**Travel and Imagination** Garth Lean,Russell Staiff,2016-02-24 The imagination has long been associated with travel and tourism from the seventeenth century when the showman and his peepshow box would take the village crowd to places cities and lands through the power of stories to today when we rely on a different range of boxes to whisk us away on our imaginative travels the television the cinema and the computer Even simply the notion of travel it would seem gives us license to daydream The imagination thus becomes a key concept that blurs the boundaries between our everyday lives and the idea of travel Yet despite what appears to be a close and comfortable link there is an absence of scholarly material looking at travel and the imagination Bringing together geographers sociologists cultural researchers philosophers anthropologists visual researchers archaeologists heritage researchers literary scholars and creative writers this edited collection explores the socio cultural phenomenon of imagination and travel The volume reflects upon imagination in the context of many forms of physical and non physical travel inviting scholars to explore this fascinating yet complex area of inquiry in all of its wonderful colour slipperiness mystery and intrigue The book intends to provide a catalyst for thinking discussion research and writing with the vision of generating a cannon of scholarship on travel and the imagination that is currently absent from the literature

**Reanimating Regions** James Riding,Martin Jones,2017-05-12 Writing regions undertaking a regional study was once a standard form of geographic

communication and critique This was until the quantitative revolution in the middle of the previous century and more definitively the critical turn in human geography towards the end of the twentieth century From then on writing regions as they were experienced phenomenologically or arguing culturally historically and politically with regions was deemed to be old fashioned Yet the region is and always will be a central geographical concept and thinking about regions can tell us a lot about the history of the discipline called geography Despite taking up an identifiable place within the geographical imagination in scholarship and beyond region remains a relatively forgotten under used and in part under theorised term Reanimating Regions marks the continued reinvigoration of a set of disciplinary debates surrounding regions the regional and regional geography Across 18 chapters from international interdisciplinary scholars this book writes and performs region as a temporary permanence something held stable not fixed and absolute at different points in time for different purposes There is as this expansive volume outlines no single reading of a region Reanimating Regions collectively rebalances the region within geography and geographical thought In renewing the geography of regions as not only a site of investigation but also as an analytical framework through which to write the world what emerges is a powerful reworking of the geographic imagination Read against one another the chapters weave together timely commentaries on region and regions across the globe with a particular emphasis upon the regional as played out in the United Kingdom and regional worlds both within and beyond Europe offering chapters from Africa and South America Addressing both the political and the cultural this volume responds to the need for a consolidated and considered reflection on region the regional and regional geography speaking directly to broader intellectual concerns with performance aesthetics identity mobilities the environment and the body
