Bhanu Murthy, 2006-09-27 With globalization fast becoming an irreversible process it is necessary to pay increased attention to the implications for environmental sustainability However the so called environmental Kuznets curve EKC argument implies that rapid economic growth in many developing countries should be environmentally unsustainable Environmental Sustainability addresses this dichotomy and articulates a notion of consumption sustainability that is both universal and pertains to the indefinite future Additionally it emphasizes the importance of addressing a broad spectrum of sources of environmental degradation and relates this measure to an index of economic achievement more complete than per capita income As well as the EKC authors Jha and Murthy also critique the Environmental Sustainability
