second and early third centuries C E the resurrection became a central question for intellectual commentary with increasingly tense divisions between those who interpreted the resurrection as a bodily experience and those who did not. The relationship between the resurrected person and their mortal flesh was also a key point of discussion especially in regards to sexual desires body parts and practices. Early Christians struggled to articulate how and why these bodily features related to the imagined resurrected self. The problems posed by the resurrection thus provoked theological analysis of the mortal body sexual desire and gender. Resurrecting Parts is the first study to examine the place of gender and sexuality in early Christian debates on the nature of resurrection investigating how the resurrected body has been interpreted by writers of this period in order to address the nature of sexuality and sexual difference. In particular Petrey considers the instability of early Christian attempts to separate maleness and femaleness. Bodily parts commonly signified sexual difference yet it was widely thought that future resurrected bodies would not experience desire or reproduction. In the absence of sexuality this insistence on difference became difficult to maintain. To achieve a common shared identity and status for the resurrected body that nevertheless preserved sexual difference treatises on the resurrection found it necessary to explain how and in what way these parts would be transformed in the resurrection shedding all associations with sexual desires acts and reproduction. Exploring a range of early Christian sources from the Greek and Latin fathers to the authors of the Nag Hammadi writings Resurrecting Parts is a fascinating resource for scholars interested in gender and sexuality in classical antiquity early Christianity asceticism and of course the resurrection and the body.

An Introduction to Clinical Neuroendocrinology E. Bajusz, 1967-01-12 Substance and Seduction Stacey Schwartzkopf, Kathryn E.

Sampeck, 2017-11-08. Chocolate and sugar alcohol and tobacco peyote and hallucinogenic mushrooms these seductive substances have been a nexus of desire for both pleasure and profit in Mesoamerica since colonial times. But how did these substances seduce? And when and how did they come to be desired and then demanded even by those who had never encountered them before? The contributors to this volume explore these questions across a range of times places and peoples to discover how the individual pleasures of consumption were shaped by social cultural economic and political forces. Focusing on ingestible substances as a group which has not been done before in the scholarly literature the chapters in Substance and Seduction trace three key links between colonization and commodification. First as substances that were taken into the bodies of both colonizers and colonized these foods and drugs participated in unexpected connections among sites of production and consumption racial and ethnic categories and free forced and enslaved labor regimes. Second as commodities developed in the long transition from mercantile to modern capitalism each substance in some way drew its enduring power from its ability to seduce to stimulate bodies to alter minds to mark class social and ethnic boundaries and to generate wealth. Finally as objects of scholarly inquiry each substance rewards interdisciplinary approaches that balance the considerations of pleasure and profit materiality and morality and culture and political economy.
