**Irian Jaya, the Land of Challenges and Promises** ,1987 *Faustus and the Promises of the New Science, c. 1580-1730* Christa King,2016-12-05 Having identified the literary origins of the Faustus legend in the German Faust Book

1587 and its English translation 1592 this book argues that these works transformed a simple rogue's tale into an incisive study of morality and beliefs. The chapbooks' contrastive portrayal of an imaginary experience of hell and a pseudo scientific journey through the cosmos is interpreted as an unconventional approach to the questions of an inquiring mind. This study offers the first analysis of the chapbooks as literary works in their own right as opposed to simply being sources for Christopher Marlowe's play. It is also the first study to describe the Faustus typology as a vehicle by which uncompromising thinkers of early modernity and the Enlightenment questioned contemporary views about religion, morality and the possibility of experiencing transcendence. While arguing that Marlowe's Doctor Faustus primarily examines the imaginary foundations of religious rules and standards, the author suggests that the 1616 version of the play revived the chapbooks' accounts of spiritual ravishment and intellectual ecstasy. Imaginary explorations of cosmic space became popular in the seventeenth century and gave rise to strongly diverging works of literature embracing the arcane spirituality of Milton's Paradise Lost as well as Fontenelle's sociable but essentially secular fantasy of cosmic travel. This book shows that contemporary responses to early modern science also tended to address the most urgent concerns of the Faustus legend, explaining the re-emergence of the typology in Mountfort's late seventeenth century farcical Faustus play and early eighteenth century harlequinades about Doctor Faustus.

This book explores the major scientific discoveries that have changed our understanding of the world, and it introduces the brilliant minds behind these discoveries. It also examines the role that science has played in society, both positive and negative, and it considers the challenges that science faces today. One of the most important things to understand about science is that it is a constantly evolving field. New discoveries are being made all the time, and our understanding of the world is constantly changing. This can be a daunting thought, but it is also what makes science so exciting. It is a field that is always pushing the boundaries of human knowledge, and it is a field that has the potential to solve some of the world's most pressing problems.
