Human Consciousness and Its Evolution Richard W. Coan, 1987-04-21

Human Consciousness and Its Evolution

Richard W. Coan, 2013-04-23 How has human consciousness evolved from its primitive origins and what course will it take in the future How should it develop in an individual from infancy and through childhood and the adult years Such questions have been the focus of many writers and many religious and philosophical traditions both Eastern and Western Most writers and traditions conceive of psychic evolution in terms of one universal pattern and the evolutionary goal considered by a given writer or tradition may be one of rationality love or transcendence of one's individual separateness The author contends that we may conceptualize the goal of psychic evolution in terms of any of five different modes of fulfillment We can recognize higher and lower levels of attainment in each of these modes Whatever mode an individual emphasizes it is easy to recognize a value in having access to other modes In the author's view we need to recognize alternative pathways of psychic evolution The pathways will differ with respect to the modes that are emphasized and the nature of the interplay of different modes

, 1988 **The Externalization of Consciousness and the Psychopathology of Everyday Life** Stephen DeBerry, 1991

DeBerry presents a new model of human consciousness and takes a penetrating look at the relationship of consciousness and technology Suggesting that we reintegrate the concept of consciousness into mainstream psychology he uses his model to explore the deleterious effects of the accelerated television video universe on the quality of our lives What role has technology played in the shifting of human consciousness to a predominantly impersonal dimension where only the material world matters Intended for courses in graduate psychology this volume's interdisciplinary perspective makes it equally relevant for courses in all social sciences **The British Library General Catalogue of Printed Books, 1986 to 1987**

British Library, 1988

The Psychology of Writing Alice Brand, 1989-06-15 This timely work provides a new perspective on the study of writing Alice Glarden Brand studies the affective aspects of writing writer's emotional arousal and processes Current work in the field is dominated by the cognitive view the intellectual process of writing Brand argues that to be complete theories of writing must include the affective component Apart from research on writer's block and apprehension almost no research addresses emotions in writing Empirical studies of five groups are presented in the book college writers advanced expository writers professional writers student poets and teachers of writing Examined are the intensity and frequency of 20 emotional states experienced while writing Representative case studies and writing samples enrich the reader's understanding of human feeling and written language The Psychology of Writing begins with personal accounts of the emotions of literary figures It then describes the affective bases of linguistic thought with background on English education and the cognitive model of writing A chapter is devoted to the psychology of emotion Next an operational

framework for the studies is outlined and the research program described The reports of the five writing populations are followed by the conclusion in which the results are summarized and research opportunities are proposed Educators psychologists and discourse specialists all those concerned with the serious study of writing will find The Psychology of Writing a significant work

Medieval Psychology Simon Kemp, 1990-06-26 This book describes the psychological ideas current in medieval Europe and their development during the period The book aims partly to correct misperceptions about the nature of psychology in the Middle Ages An important theme presented in this work is the surprising unity and coherence of medieval psychology Chapter 1 gives a brief historical background to the Middle Ages and outlines two major influences on medieval psychology Christian beliefs and the earlier views of classical philosophers and physicians Chapter 2 outlines medieval views on the nature of the soul and spirit particularly those views derived from Aristotle Chapter 3 deals with medieval theories of perception particularly visual perception while chapter 4 covers cognition and memory particularly the medieval doctrine of the inner senses according to which many cognitive functions were performed in the ventricles of the brain Chapter 5 considers and evaluates Thomas Aquinas account of emotion and will Chapters 2 through 5 consider psychological phenomena mainly discussed by medieval scholastics the phenomena in chapter 6 to 9 however were often discussed by people with a less philosophical approach Chapter 6 considers medieval accounts of individual differences in particular the doctrine of the humors and the influence of astrology Chapters 7 and 8 are concerned with widely different aspects of and approaches to mental disorder in the Middle Ages Chapter 9 briefly describes a few further aspects of medieval psychology and in the final chapter some conclusions are drawn This book is written for people with a general interest in medieval studies and will also appeal to historians of medieval psychology or medicine

From the Other Side of the Couch Chris E. Stout, 1993-07-30 What is it like to be a psychologist or a psychiatrist today Professionals with different kinds of practices and training from around the country talk candidly about their work the effect that clients have upon them and the various professional problems they face They discuss how they have been trained how they handle ethical questions and how they feel about the profession This short collection of interview material based upon a national survey provides a revealing and honest insider's view for clinicians counselors educators and all those interested or touched by the mental health profession

