*Signs of Reincarnation* James G. Matlock, 2019-06-15 *Signs of Reincarnation* provides the first comprehensive look at the belief in reincarnation and the evidence for past lives from historical records anthropological studies and contemporary research Matlock discusses various ways the evidence may be interpreted and shows that although reincarnation entails a rejection of the materialist notion that consciousness is generated by the brain it does not require the acceptance of any radically new concepts or the abandonment of well established findings in mainstream psychology or biology This book offers students scholars and anyone interested in the possibility of reincarnation an essential grounding in beliefs cases and theory while opening doors for future research into the extension of consciousness beyond our present lives

*Rebirth & Madness: Diseases of Consciousness* Jj Acolyte, 2012-07-06      Reincarnation and the Law of Karma William Walker Atkinson, 1908 By

Reincarnation we mean the repeated incarnation or embodiment in flesh of the soul or immaterial part of man s nature The term Metempsychosis is frequently employed in the same sense the definition of the latter term being The passage of the soul as an immortal essence at the death of the body into another living body The term Transmigration of Souls is sometimes employed the term being used in the sense of passing from one body into another But the term Transmigration is often used in connection with the belief of certain undeveloped races who held that the soul of men sometimes passed into the bodies of the lower animals as a punishment for their sins committed during the human life But this belief is held in disrepute by the adherents of Reincarnation or Metempsychosis and has no connection with their philosophy or beliefs the ideas having sprung from an entirely different source and having nothing in common There are many forms of belief many degrees of doctrine regarding Reincarnation as we shall see as we proceed but there is a fundamental and basic principle underlying all of the various shades of opinion and divisions of the schools This fundamental belief may be expressed as the doctrine that there is in man an immaterial Something called the soul spirit inner self or many other names which does not perish at the death or disintegration of the body but which persists as an entity and after a shorter or longer interval of rest reincarnates or is re born into a new body that of an unborn infant from whence it proceeds to live a new life in the body more or less unconscious of its past existences but containing within itself the essence or results of its past lives which experiences go to

make up its new character or personality It is usually held that the rebirth is governed by the law of attraction under one name or another and which law operates in accordance with strict justice in the direction of attracting the reincarnating soul to a body and conditions in accordance with the tendencies of the past life the parents also attracting to them a soul bound to them by some ties in the past the law being universal uniform and equitable to all concerned in the matter This is a general statement of the doctrine as it is generally held by the most intelligent of its adherents      **Perspectives on Reincarnation:**

**Evolution** Theophile Pascal, It is more than 1500 years since the decision of the Council of 543 a d condemned to oblivion sublime teachings which ought to have been carefully preserved and handed down to future generations as a beacon amid social reefs teachings that would have uprooted that frightful egoism which threatens to annihilate the world and instilled patience into the hearts of such as were being crushed beneath the wheel of the cosmic law by showing them the scales of Justice inclining to the side filled with their iniquities of bygone times teachings which would have been welcomed by the masses and the understanding of which would not have called for any lofty intellectual culture The key to the secret lies in Evolution which can be accomplished only by means of the continual return of souls to earth The subject will be divided into four chapters 1 The Soul and the bodies 2 Reincarnation and the moral law 3 Reincarnation and science 4 Reincarnation and the religious and philosophical consensus of the ages      Dreams of Power Peter Bishop, 1993 This book is an account of the

impact of Tibetan Buddhism upon the Western imagination Topics such as The Tibetan Book of the Dead spiritual science and sacred technology and the New Monasticism are discussed      *Religions of the World* J. Gordon Melton, Martin

Baumann, 2010-09-21 This masterful six volume encyclopedia provides comprehensive global coverage of religion emphasizing larger religious communities without neglecting the world's smaller religious outposts Religions of the World Second Edition A Comprehensive Encyclopedia of Beliefs and Practices is an extraordinary work bringing together the scholarship of some 225 experts from around the globe The encyclopedia's six volumes offer entries on every country of the world with particular emphasis on the larger nations as well as Indonesia and the Latin American countries that are traditionally given little attention in English language reference works Entries include profiles on religion in the world's smallest countries the Vatican and San Marino profiles on religion in recently established or disputed countries Kosovo and Nagorno Karabakh as well as profiles on religion in some of the world's most remote places Antarctica and Easter Island Religions of the World is unique in that it is based in religion on the ground tracing the development of each of the 16 major world religious traditions through its institutional expressions in the modern world its major geographical sites and its major celebrations Unlike other works the encyclopedia also covers the world of religious unbelief as expressed in atheism humanism and other traditions      *Humanity's Last Stand* Nicanor Perlas, 2018 The twenty first century is the age of science

