Media Revolution in Europe Karol Jakubowicz, 2011-01-01 The rags to riches story of Karol Jakubowicz s involvement in the work of the Council of Europe took him from the role of an awestruck newcomer from Poland in 1990 to that of the Chairman of the Steering Committee on the Media and New Communication Services 2005 06 Along the way he was elected delegated by the Steering Committee and invited by the Council of Europe Secretariat to serve in a number of other capacities In all of them he contributed a wide variety of papers reports and studies to assist the steering committee and other bodies in collecting information and formulating ideas in the general field of freedom of expression creation of free and democratic media systems including the issue of public service media regulation of transfrontier television the adjustment of Council of Europe human rights standards to the conditions of the information society and the development of broadcasting legislation in Council of Europe member states The present collection of these papers and reports is published in the conviction that they retain their value and relevance It provides the additional benefit of offering a glimpse of the work preceding the formulation of Committee of Ministers recommendations and declarations as well as resolutions of the Council of Europe Parliamentary Assembly

Critical Issues in Human Rights and Development Marks, Stephen P., Rajagopal, Balakrishnan, 2021-11-09 This collection addresses human rights and development for researchers policymakers and activists at a time of major challenges Critical issues in the title signifies both the urgency of the issues and the need for critical rethinking After exploring the overarching issues of development and economic theory gender climate change and disability the book focuses on issues of technology and trade education and information water and sanitation and work health housing and food

Unimaginable Atrocities William

Schabas,2012-02-23 As international criminal justice has grown in prominence so have the challenges facing it This book discusses the unresolved questions and dilemmas confronted by international war crimes courts These include the controversies surrounding prosecutorial policy the tension between peace and justice and accusations of victor s justice

Unexpected Power Shareen Hertel,2018-07-05 U S human rights advocacy has long focused on civil and political rights issues such as torture censorship and lack of democratic freedoms abroad In the 1990s a series of high profile anti sweatshop and fair trade campaigns shifted the spotlight to labor issues But as human rights activists in the United States and elsewhere take up the cause of economic exploitation they don t always agree on the nature of the problem or on what should be done to address it What is more they do not necessarily have the final say in many cases the focus of a campaign will shift when local activists make their voices heard or when the imported aims of nongovernmental organizations conflict with the goals of the people they intend to help Shareen Hertel explores the dramatic negotiations within cross border human rights campaigns Activists on the receiving end of such campaigns do much more than seek the help of powerful allies beyond their borders They often also challenge outsiders understandings of basic human rights in some cases directly by blocking campaigns intended to help them and in other cases indirectly by employing backdoor moves aimed at more subtly introducing new human rights norms Hertel looks closely at struggles for human rights in two contexts Bangladesh where activists challenged the understanding of human rights central to an international campaign to prevent child labor in that country and Mexico where activists sought to broaden the scope of efforts to prevent discrimination against pregnant workers in their country Hertel connects these unexpected challenges to a new wave of international advocacy and thereby illuminates democratic struggles in the new global economy

Landscape Protection in International Law Amy Strecker,2018-08-23 Once the exclusive prerogative of domaine r serv landscape has gained increasing importance in international law in recent years Since the introduction of cultural landscapes within the UNESCO World Heritage Convention and particularly since the adoption of the European Landscape Convention ELC emphasis has shifted beyond a scenic preservationist approach towards a more dynamic human centred one The focus is not only on outstanding landscapes but also on the everyday and degraded landscapes where most people live and work Landscape is land shaped by people after all and its protection management and planning have a number of implications for democracy human rights and spatial justice Despite these links however there has been little legal scholarship on the topic How does international law which deals for the most part with universality deal with something so region specific and particular as landscape What is the legal conception of landscape and what are the various roles played by international law in its protection Amy Strecker assesses the institutional framework for landscape protection analyses the interplay between landscape and human rights and links the etymology and theory of landscape with its articulation in law

Environmental Principles and Policies Sharon Beder,2013-11-05 Environmental Principles and Policies uses environmental and social principles to analyse the latest wave

of economic based and market orientated environmental policies currently being adopted around the world This book provides an in depth examination of six key principles that have been incorporated into international treaties and the national laws of many countries ecological sustainability the polluter pays principle the precautionary principle equity human rights public participation These principles are then used to evaluate a range of policies including pollution charges emissions trading water markets biodiversity banks and tradable fishing rights Environmental Principles and Policies is easily accessible using non technical language throughout and in what sets it apart from other books on environmental policy making it takes a critical and interdisciplinary approach It does not set out policies in a descriptive or prescriptive way but analyses and evaluates policy options from a variety of perspectives This enables readers to gain a thorough grasp of important principles and current policies as well as demonstrating how principles can be used to critically assess environmental policies

