recognizes no such internal sense His medieval Latin interpreters on the other hand very much thought that Aristotle did introduce a number of internal senses as shown in the second chapter The second part of the volume contains a number of case studies demonstrating the philosophical background of some of the most influential topics covered by the internal senses in the Aristotelian tradition and in contemporary philosophy of mind The focus of the case studies is on memory imagination and estimation Chapters introduce the underlying mechanisms of memory and recollection taking its cue from Aristotle but reaching into early modern philosophy as well as studying composite imagination in Avicenna's philosophy of mind Further topics include the Latin reception of Avicenna's estimative faculty and the development of the internal senses as well as offering an account of the logic of objects of imagination

*Ethics and the Beast* Tzachi Zamir, 2009-02-09 Many people think that animal liberation would require a fundamental transformation of basic beliefs We would have to give up speciesism and start viewing animals as our equals with rights and moral status And we would have to apply these beliefs in an all or nothing way But in *Ethics and the Beast* Tzachi Zamir makes the radical argument that animal liberation doesn't require such radical arguments and that liberation could be accomplished in a flexible and pragmatic way By making a case for liberation that is based primarily on common moral intuitions and beliefs and that therefore could attract wide understanding and support Zamir attempts to change the terms of the liberation debate Without defending it *Ethics and the Beast* claims that speciesism is fully compatible with liberation Even if we believe that we should favor humans when there is a pressing human need at stake Zamir argues that does not mean that we should allow marginal human interests to trump the life or death interests of animals As minimalist as it sounds this position generates a robust liberation program including commitments not to eat

animals subject them to factory farming or use them in medical research Zamir also applies his arguments to some questions that tend to be overlooked in the liberation debate such as whether using animals can be distinguished from exploiting them whether liberationists should be moral vegetarians or vegans and whether using animals for therapeutic purposes is morally blameless
