Human Figure Drawings In Adolescence:

Human Figure Drawings in Adolescence Mollie S. Schildkrout, I. Ronald Shenker, Marsha Sonnenblick, 1972

Children's Drawings of the Human Figure Maureen V. Cox, 2013-05-24 The human figure is one of the earliest topics drawn by the young child and remains popular throughout childhood and into adolescence. When it first emerges, however, the human figure in the child's drawing is very bizarre; it appears to have no torso and its arms, if indeed it has any, are attached to its head. Even when the figure begins to look more conventional, the child must still contend with a variety of problems, for instance, how to draw the head and body in the right proportions and how to draw the figure in action. In this book, Maureen Cox traces the development of the human form in children's drawings; she reviews the literature in the field, criticises a number of major theories which purport to explain the developing child's drawing skills, and also presents new data.

Clinical Assessment of Child and Adolescent Personality and Behavior Paul J. Frick, Christopher T. Barry, Randy W. Kamphaus, 2020-06-11 The fourth edition of this textbook offers a scientific and practical context within which to understand and conduct clinical assessments of children's and adolescents' personality and behavior. The new edition ensures that the content is relevant to diagnostic criteria for major forms of child and adolescent psychopathology in the 5th edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM-5). It provides updated information on specific tests and discusses advances in research that have occurred since the last edition that are relevant for assessing the most common forms of psychopathology shown by children and adolescents. The volume is unique in providing both the scientific and ethical basis to guide psychological testing as well as providing practical advice for using specific tests and assessing specific forms of psychopathology. This new edition highlights how current trends in psychological classification such as the DSM-5 and the Research Domain Criteria should influence the clinical assessment of children and adolescents. Provides updates to professional standards that should guide test users. Discusses practical considerations in planning and conducting clinical assessments. Evaluates the most recent editions of common tests used in the clinical assessment of child and adolescent personality and behavior. Provides an overview of how to screen for early signs of emotional and behavioral risk for mental problems in children and adolescents. Discusses practical methods for integrating assessment information collecting as part of a clinical assessment. Uses current research to guide clinical assessments of children with Attention deficit Hyperactivity Disorder, conduct problems, depression, anxiety, and autism spectrum disorder. *Clinical Assessment of Child and Adolescent Personality and Behavior* is a valuable updated resource for graduate students as well as veteran and beginning clinicians across disciplines including school clinical child developmental and educational psychology, psychiatry, counseling, and social work as well as related disciplines that provide mental health and educational services to children and adolescents. The Assessment of Child and Adolescent Personality Howard M. Knoff, 2002-12-31 Now available in paper for the first time, this

volume brings together leading contributors to provide a comprehensive review of theory research and practice in child and adolescent personality assessment. Organized for easy reference, the book is divided into four parts. Part I summarizes basic theories, issues, and concepts, setting forth a framework for assessment as a hypothesis-generating problem-solving process. Part II describes and evaluates a wide range of relevant approaches, tests, and techniques, marshaling the available data and reviewing administration procedures, scoring, and interpretation. In Part III, the process by which personality assessment is translated into effective intervention strategies and programs for children is examined in depth. A summary of major perspectives and recommended practices is presented in Part IV, which also considers future needs and directions for the field.

Behavioral, Social, and Emotional Assessment of Children and Adolescents Sara Whitcomb, 2017-08-30

Generally recognized as the standard work in its field, *Behavioral, Social, and Emotional Assessment of Children and Adolescents* is a comprehensive guide for conducting conceptually sound, culturally responsive, and ecologically oriented assessments of students' social and emotional behavior. Written for graduate students, practitioners, and researchers in the fields of school psychology, child clinical psychology, and special education, it will also be of interest to those in related disciplines. Building on the previous editions, this fifth edition includes updated references to DSM-5 and federal standards, as well as an integrated approach to culturally competent assessment throughout the text. In Part I, *Foundations and Methods of Assessment*, the author provides a general foundation for assessment practice and outlines basic professional and ethical issues, cultural considerations, and classification and diagnostic problems. Part II, *Assessment of Specific Problems*, includes material on assessing specific social-emotional behavior domains, including externalizing problems, internalizing problems, social skills, and social-emotional strengths, and the unique needs of young children. A chapter on school-wide screening methods was also added with this edition. By weaving together the most recent research evidence and common application issues in a scholarly yet practical manner, *Behavioral, Social, and Emotional Assessment of Children and Adolescents* continues to be the pre-eminent foundation for assessment courses.

Behavioral, Social, and Emotional Assessment of Children and Adolescents Sara A. Whitcomb, 2013-05-07

Generally recognized as the standard work in its field, *Behavioral, Social, and Emotional Assessment of Children and Adolescents* provides a comprehensive foundation and guide for conducting conceptually sound, culturally responsive, and ecologically oriented assessments of student social and emotional behavior. It is aimed at graduate students, practitioners, and researchers in the fields of school psychology, child clinical psychology, and special education, but will also be of interest to those in related disciplines such as counseling psychology, child psychiatry, and social work.