Higher Education and International Capacity Building David Stephens, 2009-05-11 For the past 25 years UK Higher Education institutions have forged research and teaching partnerships with their counterparts overseas Many of these links were funded by the British Government and managed by the British Council s Higher Education Links Scheme This book takes an informed and critical look at issues and trends in global higher education over the past twenty five years with an in depth and often personal account of how these links were managed and led Ten experts representing a variety of disciplines from areas such as conserving the natural environment the promotion of human rights and education and gender present an insider s view of their link reflecting upon the successes and challenges in promoting research developing institutional capacity at home and abroad and the lessons they have learned This book will be of particular interest to those working in higher education and international development generally as well as students researchers and professionals engaged in bilateral and multi lateral development assistance programmes

The Globalization of International Law Paul Schiff Berman, 2017-07-05 International law is no longer a sufficient rubric to describe the complexities of law in an era of globalization Accordingly this collection situates cross border norm development at the intersection of interdisciplinary scholarship on comparative law conflict of laws civil procedure cyberlaw legal pluralism and the cultural analysis of law as well as traditional international law It provides a broad range of seminal articles on transnational law making governmental and non governmental networks judicial influence and cooperation across borders the dialectical relationships among national international and non state legal norms and the possibilities of bottom up and plural law making processes The introduction situates these articles within the framework of law and globalization and suggests four important ways in which such a framework enlarges the traditional focus of international law This book therefore provides a crucial reference for scholars and practitioners seeking to understand the varied processes of norm development in the emerging global legal order

Health Rights Thomas Pogge, 2017-05-15 Health Rights is a multidisciplinary collection of seminal papers examining ethical legal and empirical questions regarding the human right to health or health care The volume discusses what obligations health rights entail for governments and other actors how they relate to and potentially conflict with other rights and values and how cultural diversity bears on the formulation and implementation of health rights The paramount importance of such questions is illustrated among other things by the catastrophic health situation in developing countries and current debates about the TRIPS Agreement and health care reform in the United States The volume is divided into five main parts which focus on philosophical questions about the bases for the right to health or health care links between health and human rights global bioethics and public health ethics intellectual property rights in pharmaceuticals and finally health rights issues arising in specific contexts such as HIV AIDS tuberculosis and gender

Emerging Principles of International Environmental Law Sumudu Atapattu, 2007-04-30 Emerging Principles of International Environmental Law is ideally suited for any law or environmental studies student practitioner or law academic who is interested in the legal status of emerging principles in the field of international environmental law Among its highlights the text examines the interaction of principles concepts such as sustainable development the precautionary principle etc with one another and how the present international environmental law regime has taken the vast disparity between developed and developing countries into account in designing innovative methods to accommodate this disparity Following an introductory chapter on the development of international environmental law the book explores five concepts principles that have emerged in the recent years in this field and discusses their relationship to one another particularly how they interact and contribute to the achievement of sustainable development sustainable development the precautionary principle the environmental impact assessment process and participatory rights the common but differentiated responsibility principle and the polluter pays principle The final chapter evaluates the emergence of a distinct field of international law called International Sustainable Development Law and discusses its future direction While these principles or concepts have received much attention in previous literature not much attention has been paid to their interaction with one another and how the present international environmental law regime has taken the vast

disparity between developed and developing countries into account in designing innovative methods to accommodate this disparity. It is here the strength of the book lies. The book was written to provide a firm grasp of international environmental law issues and of international law in general. It is intended for the international market for anybody who is interested in the future direction of international environmental law and of sustainable development. As such it would be relevant not only to the law student and law academic but also to international organizations such as UNEP, Commission on Sustainable Development, UNDP and the World Bank as well as for international and national civil society groups engaged in environmental issues and human rights issues. Published under the Transnational Publishers imprint *Towards an Ethical Framework for Poverty reduction* , **Building Democratic Institutions** G. Shabbir Cheema, 2005. Annotation: Bridges the gap between theoretical literature and the tools and practices needed to strengthen or rebuild democratic institutions and reform governance systems. Through case studies and examples of good practices of governance, Cheema assesses the conditions that make democracy work **Developing a Normative Framework for the Protection of Internally Displaced Persons** Simon Bagshaw, 2021-10-01. The author presents a systematic review of the role of treaties in international law and seeks to demonstrate that their importance is today somewhat overstated given the extent to which States and other organizations tend to resort to more flexible means of standard setting in order to promote respect for human rights. As this text demonstrates, the collaboration of various governmental, intergovernmental and non-governmental representatives can result in an instrument which may be broader in scope and more progressive in content. If reinforced by suitable implementation measures, it can be even more effective than a treaty in regulating States' activities. Published under the Transnational Publishers imprint.