What Wrongdoers Deserve R. Murray Thomas, Ann Diver-Stamnes, 1993-07-30 This study analyzes the reasoning process through which individuals determine what consequences are appropriate for those who do wrong The authors presented six cases of wrongdoing to a large number of teenagers and young adults This sample was asked what consequences would be appropriate for the wrongdoers and why those proposed consequences would be appropriate On the basis of the data obtained from the participants the authors constructed a taxonomy to use in categorizing features of moral reasoning The authors then applied the taxonomy to compare group and individual modes of moral decision making The study is significant in its reliance on original data and on its analysis of the thought processes

involved in moral decision making **Using Bibliotherapy in Clinical Practice** John T. Pardeck, 1993-10-26 Pardeck provides mental health professionals with readily available information on self help books that can be effectively used with various clinical problems The materials presented can also be used by those not necessarily trained in clinical intervention this group would include parents teachers and librarians The approach offered bibliotherapy is an emerging clinical technique There are over 400 self help books presented and annotated that focus on chemical dependency coping with change family violence and dysfunctional families parenting personal growth serious illness social relationships and divorce and blended families **Encyclopedia of Psychology** Raymond J. Corsini, 1994 Includes entries on such topics as psychoanalysis assertiveness training neurotransmitters and small sample statistics *From AI to Zeitgeist* N H Pronko, 1988-01-26 This book is a reflection of a growing awareness among philosophers and psychologists of the inescapable entanglement of psychology with its philosophical underpinnings It deals with the dissection of the assumptions that control contemporary inquiry into psychological events and it offers a preliminary examination of the consequences for understanding behavior that different assumptions provide The broad scope of topics provides a number of bases from which to view problems and questions bearing on the philosophy of science for psychology Pronko examines how guiding postulates determine the outcome of inquiry raises new questions and new possibilities regarding old problems and stresses the importance of seeing known facts in a new light and describing new theories **Choice** ,1987 **Subject Guide to Books in Print** ,1997 *American Book Publishing Record* ,1987 **Inevitability** Leonard W. Doob, 1988-09-26 Doob s central thesis is that some beliefs function mainly to help the believer cope with life s uncertainties The coping mechanism that is the focus of Doob s book is a belief that certain things in life are inevitable Doob methodically explores the origin and nature of inevitability beliefs and like his pervious titles in social psychology this is a theoretical analysis The book is well written and carefully organized but demanding to read Doob attributes this to the inherent difficulty of the subject he is probably right Choice This book examines the ways in which human beings seek to cope with uncertainty by means of doctrines that postulate degrees of inevitability These doctrines originate in natural science social science philosophy and religion Their adequacies and inadequacies are carefully assessed with special reference to the ways in which they deal with intervention by the very persons who would reduce uncertainty The possibility of intervention in turn raises questions concerning freedom and responsibility that challenge people in all societies and throughout the lifespan Self-Representation Gary S. Gregg, 1991-10-30 This innovative work offers a new approach to the study of self representation drawing on both the older study of lives tradition in personality psychology and recent work in narrative psychology Gary S Gregg presents a generative theory of self representation applying methods of symbolic analysis developed by cultural anthropologists to the texts of life historical interviews This model accounts for the continual shifting of identity among contradictory surface discourses about the self as it shows how each discourse is defined as a reconfiguration of a stable cluster of deep structurally ambiguous

elements Gregg not only examines the nature of narrative but also addresses more mainstream issues in cognitive science such as How is knowledge of the self and its social world represented What are the elementary units of self cognition How are cognition and affect linked After a brief introduction the book raises critical questions about self representation by presenting re analyses of two famous case studies Freud s Rat Man and Mack and Larry from The Authoritarian Personality and initial observations from Gregg s fieldwork in Morocco A theoretical chapter then introduces the notion of structured ambiguity which enables a person to shift between identities by figure or ground like reversals of key symbols and metaphors Three original life narrative analyses follow which with increasing complexity develop the model via analogies to basic structures of tonal music The work concludes with a theoretical chapter that reexamines the ideas of William James George Herbert Mead and Erik Erikson about the self s unity and multiplicity and then summarizes a generative model The book presents a compelling alternative to prevailing views of self cognition and identity and will be a valuable resource for courses in psychology anthropology and sociology as well as an important tool for researchers and professionals in these fields
