Knowing Body

Ronald J. Pelias

Knowing Body:

The Knowing Body Louise Steinman, 1995-11-29 Steinman's book really stands alone among performance art books. While there are many that document what particular artists are doing, this one offers a way in for a person who wants to perform or know more about how performance artists work. Must reading for anyone interested in performance art; it will also be fascinating to those in theatre, playwriting, visual arts, and performance of any sort. **Knowing Body, Moving Mind**

Patricia Q. Campbell, 2011-09-02 **Knowing Body Moving Mind** investigates ritualizing and learning in introductory meditation classes at two Buddhist centers in Toronto, Canada. Inspired by theories that suggest that rituals impart new knowledge or understanding, Patricia Campbell examines how introductory meditation students learn through formal Buddhist practice.

Writing Performance, Identity, and Everyday Life Ronald J. Pelias, 2018-03-13 **Writing Performance Identity and Everyday Life** invites the reader into Ronald J. Pelias's world of artistic and everyday performance. Calling upon a broad range of qualitative methods, these selected writings from Pelias submerge themselves in the evocative and embodied in the material and consequential, often creating moving accounts of their topics. The book is divided into four sections: Foundational Logics, Performance Identity, and Everyday Life. Part I addresses the methodological underpinnings of the book, focusing on the touchstones that inform Pelias's work: performative, autoethnographic, poetic, and narrative methods. These directions push the researcher toward empathic engagement, a leaning toward others using the literary to evoke the cognitive and affective aspects of experience and an ethical sensibility located in social justice. Parts II-IV focus on artistic and everyday life performances, including discussions of the disciplinary shift from the oral interpretation of literature to the field of performance studies, empathy and the actor's process, conceptions of performance, the performance of race, gender, and sexuality, and performances in interpersonal relations and academic circles. By the end, readers will see Pelias demonstrate the power of qualitative methods to engage and to present alternative ways of being. Pelias's work shows us how to understand and feel the evocative strength of thinking performatively. **Galileo's Pendulum** Dusan I. Bjelic, 2003-10-09 Examines the history of science in light of recent theories of sexuality and the body.

Knowing without Thinking Z. Radman, 2012-02-14 A volume devoted explicitly to the subtle and multidimensional phenomenon of background knowing that has to be recognized as an important element of the triad mind-body-world. The essays are inspired by seminal works on the topic by Searle and Dreyfus but also make significant contribution in bringing the discussion beyond the classical confines.

Transpersonal Knowing Tobin Hart, Peter L. Nelson, Kaisa Puhakka, 2000-07-20 Offering the perspectives of some of the most respected thinkers in transpersonal psychology and consciousness studies, this book explores the farther reaches of knowing both ourselves and the world described here as transpersonal, post-conventional, or spiritual. The contributors' work is presented from their own authentic knowing, whether through personal narrative or through conceptualization informed by such knowing. They explore what knowledge can consist of as it stretches beyond conventional, objective observation and

analysis Contributors include Arthur Deikman Jorge Ferrer Fred J Hanna Tobin Hart Zia Inyhat Khan Peter L Nelson Kaisa Puhakka Donald Rothberg Jenny Wade Michael Washburn and John Welwood Rethinking Technologies Verena Andermatt Conley,1993 Grounded on the assumption that the relationship between the arts and the sciences is dictated by technology the essays in *Rethinking Technologies* explore trends in contemporary thought that have been changing our awareness of science technology and the arts *Food Philosophy* David M. Kaplan,2019-11-19 Food is a challenging subject There is little consensus about how and what we should produce and consume It is not even clear what food is or whether people have similar experiences of it On one hand food is recognized as a basic need if not a basic right On the other hand it is hard to generalize about it given the wide range of practices and cuisines and the even wider range of tastes This book is an introduction to the philosophical dimensions of food David M Kaplan examines the nature and meaning of food how we experience it the social role it plays its moral and political dimensions and how we judge it to be delicious or awful He shows how the different branches of philosophy contribute to a broader understanding of food what food is metaphysics how we experience food epistemology what taste in food is aesthetics how we should make and eat food ethics how governments should regulate food political philosophy and why food matters to us existentialism Kaplan embarks on a series of philosophical investigations considering topics such as culinary identity and authenticity tasting and food criticism appetite and disgust meat eating and techno foods and consumerism and conformity He emphasizes how different narratives help us navigate the complex world of food and reminds us we all have responsibilities to ourselves to others and to animals An original treatment of a timely subject *Food Philosophy* is suitable for undergraduates while making a significant contribution to scholarly debates Doing Sensory Ethnography Sarah Pink,2015-02-09 This bold agenda setting title continues to spearhead interdisciplinary multisensory research into experience knowledge and practice Drawing on an explosion of new cutting edge research Sarah Pink uses real world examples to bring this innovative area of study to life She encourages us to challenge revise and rethink core components of ethnography including interviews participant observation and doing research in a digital world The book provides an important framework for thinking about sensory ethnography stressing the numerous ways that smell taste touch and vision can be interconnected and interrelated within research Bursting with practical advice on how to effectively conduct and share sensory ethnography this is an important original book relevant to all branches of social sciences and humanities *Embodied Performances* B. Allegranti,2011-06-21 With a companion website that includes short online film episodes this book proposes expansive ways of deconstructing and re constituting sexuality and gender and thus more embodied and ethical ways of doing life and offers an understanding and critique of embodiment through an integration of performance psychotherapy and feminist philosophy **The Blazing World and Other Writings** Margaret Cavendish,2025-06-06 I had rather die in the adventure of noble achievements than live in obscure and sluggish security One of the most diverse prolific and maverick intellectuals of her time Margaret Cavendish is

