Invasive Technification Gernot Böhme, 2012-08-23 Technology has extended its reach to the human body not just in a literal sense through implants transplants and technological substitutes for biological organs but in a more figurative sense too Technological infrastructure and the institutions of a technified society today determine what perception is how we communicate and what forms of human relationship with the natural world are possible A fundamental new conception of technology is urgently needed Technology can no longer be seen as a means for efficiently attaining pre established ends Rather it must be seen as a total structure which makes new forms of human action and human relationship possible while limiting the possibilities of others In *Invasive Technification* acclaimed German philosopher Gernot Böhme offers a reading of technology that explores the many dimensions in which technology presents challenges for modern human beings It is a book about the preservation of humanity and humane values under the demanding conditions of a technically advanced civilisation and makes a major contribution to the contemporary philosophy of technology

Durkheim's Philosophy Lectures Emile Durkheim,2004-07-19 Moving back and forth between the history of philosophy and the contributions of philosophers in his own day Durkheim takes up topics as diverse as philosophical psychology logic ethics and metaphysics and seeks to articulate a unified philosophical position Remarkably in these lectures given more than a decade before the publication of his groundbreaking book *The Division of Labour in Society* 1893 the social realism that is so characteristic of his later work where he insists famously that social facts cannot be reduced to psychological or economic ones and that such facts constrain human action in important ways is totally absent in these early lectures For this reason they will be of special interest to students of the history of the social sciences for they shed important light on the course of Durkheim s intellectual development *Management* ,1986 **Management, a Bibliography for NASA Managers** ,1987-04 *Christa Sommerer & Laurent Mignonneau* Karin Ohlenschlager,Peter Weibel,Alfred Weidinger,2023-02-07 More than a cabinet of curiosities more than a terrarium more than an aquarium a captivating look at thirty years of artistic work by the Austrian French artist duo Christa Sommerer and Laurent Mignonneau Working at the intersection of natural science technology and art Austrian French artist duo Christa Sommerer and Laurent Mignonneau pioneered the Art of Interface innovative technical interfaces that enable physical interaction between

The Biblical Basis for Modern Science Henry Morris, 2002-06-01 For decades Henry Morris has been known as a defender of the Christian faith It's an auspicious title for such a humble man yet no one can deny that the grasp Morris has on science and faith issues is staggering In this updated classic Morris walks the reader through history real history by showing the absurdity of evolution From a wide variety of sciences including astronomy biology chemistry physics and geology Morris presents clear evidence that the Bible gives us an astonishingly accurate record of the past present and future

The Ground Between Veena Das, Michael Jackson, Arthur Kleinman, Bhargupati Singh, 2014-04-21 The guiding inspiration of this book is the attraction and distance that mark the relation between anthropology and philosophy This theme is explored through encounters between individual anthropologists and particular regions of philosophy Several of the most basic concepts of the discipline including notions of ethics politics temporality self and other and the nature of human life are products of a dialogue both implicit and explicit between anthropology and philosophy These philosophical undercurrents in anthropology also speak to the question of what it is to experience our being in a world marked by radical difference and otherness In *The Ground Between* twelve leading anthropologists offer intimate reflections on the influence of particular philosophers on their way of seeing the world and on what ethnography has taught them about philosophy Ethnographies of the mundane and the everyday raise fundamental issues that the contributors grapple with in both their lives and their thinking With directness and honesty they relate particular philosophers to matters such as how to respond to the suffering of the other how concepts arise in the give and take of everyday life and how to be attuned to the world through the senses Their essays challenge the idea that philosophy is solely the province of professional philosophers and suggest that certain modalities of being in the world might be construed as ways of doing philosophy Contributors Jo o Biehl Steven C Caton Vincent Crapanzano Veena Das Didier Fassin Michael M J Fischer Ghassan Hage Clara Han Michael
