Human Cloning Debate

Andrea Febrian

Human Cloning Debate:

The Human Cloning Debate Glenn McGee, 1998 One of the social issues that has excited the greatest interest and passion in recent years is that of cloning specifically human cloning Recent developments in biotechnology have brought that prospect closer and closer to realization and excited a lot of controversy over the ethics of such a procedure Would a human clone be a full person with full rights or merely a shadow of another person Will the technology give rise to abuses such as cloning people just to harvest their organs or to use as human slaves Is cloning tantamount to playing God and therefore inherently immoral This collection of essays by leaders in the fields of bioethics and philosophy seeks to answer these questions This is the first book of its kind edited by a recognized star in the bioethical field The essays discuss cloning from a wealth of perspectives scientific religious legal feminist and philosophical

The Therapeutic Cloning Debate Dr Eric A. Jensen, 2014-03-28 Exploring the controversy surrounding therapeutic human cloning this book draws upon data collected from news articles and interviews with journalists to examine the role of mass media in shaping biomedical controversies With specific reference to the US and the UK together with attention to the important role played by nations in Southeast Asia this book sheds light on media representations of scientific developments the unrealistic hype that can surround them the influence of religion and the potentially harmful imposition of journalistic and nationalist values on the scientific field

Perfect Copy Jonathan Agar, 2009-09-03 Cloning is some of the most exciting science and one of the most keenly fought moral debates of our time Perfect Copy is a uniquely accessible exploration this most vexed and pressing issue In 1997 Ian Wilmut and his team announced that they had done what many thought to be impossible They had cloned a mammal from an adult cell This breakthrough prompted immediate calls for the new technology of mammalian cloning to be used on humans Italian fertility specialist Severino Antinori hopes to use cloning within two years to give 200 infertile couples the opportunity to at last become parents Cloning may also solve once and for all the problem of rejection that bedevils transplant surgery Perhaps it even holds the promise of eternal life But plans to clone humans have triggered a storm of protest Scientists including Wilmut politicians from left and right and theologians from almost all religions find the idea abhorrent We cannot possibly decide who is right in this debate unless we have a good understanding of what a human clone is and how one would be created Nicholas Agar unravels the science and the ethics of cloning and begins to show how we should approach this fantastically problematic area

The Debate Over Human Cloning David Goodnough, 2003 Provides an overview of the technology and history of cloning and presents arguments for and against human cloning

Human Cloning James M. Humber, Robert Almeder, 1998-08-07 In Human Cloning a panel of distinguished philosophers medical ethicists religious thinkers and social critics tackle the thorny problems raised by the now real possibility of human cloning In their wide ranging reviews the distinguished contributors critically examine the major arguments for and against human cloning probe the implications of such a procedure for society and critically evaluate the Report and Recommendations of the National

Bioethics Advisory Commission The debate includes both religious and secular arguments as well as an outline of the history of the cloning debate and a discussion of human cloning's impact on our sense of self and our beliefs about the meaning of life

Human Dignity in the Biotech Century Charles W. Colson, Nigel M. de S. Cameron, 2004-07-07 Editors Charles W. Colson and Nigel M. de S. Cameron along with a panel of expert contributors address in twelve essays the watershed legal and ethical challenges before us in twenty-first century biotechnology: stem cell research, cloning, gene therapy, pharmacogenomics, cybernetics, abortion, and more

Human Cloning Tanya Samir Tarsha, 2003

Human Dignity and Human Cloning Silja Vöneky, Rüdiger Wolfrum, 2013-12-01

Human Dignity and Human Cloning contains contributions by philosophers, theologians, and lawyers on legal and ethical questions concerning the reproductive and therapeutic cloning of human beings. The main focus lies on the admissibility of cloning in German Constitutional law as well as in public international law. As these legal questions cannot be answered without taking account of the ethical discussion, the topic is analyzed from different cultural and religious viewpoints

The Human Embryonic Stem Cell Debate Suzanne Holland, Karen Lebacqz, Laurie Zoloth, 2001

Discusses the ethical issues involved in the use of human embryonic stem cells in regenerative medicine

The Human Embryo Research Debates Ronald M. Green, 2001-06-28

Research on the early human embryo has long been recognized as essential to progress in a host of biomedical areas, from reproductive medicine to the treatment of pediatric cancers. Now, with the possibility of stem cell research and cell replacement therapies, embryo research holds out the promise of cures for many serious disease conditions, such as diabetes and Alzheimer's disease. Despite its importance, however, human embryo research has met powerful opposition. Drawing on his experience as a member of the NIH's Human Embryo Research Panel, Green offers a first-hand account of the embryo research debates. In telling this story, he periodically pauses to reflect on some of the leading philosophical challenges posed by embryo research and new interventions at the start of life. Among the questions he examines are: What is the impact of new biological information on our thinking about life's beginning? May parents risk injuring a child in order to have it? What role should religion play in shaping biomedical policy in a controversial area like this? This is a fascinating insider's account of one of the most important if unsuccessful recent efforts to come to terms with a controversial area of scientific research

Cloning Louise I. Gerdes, 2006

Presents a collection of fourteen controversial essays that debate the issue of cloning and addresses topics such as whether or not cloning is ethical, embryonic stem cell bans, pet cloning, and cloning endangered species

Contested Cells: Global Perspectives On The Stem Cell Debate Benjamin J. Capps, Alastair V. Campbell, 2010-08-19

This book represents the coming together of a number of internationally renowned scholars from science, philosophy, law, and social science. Each author presents a distinctive and critical account of the current ethical, social, and jurisprudential issues concerning stem cell science, together covering both its research beginnings and the future translation into the clinical setting.
