A Science-Theology Rapprochement Cyril Orji, 2018-10-12 This timely and fascinating work addresses questions of ultimate concerns for Christian believers by clarifying what religious believers statement God creates means in relation to the mechanistic determinism of science enthusiasts and the New Atheist Movement Drawing from the methodological works of C S Peirce Bernard Lonergan and Wolfhart Pannenberg the book creatively shows how the old science theology conflict or warfare can be turned into one of collaboration or rapprochement Using the works of these three thinkers it departs from the common practice of treating the field of science theology as an abstract mainstream theology The book takes a stand on contextual theology treating the problem posed by Richard Dawkins and his fellow New Atheists as one in need of a creative solution It also suggests that the dialogue between science and theology must take seriously the experiences and challenges from different social and cultural contexts The text shows how these experiences can lead to the kind of creative theological thinking we see in the works of Pannenberg and Lonergan who both explicate not only how an understanding of an evolutionary universe is compatible with the Christian doctrine of creation but also how a methodological comparison of science and theology reveals a common concern for human understanding and openness to divine agency

Nichols,2009-01-07 Explores the synthesis of contemporary science basic Thomistic philosophy and Christian theology Back cover *The Dialogical Spirit* Amos Yong,2014-10-22 Contemporary proposals for Christian theology from postliberalism to Radical Orthodoxy and beyond have espoused their own methodological paradigms Those who have ventured into this domain of theological method however have usually had to stake their claims vis a vis trends in what may be called the contemporary post al age whether of the postmodern post Christendom post Enlightenment post Western or postcolonial varieties This volume is unique among offerings in this arena in suggesting a way forward that engages on each of these fronts and does so from a particularistic Christian perspective without giving up on Christian theology s traditional claims to universality This is accomplished through the articulation of a distinctive dialogical methodology informed by both pentecostalism and evangelicalism one rooted in the Christian salvation history narrative of incarnation and Pentecost that is yet open to the world in its many and various cultural ethnic religious and disciplinary discourses Amos Yong here engages with twelve different interlocutors representing different ecumenical religious and disciplinary perspectives The Dialogical Spirit thus not only proffers a model for Christian theological method suitable for the twenty first century global context but also exemplifies this methodological approach through its interactions across the contemporary scholarly academic and theological landscape
