Hammond, Thomas R. Stewart, 2001-09-20 Egon Brunswik is one of the most brilliant creative and least understood and appreciated psychologists philosophers of the 20th century This book presents a collection of Brunswik s most important papers together with interpretive comments by prominent scholars who explain the intent and development of his thought This collection and the accompanying diverse examples of the application of his ideas will encourage a deeper understanding of Brunswik in the 21st century than was the case in the 20th century The 21st century already shows signs of acceptance of Brunswikian thought with the appearance of psychologists with a different focus emulation of physical science is of less importance and positive contributions toward understanding behavior outside the laboratory without abandoning rigor are claiming more notice As a result Brunswik s theoretical and methodological views are already gaining the attention denied them in the 20th century

The plan of this book is to provide for the first time in one place the articles that show the origins of his thought with all their imaginative and creative spirit as well as thoughtful scholarly interpretations of the development meaning and application of his ideas to modern psychology Thus his views will become more understandable and more widely disseminated as well as advanced through the fresh meaning given to them by the psychologists of the 21st century

Social Judgement Theory Michael E. Doherty, 1996 This special issue of Thinking and Reasoning is devoted to social judgement theory SJT which has its origins in Egon Brunswik's probabilistic functionalism The first paper discusses the history and theory of SJT and explores Hammond's distinction between coherence and correspondence criteria The next paper presents the major methodological approaches of SJT with a focus on the Lens Model Four applications follow including an exploration of the medical applications of SJT

Studying Judgement Nigel Harvey, 2001 The papers in this Special Issue are derived from presentations at the 17th Conference on Subjective Probability Utility and Decision Making
