*Recording for the Blind & Dyslexic, ... Catalog of Books* ,1996      **Aging and Cognitive Processes** Fergus Craik,2012-12-06 For a variety of reasons there has been an explosion of interest in research on aging over the past few years The reasons include an awareness that a large and growing proportion of our population is over 65 and that research findings can contribute to their health satisfaction and efficiency as members of society the fact that funding agencies have endorsed the need for more research effort in the area by setting up special programs and also the fact that researchers themselves are turning more to practical problems as many theoretical issues in experimental psychology at least seem to remain as intractable as ever Thus at present there is widespread interest in aging but there is also a lack of knowledge as to what has already been accomplished in the area what the theoretical issues are and what factors contribute to the methodological and practical difficulties The time is propitious for meetings of experts in various aspects of the aging process both to discuss among themselves latest advances in the field and also to integrate known information for researchers and

practitioners In the summer of 1980 we organized such a meeting as the 10th annual psychology symposium to be held at the Erindale Campus of the University of Toronto The topic chosen was Aging and Cognitive Processes and the edited contributions to the symposium form the chapters of the present book *Becoming Aware* Velma Walker, Lynn Brokaw, 2004

Theories of Development William C. Crain, 2005 This engaging book written with the help of extensive scholarship and leading scholars introduces learners to twenty four different theorists and compares and contrasts their theories on how we develop as individuals Emphasizing the theories that follow and build upon the developmental tradition established by Rousseau this text also covers theories in the environmental learning tradition For individuals interested in the psychology of child development **Work Across the Lifespan** Boris Baltes, Cort W. Rudolph, Hannes Zacher, 2019-01-08 Work Across the Lifespan coalesces theoretical and empirical perspectives on aging and work This volume examines a collection of human development theories that explain trajectories of change including patterns of growth maintenance and decline across the adult lifespan At its core the lifespan perspective assumes a focus on aging as a continuous process of intraindividual change and goal based self regulation In this text the lifespan perspective serves as a lens for examining the complex relationship between aging and work Integrating research from the fields of developmental psychology as well as industrial work and organizational psychology this authoritative reference brings together the collective thinking of researchers who study work careers organizations and aging
