## **Human Context:**

**The Human context**, 1972     *Portraits of Pioneers in Psychology* Gregory A. Kimble, Michael Wertheimer, 2000-11 This fourth book in the series continues the tradition of the popular earlier volumes by offering lively and entertaining information about some of contemporary psychology's most illustrious ancestors. The 21 chapters, many of them written by today's most visible and eminent authors, concentrate on the lives and achievements of major psychologists from a variety of areas. Created for undergraduate and graduate courses in the history of psychology, the variety of pioneers represented provides enough flexibility to also use it as a supplemental reader in other psychology courses. Each of the five volumes in this series contains different profiles, thereby bringing more than 100 of the pioneers in psychology more vividly to life.     **Experimental**

**Robotics** Jaydev P. Desai, Gregory Dudek, Oussama Khatib, Vijay Kumar, 2013-07-09 The International Symposium on Experimental Robotics ISER is a series of bi-annual meetings which are organized in a rotating fashion around North America, Europe, and Asia Oceania. The goal of ISER is to provide a forum for research in robotics that focuses on novelty of theoretical contributions validated by experimental results. The meetings are conceived to bring together in a small group setting researchers from around the world who are in the forefront of experimental robotics research. This unique reference presents the latest advances across the various fields of robotics with ideas that are not only conceived conceptually but also explored experimentally. It collects robotics contributions on the current developments and new directions in the field of experimental robotics which are based on the papers presented at the 13th ISER held in Quebec City, Canada, at the Fairmont Le Chateau Frontenac on June 18-21, 2012. This present thirteenth edition of Experimental Robotics, edited by Jaydev P. Desai, Gregory Dudek, Oussama Khatib, and Vijay Kumar, offers a collection of a broad range of topics in field and human-centered robotics.     Heading Towards Humans Again Miroslav Radenkovic, 2021-12-31 Bioethics has become an important

part of everyday dynamics encompassing both clinical and research ethics. This edited collection aims to challenge some critical cornerstones of today's contemporary bioethical concerns and issues. The individual chapters were prepared by esteemed scholars with international background in their specialties. Nowadays, technological revolution is reaching a whole new level, continuously challenging us to define what is human. Keeping this in mind, the authors provided comprehensive and thoughtful views on different bioethical issues including cultural and social influences on contemporary bioethics, posthumanism and transhumanism, death, the critical importance of informed consent, prenatal genetic testing, gene and cell therapy, mandatory vaccinations, cannabis use, antidoping concerns, treatment of rare diseases, and pain management, and finally educational and legislative lines of reasoning.     **Gospel and Gender** Douglas Atchison Campbell, Alan J.

Torrance, 2003-01-01 The contributors to this volume are convinced that previous engagements from Christian perspectives with the question of gender have tended to focus on female problems and viewpoints in isolation or conversely on male problems and viewpoints. It seemed particularly important to try to unite reflections on both genders within one discussion on

the assumption that such a consideration would yield more than the sum of two parts Furthermore that consciously relational reflection was to be attempted in specific dialogue with trinitarianism another rather neglected area in the gender debates And thus yields reflections in two directions the impact of the Trinity on gender discussions alongside a consideration of the impact of gender constructions on our conceptions of the Trinity

**Radical Reform** Tariq Ramadan, 2009-02-05 In this new book Tariq Ramadan argues that it is crucial to find theoretical and practical solutions that will enable Western Muslims to remain faithful to Islamic ethics while fully living within their societies and their time He notes that Muslim scholars often refer to the notion of *ijtihad* critical and renewed reading of the foundational texts as the only way for Muslims to take up these modern challenges But Ramadan argues in practice such readings have effectively reached the limits of their ability to serve the faithful in the West as well as the East In this book he sets forward a radical new concept of *ijtihad* which puts context including the knowledge derived from the hard and human sciences cultures and their geographic and historical

contingencies on an equal footing with the scriptures as a source of Islamic law      *Following Jesus* Blake Ferriss,2019-05-15 Jesus spoke to the people once more and said I am the light of the world If you follow me you won t have to walk in darkness because you will have the light that leads to life John 8 12 NLT *Following Jesus An Approach to Christian Spirituality* provides a basis for understanding how the Lordship of Christ is the essential criterion for determining how Christianity functions as a relational experience with God With that relational experience for the believer in Christ being the product of supernatural experience with the Holy Spirit The book functions as an organizing tool to be used for a conscientious inquiry into how a Christian worldview operates in four relational categories of experience With these relational categories act as a basis for understanding how our choices affect our lives and our futures both now and in life and eternally and how it is that God loves us and will give our lives the meaning and purpose that we all long for      *On Animals* David L. Clough,2012-02-02 This volume is a project in systematic theology a rigorous engagement with the Christian tradition in relation to animals under the doctrinal headings of creation reconciliation and redemption and in dialogue with the Bible and theological voices central to the tradition The book shows that such engagement with the tradition with the question of the animal in mind produces surprising answers that challenge modern anthropocentric assumptions For the most part therefore the novelty of the project lies in the questions raised rather than the proposal of innovative answers to it The transformation in our thinking about animals for which the book argues results in the main from looking squarely for the first time at the sum of what we are already committed to believing about other animals and their place in God s creation      *How Finns Learn Mathematics and Science* ,2007-01-01 The Finnish students success in the first PISA 2000 evaluation was a surprise to most of the Finns and even people working in teacher education and educational administration had difficulties to believe that this situation would continue Finland s second success in the next PISA 2003 comparison has been very pleasing for teachers and teacher educators and for education policymakers The good results on the second time waked us to think seriously on possible reasons for the success Several international journalists and expert delegations from different countries have asked these reasons while visiting in Finland Since we had no commonly acceptable explanation to students success we decided at the University of Helsinki to put together a book *How Finns Learn Mathematics and Science* in order to give a commonly acceptable explanation to our students success in the international PISA evaluations The book tries to explain the Finnish teacher education and school system as well as Finnish children s learning environment at the level of the comprehensive school and thus give explanations for the Finnish PISA success The book is a joint enterprise of Finnish teacher educators The explanations for success given by altogether 40 authors can be classified into three groups Teacher and teacher education school and curriculum and other factors like the use of ICT and a developmental project LUMA The main result is that there is not one clear explanation although research based teacher education seems to have some influence But the true explanation may be a combination of several factors      *Conservation of Architectural and Urban Heritage* Tarek

Teba, Antonino Di Raimo, 2025-08-05 This book peers into the concept of conservation under the framework of sustainability. The world's architectural history is in danger due to a lack of understanding, expertise, and care. Some monuments have already been lost and more are under threat. Heritage needs to be well understood, interpreted, defined, and managed for future generations as it provides communities and cultures with retrospection and contributes to recorded history. Additionally, it discusses the relationship between cultural heritage preservation and sustainable development as well as restoration efforts for tangible and intangible cultural heritage assets. The book aims to assist professionals working in the field of heritage conservation, whether it is cultural, rural, architectural, tangible, or intangible. It stands to be a valuable resource for architects and engineers as well as for conservators, archaeologists, environmentalists, and policy makers.