known for critiquing a wide range of early modern cultural and philosophical beliefs While she was the first British woman to publish several philosophical treatises she was also profoundly interested in literature and writing in nearly every available genre indeed with her wide ranging complex and often unorthodox ideas she was a pioneer of what today would be referred to as science fiction In this edition Lisa Walters brings together well known and popular works such as *The Blazing World* alongside lesser known poems and prose pieces like *The Ambitious Traitor* and *The Unnatural Tragedy* The introduction discusses the wide ranging concepts that appear in the writings from gender and cross dressing to science and the nature of the universe and provides a fresh insight on Cavendish's proclivity for literary experimentation and innovation

The Princeton Review, 1881 **The Materiality of Stone** Christopher Tilley, 2020-06-03 With Wayne Bennett From the silky wax qualities of the surfaces of some quartz menhirs to the wood grain textures of others to the golden honeycombed limestones of Malta to the icy frozen waves of the Cambrian sandstone of south east Sweden this book investigates the sensuous material qualities of stone Tactile sensations sonorous qualities colour and visual impressions are all shown to play a vital part in our understanding of the power and significance of prehistoric monuments in relation to their landscapes In *The Materiality of Stone* Christopher Tilley presents a radically new way of analyzing the significance of both cultural and natural stone in prehistoric European landscapes Tilley's groundbreaking approach is to interpret human experience in a multidimensional and sensuous human way rather than through an abstract analytical gaze The studies range widely from the menhirs of prehistoric Brittany to Maltese Neolithic temples to Bronze Age rock carvings and cairns in southern Sweden Tilley leaves no stone unturned as he also considers how the internal spaces and landscape settings are interpreted in relation to artifacts substances and related places that were deeply meaningful to the people who inhabited them and remain no less evocative today In its innovative approach to understanding human experience through the tangible rocks and stone of our past *The Materiality of Stone* is both a major theoretical and substantive contribution to the field of material culture studies and the study of European prehistory

The Empathic Screen Vittorio Gallese, Michele Guerra, 2019-10-02 Why do people go to the movies What does it mean to watch a movie To what extent is the perceived fictional nature of movies different from our daily perception of the real world We live in a time where the power of images has strongly invaded our everyday life and we need new instruments and methods to better understand our relationship with the virtual worlds we inhabit every day Taking cinema as the beginning of our relationship with the world of moving images and cognitive neuroscience as a paradigm to understand how the images engage us *The Empathic Screen* develops a new theory of film experience exploring our brain body interaction when engaging with and watching a film In this book film theory and neuroscience meet to shed new light on cinema masterpieces such as *The Shining* *The Silence of the Lambs* and *Toy Story* and explore the great directors from the classical period to the present Taking a radical new approach to understanding the cinema the book will be fascinating reading for cognitive scientists neuroscientists psychologists philosophers and film and

