

Teilhard's *The Human Phenomenon*: An Online Study Group

Led by Ernie Tamminga, PhD, trained Spiritual Director
and Cross-Cultural Religious Studies specialist

Beginning on **Tuesday, July 9** and continuing on alternate
Tuesdays at **12:30 pm PT/3:30pm ET** "for as long as it takes,"
sessions will last 75 minutes each.

Contact Information:

ZOOM link to be provided via email.

Join us as we venture with Teilhard into a journey through cosmic and terrestrial evolution, toward what he called a "Point Omega" of awakening planetary consciousness awaiting us ahead.

We will use Sarah Appleton-Weber's 1999 translation, *The Human Phenomenon*. Our reading will be supplemented by videos and graphics from the presentation originally created by the Phenomenon of Man Project. There will be ample time for group discussion.

Human Phenomenon:

The Human Phenomenon Sarah Appleton-Weber, 2003-09-01 In this work Teilhard guides the reader back in space time to experience the birth of our planet as it imprisons the human future in its globe and motion then forward through the emergence of life and the birth of thought and socialization *Phenomenon of Religion* Ninian Smart, 1973-06-18

Human Evolution Bernard Grant Campbell, In this new fourth edition Campbell has revised and updated his classic introduction to the field Human Evolution synthesizes the major findings of modern research and theory and presents a complete and integrated account of the evolution of human beings New developments in microbiology and recent fossil records are incorporated into the enormous range of this volume with the resulting text as lucid and comprehensive as earlier editions The fourth edition retains the thematic structure and organization of the third with its cogent treatment of human variability and speciation primate locomotion and nonverbal communication and the evolution of language supported by more than 150 detailed illustrations and an expanded and updated glossary and bibliography As in prior editions the book treats evolution as a concomitant development of the main behavioral and functional complexes of the genus Homo among them motor control and locomotion mastication and digestion the senses and reproduction It analyzes each complex in terms of its changing function and continually stresses how the separate complexes evolve interdependently over the long course of the human journey All these aspects are placed within the context of contemporary evolutionary and genetic theory analyses of the varied extensions of the fossil record and contemporary primatology and comparative morphology The result is a primary text for undergraduate and graduate courses one that will also serve as required reading for anthropologists biologists and nonspecialists with an interest in human evolution Synthesizes the conventional academic thought into a textbook or detailed account for lay readers Along the chronological narrative are discussions of progress in homeostasis the primate radiation locomotion and the hindlimb function and structure of the head reproduction and social structure and culture and society Book News Bernard Campbell has been a visiting lecturer at Harvard and Cambridge and has taught and conducted research in Eastern and Southern Africa He was professor of anthropology at the University of California Los Angeles from 1970-76 Dr Campbell is author coauthor of *Sexual Selection and the Descent of Man* Human Ecology second edition Aldine Humankind Emerging and the definitive three volume Catalogue of Fossil Hominids **Sexual Orientation and Human Rights** Laurence M. Thomas, Michael E. Levin, 2000-01-01 What rights govern heterosexual and homosexual behaviors Two distinguished philosophers debate this important issue in *Sexual Orientation and Human Rights* Laurence Thomas argues that a society which has the constitutional resources to protect hate groups can protect homosexuals without valorizing the homosexual life style He defends the view that the Bible cannot warrant the venom that in the name of religion is often expressed against homosexuals Michael Levin defends the unorthodox view that the aversion some people experience toward homosexuality deserves respect He further argues that while homosexuals enjoy the same rights as others to be free

