Fundamental Issues in Defense Training and Simulation George Galanis, Robert Sottolare, 2017-05-15 Defense forces have always invested a great deal of their resources in training In recent times changes in the complexity and intensity of operations have reaffirmed the importance of ensuring that warfighters are adequately prepared for the environments in which they are required to work The emergence of new operational drivers such as asymmetric threats urban operations joint and coalition operations and the widespread use of military communications and information technology networks has highlighted the importance of providing warfighters with the competencies required to act in a coordinated adaptable fashion and to make effective decisions in environments characterized by large amounts of sometimes ambiguous information While investment in new technologies can make available new opportunities for action it is only through effective training that personnel can be made ready to apply their tools in the most decisive and discriminating fashion There are many factors which can have an impact on the efficacy of training and many issues to consider when designing and implementing training strategies These issues are often complex and nuanced and in order to grasp them fully a significant investment of time and energy is required However the requirement to respond quickly to ever changing technology a high operational tempo and minimal staffing may preclude many in today's defense forces from seeking out all such resources on their own This edited collection provides brief easy to understand summaries of the key issues in defense training and simulation as well as guidance for further reading It consists of a collection of short essays each of which addresses a fundamental issue in defense training and simulation and features an up to date reference list to enable the reader to undertake further investigation of the issues addressed In essence this book provides the optimum starting point or first resource for readers to come to terms with the important issues associated with defense training and simulation The contributions are written by leading scholars from military research institutions in the US UK Canada Australia and New Zealand as well as selected researchers from academic and private sector research

institutions *Critical Thinking in Human Resource Development* Carole Elliott, Sharon Turnbull, 2004-08-02 The book will be of interest to student of human resource development human resource management and organisation and management studies It will also appeal to critically reflexive human resource practitioners seeking alternative ways to conceptualise their profession and to interpret the challenges they are facing in today s organisations Jacket *Wisdom and Management in the Knowledge Economy* David Rooney, Bernard McKenna, Peter Liesch, 2010-03-23 This book reinvigorates the use of wisdom in management and work practice promoting it as an important research topic and demonstrating how it can be applied across a number of important management areas such as knowledge innovation and strategy People and Organisational Development Helen Francis, Linda Holbeche, Martin Reddington, 2012-01-01 People and Organisational Development is ideal for both practitioners and students alike Setting out a new agenda for organisational effectiveness this book not only covers emergent theories of organisational development and human resources management it also gives practical examples for how these theories can be applied Covering everything from how HR can support strategic change and how technology can be an agent of transformation to performance management diversity talent management and emotion at work this book firmly places HR at the heart of a modern approach to OD Crucially People and Organisational Development doesn t just examine successful change initiatives it also covers the unsuccessful attempts at organisational change and what can be learnt from these There is also invaluable discussion of the OD role of HRD in ethics corporate social responsibility CSR and sustainability Packed with international case studies and examples this is essential reading for all those studying the CIPD Level 7 Advanced Organisation Design and Organisation Development module and everyone wanting to make a difference to the development of their people and their organisation Online supporting resources include additional case studies and practical tools Consulting in Uncertainty Ann Brooks, Kathy Edwards, 2013-11-07 The traditional model of consulting places an emphasis on diagnosing a problem and finding a cure But in today s business world of globalized organizations rapid knowledge proliferation and the intertwining of economies that approach is becoming less and less viable problems are quickly redefined new knowledge and ownership of that knowledge is constantly surfacing and being challenged and no solution is a permanent solution Consulting in Uncertainty articulates a model of consulting that addresses the uncertainty and interconnectedness of the world in a post industrial knowledge era Emphasizing outcomes and inquiry over diagnosis Brooks and Edwards outline this new consulting model as well as the skills consultants must bring to the table in any uncertain and dynamic environment Integrating practical knowledge with scholarship this book covers skills such as Relational skills and the consulting relationship Cultural awareness and related skills Contextual analysis Facilitating inquiry Collecting and efficiently analyzing data or information Consultants and students of consulting as well as managers teachers counselors and even parents will find this book enlightening and useful in navigating today s uncertain world
