justice and intragenerational justice using nuclear waste management as a consistent case to explore these themes Lee Towers and Matthew Cotton examine the issue of intergenerational justice from a social scientific perspective drawing on central case studies of nuclear waste management in Canada Finland and the United Kingdom They connect indigenous philosophies and notions of justice with the concept of intergenerational democracy advocating for better inclusion of youth and elders in decision making that affects their well being As such the book's primary objectives are fourfold To assess whether trade offs between intergenerational and intragenerational justice are necessary and if so what these trade offs are and how they might be resolved To critically assess dominant western liberal philosophical approaches that shape contemporary intergenerational justice thinking in policy and practice and consider alternatives drawn from anthropology and indigenous philosophies To assess how far our current capitalist system can achieve substantive forms of justice To critically examine three nuclear waste management case studies and assess how far these achieve environmental and energy justice and how they exemplify tensions between inter and intragenerational justice This short accessible volume will be of great interest to students and scholars of energy environmental justice and ethics

Environmental Justice in the Anthropocene Stacia Ryder, Kathryn Powlen, Melinda Laituri, Stephanie A. Malin, Joshua Sbicca, Dimitris Stevis, 2021-06-09 Through various international case studies presented by both practitioners and scholars Environmental Justice in the Anthropocene explores how an environmental justice approach is necessary for reflections on inequality in the Anthropocene and for forging societal transitions toward a more just and sustainable future Environmental justice is a central component of sustainability politics during the Anthropocene the current geological age in which human activity is the dominant influence on climate and the environment Every aspect of sustainability politics requires a close analysis of equity implications including problematizing the notion that humans as a collective are equally responsible for ushering in this new epoch Environmental justice provides us with the tools to critically investigate the drivers and characteristics of this era and the debates over the inequitable outcomes of the Anthropocene for historically marginalized peoples The contributors to this volume focus on a critical approach to power and issues of environmental injustice across time space and context drawing from twelve national contexts Austria Bangladesh Chile China India Nicaragua Hungary Mexico Brazil Sweden Tanzania and the United States Beyond highlighting injustices the volume highlights forward facing efforts at building just transitions with a goal of identifying practical steps to connect theory and movement and envision an environmentally and ecologically just future This interdisciplinary work will be of great interest to students scholars and practitioners focused on conservation environmental politics and governance environmental and earth sciences environmental sociology environment and planning environmental justice and global sustainability and governance It will also be of interest to social and environmental justice advocates and activists

Intercultural Philosophy and Environmental Justice Between Generations Hiroshi Abe, Matthias Fritsch, Mario Wenning, 2024-03-21 This book draws

on a spectrum of philosophical cultures to provide new perspectives on environmental ethics and intergenerational justice
EPA Journal ,1992 **The Search for Environmental Justice** Paul Martin,Sadeq Z. Bigdeli,Trevor

Daya-Winterbottom,Willemien du Plessis,Amanda Kennedy,2015-07-31 This thoughtful book provides an overview of the major developments in the theory and practice of environmental justice It illustrates the direction of the evolution of rights of nature and exposes the diverse meanings and practical uses of the conc **Fairness and Futurity** Andrew

Dobson,1999-04-01 Fairness and Futurity Essays on Environmental Sustainability and Social Justice brings together leading international figures in political theory and sociology as well as representatives from the political community to consider the normative issues at stake in the relationship between environmental sustainability and social justice It raises important questions and sets out to provide the answers If future generations are owed justice what should we bequeath them Is sustainability an appropriate medium for environmentalists to express their demands Is environmental protection compatible with intra generational justice Is environmental sustainability a luxury when social peace has broken down These essays emerged from three intensive seminars that involved participants in constant re evaluations of their work and which brought three distinct groups environmental theorists mainstream political theorists and policy community members into fruitful contact In particular the attempt to involve mainstream theorists in environmental questions and to encourage environmentalists to use intellectual resources of political theory should be highlighted Environmental Justice Kristin

Shrader-Frechette,2002-09-26 Shrader Frechette offers a rigorous philosophical discussion of environmental justice Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergenerational equity and just compensation and then bringing them to bear on real world social issues she shows how many of these core concepts have been compromised for a large segment of the global population including Appalachians African Americans workers in hazardous jobs and indigenous people in developing nations She argues that burdens like pollution and resource depletion need to be apportioned more equally and that there are compelling ethical grounds for remedying our environmental problems She also argues that those affected by environmental problems must be included in the process of remedying those problems that all citizens have a duty to engage in activism on behalf of environmental justice and that in a democracy it is the people not the government that are ultimately responsible for fair use of the environment

