Homotopy Theory and Related Topics Mamoru Mimura, 2014-01-15 *Homotopy Theory and Related Topics* Hiroshi Toda, 1987 The papers in this volume are divided into the following four parts 1 Simple homotopy theory and G actions 2 Classifying spaces and characteristic classes 3 Topology of manifolds 4 Homotopy problems unstable and stable cases

Homotopy Theory of Function Spaces and Related Topics Yves Félix, Gregory Lupton, Samuel B. Smith, 2010 This volume contains the proceedings of the Workshop on Homotopy Theory of Function Spaces and Related Topics which was held at the Mathematisches Forschungsinstitut Oberwolfach in Germany from April 5 11 2009 This volume contains fourteen original research articles covering a broad range of topics that include localization and rational homotopy theory evaluation subgroups free loop spaces Whitehead products spaces of algebraic maps gauge groups loop groups operads and string topology In addition to reporting on various topics in the area this volume is supposed to facilitate the exchange of ideas within Homotopy Theory of Function Spaces and promote cross fertilization between Homotopy Theory of Function Spaces and other areas With these latter aims in mind this volume includes a survey article which with its extensive bibliography should help bring researchers and graduate students up to speed on activity in this field as well as a problems list which is an expanded and edited version of problems discussed in sessions held at the conference The problems list is intended to suggest directions for future work **Homotopy Theory and Related Topics** Mamoru Mimura, 2006-11-14