and technology It will also be the age when humanity confronts for the first time a challenge that may overwhelm and destroy the human species itself in as little as 12 to 20 years from now This is the challenge of artificial intelligence AI Deployed properly AI will confer tremendous benefits to society It is already doing this Deployed inappropriately or mistakenly AI will undermine human civilization as it is also starting to do and could then lead to the extinction of humanity Scientists philosophers and engineers call this latter possibility the existential risk of AI The fate of our future is literally in our hands Nicanor Perlas from the preface Although still in its earliest stages artificial intelligence is radically transforming all aspects of society With the immanent emergence of Artificial Super Intelligence ASI and the illusory temptations of transhumanism humankind stands at a crossroads Nicanor Perlas makes an urgent plea in this book It is imperative he says that we take immediate steps to ensure that digitized technology is aligned to human values and priorities Otherwise ASI will kill the essence of our humanity Furthermore if we do not master it now ASI will transform humanity into its own image ultimately it will destroy the human race AI experts have not offered a single cogent solution to this existential threat Rudolf Steiner however not only foresaw these developments but also provided clear alternatives Steiner who developed a contemporary scientific approach to spirituality provided philosophical ontological and social innovations to save humanity from this technological abyss It is the task of the global anthroposophic movement to pioneer this civilization saving work to establish spiritual scientific ideas in mainstream culture that would allow AI to emerge in a healthier societal context Perlas offers an overview of the AI phenomenon together with its related transhuman concepts of perfecting humanity outlining the critical internal and external responses needed to meet them consciously In particular the author addresses the movement connected to the work of Rudolf Steiner indicating its all important tasks to cooperate with progressive individuals and movements including scientists and civil society activists to mobilize its daughter movements for action and ultimately to cooperate with the spiritual powers that have guided and served humanity since the dawn of time This says Perlas is humanity s last stand Failure is not an option

*Religion and Ecological Crisis* Todd LeVasseur, Anna Peterson, 2016-07-01 In 1967 Lynn White Jr's seminal article *The Historical Roots of Our Ecologic Crisis* was published essentially establishing the academic study of religion and nature. White argues that religions particularly Western Christianity are a major cause of worldwide ecological crises. He then asserts that if we are to halt let alone revert anthropogenic damages to the environment we need to radically transform religious cosmologies. White's hugely influential thesis has been cited thousands of times in a variety of disciplines including but not limited to religious studies environmental ethics history ecological science philosophy psychology and anthropology. In practical terms the ecological crisis to which White was responding has only worsened in the decades since the article was published. This collection of original essays by leading scholars in a variety of interdisciplinary settings including religion and nature environmental ethics animal studies ecofeminism restoration ecology and ecotheology considers the impact of White's arguments offering constructive criticism as well as reflections on the ongoing ever changing scholarly debate about the way religion and culture contribute to both environmental crises and to their possible solutions. *Religion and Ecological Crisis* addresses a wide range of topics related to White's thesis including its significance for environmental ethics and philosophy the response from conservative Christians and evangelicals its importance for Asian religious traditions ecofeminist interpretations of the article and which perspectives might have ultimately been left out of his analysis. This book is a timely reflection on the legacy and continuing challenge of White's influential article.

**Why Are We Conscious?** David E.H. Jones, 2017-07-20 There are two huge gaps in scientific theory. One the contradiction between classical and quantum mechanics is discussed in many publications. The other the total failure to explain why anything made of atoms such as ourselves can be conscious has little acknowledgement. The main thesis of this book is that to be conscious at all you need an unconscious mind. The author explores the idea that this mind sometimes makes contact with a whole unknown world sporadically revealed by paranormal effects but perhaps discoverable by hitherto uninvented scientific instruments. The book looks at the notion of the unconscious mind one of the most important hypotheses of the twentieth century. Psychiatrists often deploy it rather informally but there is no accepted theory of it. No region of the human brain seems to hold it. The author delves into the notion that the unknown world exists and is very weakly coupled to the physical world. He ponders the properties it may have to allow this coupling. Looks at several paranormal effects scientifically and points out that many of them seem to imply brief but dramatic changes of the forces between atoms a possible effect of the unknown world unexamined by physical science. No existing publication seeks to talk both about paranormal mysteries and scientific theory. If scientists know about the gaps in existing knowledge they might

initiate research into such gaps or notice experimental oddities they now gloss over If the general public was aware of the gaps in physical theory they would be less overwhelmed by the intellectual diktats of some scientists

**Religion and the Technological Future** Calvin Mercer, Tracy J. Trothen, 2021-02-22 We live in an age of rapid technological advancement Never before has humankind wielded so much power over our own biology Biohacking the attempt at human enhancement of physical cognitive affective moral and spiritual traits has become a global phenomenon This textbook introduces religious and ethical implications of biohacking artificial intelligence and other technological changes offering perspectives from monotheistic and karmic religions and applied ethics These technological breakthroughs are transforming our societies and ourselves fundamentally via genetic modification tissue engineering artificial intelligence robotics the merging of computer technology with human biology extended reality brain stimulation and nanotechnology The book also considers the extreme possibilities of mind uploading cryonics and superintelligence Chapters explore some of the political economic sociological and psychological dimensions of these advances with bibliographies for further study and questions for discussion The technological future is here and it is up to us to decide its moral and religious shape

The Boundless Circle Michael W. Fox, 1996 Veterinarian Dr Michael Fox examines religion s attitude especially Christianity toward the treatment of animals and nature Fox argues that the world s ecological salvation lies in embracing panentheism the seed idea within the mystical tradition of all major religions a philosophy which unlike pantheism states that it is not God that inhabits the world but the world that inhabits God
