K. Samantaray, 2017-05-31 **Healthcare in the UK** Ian Greener, 2009 This book contends that attempts to reform the NHS can only be understood by reference to both the wider social and political contexts and to the organisational and ideational legacies present within the NHS itself It aims to take students beyond a basic understanding of the historical development of health policy in the UK to one that demonstrates an appreciation of the interactions between health policy organisation and society The book is aimed at third year and postgraduate students of politics public management and health studies It provides a theoretically inspired account of the development of health policy and organisation in the UK which will also be of interest to academics and researchers in the field BOOK JACKET The Politics of Aid to Burma Anne Decobert, 2015-11-19 For over sixty years conflict between state forces and armed ethnic groups was ongoing in parts of the borderlands of Burma Ethnic minority communities were subjected to systematic and widespread abuses by an increasingly complex patchwork of armed state and non state actors Populations in more remote and disputed border areas typically had little to no access to even basic healthcare and education services As part of its counter insurgency campaign the military state also historically restricted international humanitarian access to civilian populations in unstable border areas It was in this context that cross border aid to Burma had developed as an alternative mechanism for channelling assistance to populations denied aid through more conventional systems Yet by the late 2000s national and international changes had significant impacts on an aid debate which had important political and ethical implications Through an ethnographic study of a cross border aid organisation working on the Thailand Burma border this book focuses on the political and ethical dilemmas of humanitarian government It explores the ways in which aid systems come to be defined as legitimate or illegitimate humanitarian or un humanitarian in an international context that has witnessed the multiplication of often conflicting humanitarian systems and models It examines how an embodied history of violence can shape the worldviews and actions of local humanitarian actors as well as institutions created to mitigate human suffering It goes on to look at the complex and often invisible webs of local organisations international NGOs donors armed groups and other actors which can develop in a cross border and extra legal context a context where competing constructions of systems as legitimate or illegitimate are highlighted Exploring the history of humanitarianism from the local aid perspective of Burma this book will be of interest to students and scholars of Southeast Asian Studies Anthropology of Humanitarian Aid and Development Studies *COVID-19 and the Right to Health in Africa* Ebenezer Durojaye, Roopanand Mahadew, 2024-05-28 This collection draws upon a range of thematic and regional case studies and uses the right to health as a normative framework to explore the devastating impact of the COVID 19 pandemic in Africa Drawing lessons from across the continent the book discusses the challenges faced by African states seeking to ensure the availability accessibility and quality of health care in the context of the COVID 19 pandemic In particular the volume explores the impact of the pandemic on the right to health of vulnerable and marginalized groups such as women children elderly persons with disabilities refugees and asylum seekers and people

from disadvantaged communities Due to the poor funding of the healthcare systems access to health related services was limited to these groups in many African countries thereby leading to avoidable COVID 19 related deaths through shortages of vital supplies including diagnostic tests ventilators and oxygen cylinders Chapters in the volume also explore the contentious issues of vaccine mandates equity resource allocation and the rights of healthcare providers during the pandemic This collection will be of interest to students of public health human rights and the social sciences as well as to academics and policymakers with an interest in the nexus between the COVID 19 pandemic and public health policy in Africa