Microfoundations of Institutions Patrick Haack,Jost Sieweke,Lauri Wessel,2019-11-25 The notion of microfoundations has received growing interest in neo institutional theory along with an interest in microfoundational research in disciplines such as strategic management and economics *Defining Environmental Justice* David Schlosberg,2009 The book uses both environmental movements and political theory to help define what is meant by environmental and ecological justice It will be useful to anyone interested in environmental politics environmental movements and justice theory **The Oxford**

Handbook of International Environmental Law Lavanya Rajamani,Jacqueline Peel,2021-08-06 The second edition of this

leading reference work provides a comprehensive discussion of the dynamic and important field of international law concerned with environmental protection. It is edited by globally recognised international environmental law scholars Professor Lavanya Rajamani and Professor Jacqueline Peel and features 67 chapters authored by 76 renowned experts in their fields. The Handbook discusses the key principles underpinning international environmental law, its relevant actors and tools and rules applying in its substantive sub-fields such as climate law, oceans law, wildlife and biodiversity law and hazardous substances regulation. It also explores the intersection of international environmental law with other areas of international law such as those concerned with trade, investment, disaster, migration, armed conflict, intellectual property, energy and human rights. The Handbook sets its discussion of international environmental law in the broader interdisciplinary context of developments in science, ethics, politics and economics which inform the way in which environmental rules are made, implemented and enforced. It provides an introduction to the foundations of international environmental law while also engaging with questions at the frontiers of research, teaching and practice in the field, including the role of Global South perspectives, the contribution made by Earth jurisprudence and the growing role of a diverse range of actors from indigenous peoples to business and industry. Like the first edition, this second edition of the Handbook is an essential reference text for all engaged with environmental issues at the international level and the applicable governance and regulatory structures.

Natural Resources and Environmental Justice Sonia Graham, Anna Lukaszewicz, Stephen Dovers, Libby Robin, Jennifer McKay, Steven Schilizzi, 2017-03-01. Environmental management involves making decisions about the governance of natural resources such as water, minerals or land, which are inherently decisions about what is just or fair. Yet there is little emphasis on justice in environmental management research or practical guidance on how to achieve fairness and equity in environmental governance and public policy. This results in social dilemmas that are significant issues for government, business and community agendas, causing conflict between different community interests. *Natural Resources and Environmental Justice* provides the first comprehensive interdisciplinary examination of justice research in Australian environmental management, identifying best practice and current knowledge gaps. With chapters written by experts in environmental and social sciences, law and economics, this book covers topical issues including coal seam gas, desalination plants, community relations in mining, forestry, negotiations, sea level rise and animal rights. It also proposes a social justice framework and an agenda for future justice research in environmental management. These important environmental issues are covered from an Australian perspective and the book will be of broad use to policy makers, researchers and managers in natural resource management and governance, environmental law, social impact and related fields both in Australia and abroad.

The Justices and Injustices of Ecosystem Services Thomas Sikor, 2013-07-18. Humankind benefits from a multitude of resources and processes that are supplied by ecosystems and collectively these benefits are known as ecosystem services. Interest in this topic has grown exponentially over the last decade as biologists and economists have tried to

quantify these benefits to justify management interventions Yet as this book demonstrates the implications for justice and injustice have rarely been explored and works on environmental justice are only now addressing the importance of ecosystem services The authors establish important new middle ground in arguments between conservationists and critics of market based interventions such as Payment for Ecosystem Services Neither can environmental management be separated from justice concerns as some conservationists like to believe nor is it in fundamental opposition to justice as critics like to put it The book develops this novel interpretation of justice in environmental management through analyses of prominent governance interventions and the conceptual underpinnings of the ecosystem services framework Key examples described are revenue sharing around protected areas and REDD for forest ecosystems The analyses demonstrate that interventions create opportunities for enhancing social justice yet also reveal critical design features that cause ostensibly technical interventions to generate injustices

The Oxford Handbook of Environmental and Conservation Psychology Susan D. Clayton, 2012-10-18 First handbook to integrate environmental psychology and conservation psychology

Environmental Science Daniel Chiras, 2010 Completely updated the eighth edition of Environmental Science enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future
