history of reincarnation theories across multiple fields of discourse in a pre American context ranging from early Greek traditions to Medieval Christian theories Renaissance esotericism and European Kabbalah all of which had adherents that brought those theories to America Rebirth theories are shown in all these groups to be highly complex and often disjunctive with mainstream religions even though members of conventional religions frequently affirm the possibility of rebirth As a history of an idea reincarnation theory is a current vital belief pattern that cuts across a wide spectrum of social cultural and scientific domains in a long complex history not reducible to any specific religious or theoretical explanation This book is cross disciplinary and multicultural linking religious studies perspectives with science based research it draws upon many distinct disciplines and avoids reduction of reincarnation to any specific theory The underlying thesis is to demonstrate the complexity of reincarnation theories what is unique is the historical overview and the gradual shift away from religious theories of rebirth to new theories that are therapeutic and trans traditional Divine Hunger Peggy Reeves

Mayalogue Victor Montejo, 2021-10-01 In *Mayalogue* Native Mayan scholar Victor Montejo provides an alternative reading and interpretation of cultures challenging Western ethnocentric approaches that have marginalized Native knowledge and worldviews in the past He proposes instead a methodology for studying culture as a unified whole a radical departure from the compartmentalized sections of knowledge recognized by Western scientific tradition Offering a strong critique of traditional anthropological studies with its terms and categories that have denigrated Indigenous cultures

throughout the centuries Montejo's postcolonial work aims to dismantle the colonialist construction of Indigenous cultures giving way to a Native approach that balances insider and outsider descriptions of a particular culture. Developed from an Indigenous Maya perspective, *Maya Dialogue* is a contribution to the dialogue between Indigenous and non-Indigenous scholars, students, and general audiences in the social sciences and humanities and will be an essential text in decolonizing the minds of those who engage in the study of cultures anywhere in the world in the twenty-first century.

Reason, Spirit and the Sacral in the New Enlightenment Anna-Teresa Tymieniecka, 2010-11-18. Rationality in its various expressions and innumerable applications sustains understanding and our sense of reality. It is traditionally differentiated according to its sources in the soul, in consciousness, in reason, in experience, and in elevation. Such a functional approach, however, leaves us searching for the common foundation, harmonizing these rationalities. The perennial quest to resolve the aporias of rationality is finding in contemporary science's focus on origins, on the generative roots of reality, tantalizing hints as to how this may be accomplished. This project is enhanced by the wave of recent phenomenology, *ontopoiesis* of life, which reveals the workings of the logos at the root of beingness and all rationality, whereby we gaze upon the prospect of a New Enlightenment. In the rays of this vision, the revival of the intuitions of classical Islamic metaphysics, particularly intuition of the continuity of beingness in the gradations of life, receive fresh confirmation.

Interdisciplinary and Religio-Cultural Discourses on a Spirit-Filled World V. Kärkkäinen, K. Kim, A. Yong, 2013-09-12. This volume presents interdisciplinary, intercultural, and interreligious approaches directed toward the articulation of a pneumatological theology in its broadest sense, especially in terms of attempting to conceive of a spirit-filled world.

A Buddhist Deception Ben Blijleven, 2024-07-23. Innumerable human beings have been lulled into and imprisoned by beliefs and dogmas and assumptions of religions, sects, false philosophies, and other world views by which they lose their striving and consequently the seeking, the intuiting, the investigating, and the evolving. Without any exception, though, only human beings who were unstable and are unstable fell for and fall for a belief and dogmas and assumptions of false philosophies, religions, and sects and world views. Nonetheless, however, the modern

times as well bring visible change with regard to the recognition of the truth The truly rational ones and the ones attempting to think logically those who are effectively searching for the truthful truth those who are willing to acknowledge and follow the Creational laws and recommendations they have become stronger and more in number despite of all mendacious and misleading sects religions false philosophies and other irrational world views The number of truthly truth seekers is growing and growing even though when they are being hounded by misguiding sects of all hues and from other false thinkers

The Epistemology of Spirit Beliefs Hans Van Eyghen, 2023-04-14 This book assesses whether belief in spirits is epistemically justified It presents two arguments in support of the existence of spirits and arguments that experiences of various sorts perceptions mediumship possession and animistic experiences can lend justification to spirit beliefs Most work in philosophy of religion exclusively

Nietzsche's Animal Philosophy Vanessa Lemm, 2009 This book explores the significance of human animality in the philosophy of Friedrich Nietzsche and provides the first systematic treatment of the animal theme in Nietzsche's corpus as a whole Lemm argues that the animal is neither a random theme nor a metaphorical device in Nietzsche's thought Instead it stands at the center of his renewal of the practice and meaning of philosophy itself Lemm provides an original contribution to ongoing debates on the essence of humanism and its future At the center of this new interpretation stands Nietzsche's thesis that animal life and its potential for truth history and morality depends on a continuous antagonism between forgetfulness animality and memory humanity This relationship accounts for the emergence of humanity out of animality as a function of the antagonism between civilization and culture By taking the antagonism of culture and civilization to be fundamental for Nietzsche's conception of humanity and its becoming Lemm gives a new entry point into the political significance of Nietzsche's thought The opposition between civilization and culture allows for the possibility that politics is more than a set of civilizational techniques that seek to manipulate dominate and exclude the animality of the human animal By seeing the deep seated connections of politics with culture Nietzsche orients politics beyond the domination over life and instead offers the animality of the human being a positive creative role in the organization of life Lemm's book presents Nietzsche as the thinker of an emancipatory and affirmative biopolitics This book will appeal not only to readers interested in Nietzsche but also to anyone interested in the theme of the animal in philosophy literature cultural studies and the arts as well as those interested in the relation between biological life and politics