of violence and discrimination they do not have more extensive rights *Evolution of Adam and Eve* Jamal Nassar Hussein, 2014-02-07 O Allah Pray upon our master Muhammad the Attribute and the Inspiration and the Message and the Wisdom and upon the members of His household and his companions **The Universe in the Image of Imago Dei** Alexei V. Nesteruk, 2022-03-24 Cosmology anthropology and Christology are deeply interrelated This implies that one cannot talk about the structure of the world without human presence in it as well as it is impossible to produce any reasonable understanding of humanity without positioning it in the universe In the same fashion in order to comprehend where the human capacity of predicating the universe comes from one needs to appeal to humanity's Divine Image that is to its archetype in the incarnate Christ Whereas Christians traditionally believe that the human phenomenon is unique as created in the Divine Image such scientific disciplines as evolutionary biology palaeoanthropology the sciences of artificial intelligence psychology and others challenge the vision of humanity as a unique formation thus challenging the doctrine of Imago Dei All these disciplines place humans in a mediocre position in the world accompanied by the feeling of anxiety insecurity and non attunement to the universe Theology needs to respond to these challenges by incorporating into its scope the data from the sciences in order to neutralize such anxieties The resulting dialogue of theology with science provides a hermeneutics of the human condition with no objective to change the latter Then the sense of the universe is disclosed from within the Divine Image reflecting the predicaments of the human created condition **Nonlinear Dynamics in Human Behavior** William H. Sulis, Allan Combs, 1996 This book represents a selection of papers presented at the Fourth Annual Conference of the Society for Chaos Theory in Psychology and the Life Sciences held at Johns Hopkins University in Baltimore June 24-27 1995 The book reflects the Society as a whole consisting of applications of nonlinear methodology in psychophysics neurophysiology business and social science as well as applications of the nonlinear paradigm to issues arising in psychotherapy and the study of creativity Unique are contributions on the use of Boolean networks in the study of psychosis and quality of life Review articles on the appropriate use of time series methods in psychology and psychophysics provide a valuable reference **The Sanctity of Human Life** David Novak, 2009-04-29 Heated debates are not unusual when confronting tough medical issues where it seems that moral and religious perspectives often erupt in conflict with philosophical or political positions In *The Sanctity of Human Life* Jewish theologian David Novak acknowledges that it is impossible not to take into account the theological view of human life but the challenge is how to present the religious perspective to nonreligious people In doing so he shows that the two positions the theological and the philosophical aren't as far apart as they may seem Novak digs deep into Jewish scripture and tradition to find guidance for assessing three contemporary controversies in medicine and public policy the use of embryos to derive stem cells for research socialized medicine and physician assisted suicide Beginning with thinkers like Plato Aristotle Kant and Nietzsche and drawing on great Jewish figures in history Maimonides Rashi and various commentators on the Torah written law and the Mishnah oral law

Novak speaks brilliantly to these modern moral dilemmas The Sanctity of Human Life weaves a rich and sophisticated tapestry of evidence to conclude that the Jewish understanding of the human being as sacred as the image of God is in fact compatible with philosophical claims about the rights of the human person especially the right to life and can be made intelligible to secular culture Thus according to Novak the use of stem cells from embryos is morally unacceptable the sanctity of the human person and not capitalist or socialist approaches should drive our understanding of national health care and physician assisted suicide violates humankind s fundamental responsibility for caring for one another Novak s erudite argument and rigorous scholarship will appeal to all scholars and students engaged in the work of theology and bioethics

Decoding Language: Exploring the Foundations of Human Communication Pasquale De Marco, 2025-03-23 Language is a fundamental aspect of human existence It allows us to communicate our thoughts feelings and ideas with others and it shapes the way we perceive and understand the world around us In this comprehensive introduction to linguistics we will delve into the fascinating world of language and explore its many facets We will begin by examining the nature of language itself What is language and how does it differ from other forms of communication We will also explore the relationship between language and thought and how language shapes our perception of reality Next we will turn our attention to the history of linguistics We will trace the development of linguistic thought from the ancient Greeks to the present day and we will examine the major schools of linguistic thought that have emerged over time We will then embark on a detailed examination of the different components of language We will study the sounds of language and how they are produced and perceived We will also explore the structure of words and sentences and how they are used to convey meaning Furthermore we will investigate the fascinating world of language variation and change We will examine how languages differ from one another and how they change over time We will also discuss the factors that contribute to language variation and change such as geography social factors and technological advancements Finally we will look to the future of language We will explore how language is evolving in the digital age and how it is being used in new and innovative ways We will also consider the challenges that language faces in the 21st century such as globalization language loss and the rise of artificial intelligence *Decoding Language* is an essential resource for anyone interested in the study of language With its comprehensive coverage of the major topics in linguistics this book provides a solid foundation for further exploration of this fascinating field If you like this book write a review

Dialogues on Human Rights and Legal Pluralism René Provost, Colleen Sheppard, 2012-08-10 Human rights have transformed the way in which we conceive the place of the individual within the community and in relation to the state in a vast array of disciplines including law philosophy politics sociology geography The published output on human rights over the last five decades has been enormous but has remained tightly bound to a notion of human rights as dialectically linking the individual and the state Because of human rights dogged focus on the state and its actions they have very seldom attracted the attention of legal pluralists Indeed some may have viewed the two as simply incompatible or relating to wholly distinct phenomena This collection of essays is the first to bring together authors with established track records in the fields of legal

pluralism and human rights to explore the ways in which these concepts can be mutually reinforcing delegitimizing or competing The essays reveal that there is no facile conclusion to reach but that the question opens avenues which are likely to be mined for years to come by those interested in how human rights can affect the behaviour of individuals and institutions

Tools, Language and Cognition in Human Evolution Kathleen Rita Gibson, Tim Ingold, 1993 Looks at how humans have evolved complex behaviours such as language and culture