media scholars **The Art and Science of Dance/Movement Therapy** Sharon Chaiklin, Hilda Wengrower, 2009-07-28 The Art and Science of Dance Movement Therapy offers both a broad understanding and an in depth view of how and where dance therapy can be used to produce change The chapters go beyond the basics that characterize much of the literature on dance movement therapy and each of the topics covered offers a theoretical perspective followed by case studies that emphasize the techniques used in the varied settings Several different theoretical points of view are presented in the chapters illuminating the different paths through which dance can be approached in therapy Bodies in Early Modern Religious Dissent Elisabeth Fischer, Xenia von Tippelskirch, 2021-05-30 In early modern times religious affiliation was often communicated through bodily practices Despite various attempts at definition these practices remained extremely fluid and lent themselves to individual appropriation and to evasion of church and state control Because bodily practices prompted much debate they serve as a useful starting point for examining denominational divisions allowing scholars to explore the actions of smaller and more radical divergent groups The focus on bodies and conflicts over bodily practices are the starting point for the contributors to this volume who depart from established national and denominational historiographies to probe the often ambiguous phenomena occurring at the interstices of confessional boundaries In this way the authors examine a variety of religious living conditions socio cultural groups and spiritual networks of early modern Europe and the Americas The cases gathered here skillfully demonstrate the diverse ways in which regional and local differences affected the interpretation of bodily signs This book will appeal to scholars and students of early modern Europe and the Americas as well as those interested in religious and gender history and the history of dissent *Early Modern Philosophy* Lisa Shapiro, Marcy P. Lascano, 2021-08-25 This new anthology of early modern philosophy enriches the possibilities for teaching this period by highlighting not only metaphysics and epistemology but also new themes such as virtue equality and difference education the passions and love It contains the works of 43 philosophers including traditionally taught figures such as Descartes Spinoza Leibniz Locke Berkeley Hume Kant as well as less familiar writers such as Lord Shaftesbury Anton Amo Julien Offray de La Mettrie and Denis Diderot It also highlights the contributions of women philosophers including Margaret Cavendish Anne Conway Gabrielle Suchon Sor Juana In z de la Cruz and Emilie Du Ch telet **Ethics Embodied** Erin McCarthy, 2010-07-17 While the body has been largely neglected in much of traditional Western philosophy there is a rich tradition of Japanese philosophy in which this is not the case Ethics Embodied explains how Japanese philosophy includes the body as an integral part of selfhood and ethics and shows how it provides an alternative and challenge to the traditional Western philosophical view of self and ethics Through a comparative feminist approach the book articulates the striking similarities that exist between certain strands of Japanese philosophy and feminist philosophy concerning selfhood ethics and the body Despite the similarities McCarthy argues that there are significant differences between these philosophies and that each reveals important limitations of the other Thus the book urges a view of ethical embodied selfhood that goes beyond

where each of these views leaves us when considered in isolation With keen analysis and constructive comparison this book will be accessible for students and scholars familiar with the Western philosophical tradition while still adding a more global perspective The Description of a New World, Called the Blazing-World Margaret Cavendish Newcastle,2020-03-06 The Description of a New World Called The Blazing World better known as The Blazing World is a 1666 work of prose fiction by the English writer Margaret Cavendish the Duchess of Newcastle Feminist critic Dale Spender calls it a forerunner of science fiction It can also be read as a utopian work As its full title suggests Blazing World is a fanciful depiction of a satirical utopian kingdom in another world with different stars in the sky that can be reached via the North Pole It is the only known work of utopian fiction by a woman in the 17th century as well as an example of what we now call proto science fiction although it is also a romance an adventure story and even autobiography A young woman enters this other world becomes the empress of a society composed of various species of talking animals and organizes an invasion back into her world complete with submarines towed by the fish men and the dropping of fire stones by the bird men to confound the enemies of her homeland the Kingdom of Esfi *The Banting Solution* Bernadine Douglas,2016-08-01 The Banting book everyone has been waiting for At last a definitive book on Banting that will answer ALL your questions about the Banting lifestyle AND provide you with the solution to permanent weight loss The Banting Solution not only explains what Banting is all about but also answers Banters most pressing questions busts the myths that have cropped up around Banting provides helpful meal plans and Banting friendly food lists offers tips on how to avoid weight loss stalls helps you to understand food labels and teaches you how to Bant on a budget making this lifestyle accessible to everyone Most importantly it teaches you how to get rid of those unwanted kilos and keep them off forever With solid research supported by actual case studies and before and after photographs you will now be able to access all the information you need about Banting in just one book