Seeing the Myth in Human Rights Jenna Reinbold, 2016-11-08 The 1948 Universal Declaration of Human Rights has been called one of the most powerful documents in human history Today the mere accusation of violations of the rights outlined in this document cowers political leaders and riles the international community Yet as a nonbinding document with no mechanism for enforcement it holds almost no legal authority Indeed since its adoption the Declaration's authority has been portrayed not as legal or political but as moral Rather than providing a set of rules to follow or laws to obey it represents a set of standards against which the world's societies are measured It has achieved a level of rhetorical power and influence unlike anything else in modern world politics becoming the foundational myth of the human rights project Seeing the Myth in Human Rights presents an interdisciplinary investigation into the role of mythmaking in the creation and propagation of the Universal Declaration Pushing beyond conventional understandings of myth which tend to view such narratives as vehicles either for the spreading of particular religious dogmas or for the spreading of erroneous even duplicitous discourses Jenna Reinbold mobilizes a robust body of scholarship within the field of religious studies to help us appreciate myth as a mode of human labor designed to generate meaning solidarity and order This usage does not merely parallel today's scholarship on myth it dovetails in unexpected ways with a burgeoning body of scholarship on the origin and function of contemporary human rights and it puts the field of religious studies into conversation with the fields of political philosophy critical legal studies and human rights historiography For Reinbold myth is a phenomenon that is not merely germane to the exploration of specific religious narratives but is key to a broader understanding of the nature of political authority in the modern world

Human Dignity and Democracy Michael H. Mitias, 2025-07-05 This book is a critical and constructive analysis of three challenging questions that continually hover on the rim of human consciousness What makes a life worth living How should I live love and die Under what conditions can I lead a life worth living First the author argues that leading a life of individuality is the essence of meaning the human heart craves second attainment of meaning is the source of hope courage and strength we need to grow and develop as human individuals and third living a meaningful life is the basis of the attempt to justify the worthwhileness of the life people lead A life poor in human meaning regardless of whether it is endowed with wealth pleasure knowledge fame or longevity is a life lived in the cellar of human existence Second the author argues that autonomy is the essence of human individuality and is the basis of human dignity The essential feature of dignity is respect By respect the author means preserving integrity and continually promoting the well being of the human individual The democratic state

is indispensable for the possibility of living in indignity because its building blocks are realized human values it is a human environment par excellence

A Society Fit for Human Beings E. M. Adams, 1997-10-31 A Society Fit for Human Beings contends that there is a profound incoherence in the foundations of modern Western civilization and that we are on a self-destructive course With the quest for wealth and power our dominant concern we find ourselves with a flourishing economy and a supreme military force based on science and technology but with our moral civic and religious culture undermined by our way of comprehending the world Our human identity is problematic the wells of meaning that nourish the human spirit are polluted or drying up and the social order is in disarray This situation E M Adams argues requires nothing less than a historic cultural revolution based on a shift in priorities from wealth and power to humanistic values those grounded in selfhood and lived experience that are essential for human growth meaningful lives and a healthy society Such a shift in our governing values would require a restructuring of our intellectual vision of humankind and the world in terms of humanistic categories those grounded in lived experience the categories of the humanities This book shows the import of such a humanistic cultural revolution for our human identity morality the social order and our major institutions including the family and community education the economy the government the military and religion It outlines how we can work toward such a cultural revolution and develop a constructive postmodern civilization with a society fit for human beings

Intangible Flow Theory in Economics Tiago Cardao-Pito, 2020-12-13 The dominant economic explanations of the 20th century are not comprehensive enough to describe the complexity of economy and society and their reliance on the biosphere Intangible Flow Theory in Economics Human Participation in Economic and Societal Production outlines a new theory that challenges both economics and the relativism conveyed in social constructivism poststructuralism and postmodernism To mainstream economics and Marxism monetary flows transform us humans into commodities To this new theory flows of economic elements as physical goods or money are consummated by intangible flows that cannot yet be precisely appraised at an actual or approximate value for instance workflows service flows information flows or communicational flows The theory suggests a systematic alternative to refute the human commodity framework and interrelated conjectures e g human capital human resources human assets Furthermore it exhibits that economic and societal production is fully integrated on the biosphere Conversely contemporary relativism argues for the end of theory development suspension of evidence and entrenchment of knowledge validity among local systems named as paradigms epistemes research programs truth regimes or other terms Thus relativism tacitly supports dominant theories as the human commodity framework because it preventively sabotages the creation of new theoretical explanations Disputing relativist theses intangible flow theory demonstrates that innovative theoretical explanations remain possible This book is of significant interest to students and scholars of political economy economic sociology organization economics and social theory

Religion and the Human Sciences Daniel A. Helminiak, 1998-04-23 Proposes a new paradigm for interdisciplinary studies by applying the thought of Bernard Lonergan to

define spirituality as the missing link between religion and theology The Human Species Armand Quatrefages de Bréau
