Knowledge modeling and expertise transfer. Proceedings of the International Conference ; 1 ,1991 Visual Knowledge Modeling for Semantic Web Technologies: Models and Ontologies Paquette, Gilbert,2010-06-30 This book addresses how we can make the Web more useful more intelligent more knowledge intensive to fulfill our more and more demanding learning and working needs It is based on the premise that representing knowledge visually is key for individuals and organizations to enable useful access to the knowledge era Provided by publisher **Knowledge Modeling & Expertise Transfer D.**

Herin-Aime,1991 The Knowledge Acquisition and Representation Language, KARL Dieter Fensel,2012-12-06 Within the framework of so called second generation expert systems 62 knowledge modeling is one of the most important aspects On the one hand knowledge acquisition is no longer seen as a knowledge transfer process rather it is now considered as model construction process which is typically a cyclic and error prone process On the other hand the distinction between knowledge and symbol level descriptions 166 resulted in various proposals for conceptual knowledge models describing knowledge in an implementation independent way One of the most prominent examples of such a conceptual model is the KADS model of expertise which is characterized by its clear distinction of different knowledge types and by the usage of specific modeling primitives to describe these different knowledge types 185 The semi formal KADS expertise model entails all the advantages and disadvantages which have been identified for semi formal system models e g in the software engineering community

Knowledge-Based Systems, Four-Volume Set Cornelius T. Leondes,2000-07-11 The design of knowledge systems is finding myriad applications from corporate databases to general decision support in areas as diverse as engineering manufacturing and other industrial processes medicine business and economics In engineering for example knowledge bases can be utilized for reliable electric power system operation In medicine they support complex diagnoses while in business they inform the process of strategic planning Programmed securities trading and the defeat of chess champion Kasparov by IBM s Big Blue are two familiar examples of dedicated knowledge bases in combination with an expert system for decision making With volumes covering Implementation Optimization Computer Techniques and Systems and Applications this comprehensive set constitutes a unique reference source for students practitioners and researchers in computer science engineering and the broad range of applications areas for knowledge based systems **Information Modelling and Knowledge Bases IX** P. J. Charrell,H. Jaakkola,H. Kangassalo,1998 Information modelling is the essential part of information system design Design methods specification languages and tools tend to become application dependent aiming at integration of methodologies stretching traditional database design to advanced knowledge bases and including use of logical languages and process oriented system description The topics of the articles in this book cover a wide variety of themes in the domain of information modelling specifications of information systems and knowledge bases ranging from foundations and theories to systems construction and application studies The contributions represent the following major themes the use

of ontologies in knowledge modelling concept modelling and conceptual modelling database modelling applications of object oriented modelling view integration and consistency checking modelling multimedia and multimedia models design methods process modelling formal systems *Second Generation Expert Systems* Jean-Marc David, Jean-Paul Krivine, Reid Simmons, 2012-12-06 Second Generation Expert Systems have been a very active field of research during the last years Much work has been carried out to overcome drawbacks of first generation expert systems This book presents an overview and new contributions from people who have played a major role in this evolution It is divided in several sections that cover the main topics of the subject Combining Multiple Reasoning Paradigms Knowledge Level Modelling Knowledge Acquisition in Second Generation Expert Systems Explanation of Reasoning Architectures for Second Generation Expert Systems This book can serve as a reference book for researchers and students and will also be an invaluable help for practitioners involved in KBS developments **Systems Approaches to Knowledge Management, Transfer, and Resource Development** Lee, W.B., 2012-06-30 The world is moving into a new era of the knowledge economy In the past decade the significance of developing knowledge has grown to a level where it is now dominating other socio economic factors Systems Approaches to Knowledge Management Transfer and Resource Development provides a new view of knowledge management through the lens of systems approach which looks at each part of the knowledge management system as a section of the full overview This cutting edge resource will be essential for academicians scientists practitioners and industry professionals as all of these individuals work toward a new understanding of knowledge and information management practices in the 21st century

Reusable Components for Knowledge Modelling Enrico Motta, E. Motta, 1999 **Information Modelling and Knowledge Bases VIII** H. Kangassalo, 1997 Information modelling is the essential part of information systems design Design methods specification languages and tools tend to become application dependent aiming at integration of methodologies stretching from traditional database design to knowledge bases and including use of logical languages and process oriented reactive systems description The topics of the articles cover a wide variety of problems in the area of information modelling information systems specification and knowledge bases ranging from foundations and theories to systems construction and application studies The contributions are grouped into the following major categories Systems specification and information modelling schemes User interfaces and multimedia Knowledge organization database structuring Formal systems Knowledge and information From conceptual modelling to software engineering Description and organization of concepts and objects Learning systems and applications This book is the eighth volume in the sub series Information Modelling and Knowledge Bases This dates back to 1990 with annual publications now amounting to more than 200 reviewed articles The current volume is intended for researchers students and practitioners in the area of information systems *Computational Intelligence for Decision Support* Zhengxin Chen, 1999-11-24 Intelligent decision support relies on techniques from a variety of disciplines including artificial intelligence and database management systems Most of the existing literature neglects the

relationship between these disciplines By integrating AI and DBMS Computational Intelligence for Decision Support produces what other texts don't an explanation of how to use AI and DBMS together to achieve high level decision making Threading relevant disciplines from both science and industry the author approaches computational intelligence as the science developed for decision support The use of computational intelligence for reasoning and DBMS for retrieval brings about a more active role for computational intelligence in decision support and merges computational intelligence and DBMS The introductory chapter on technical aspects makes the material accessible with or without a decision support background The examples illustrate the large number of applications and an annotated bibliography allows you to easily delve into subjects of greater interest The integrated perspective creates a book that is all at once technical comprehensible and usable Now more than ever it is important for science and business workers to creatively combine their knowledge to generate effective fruitful decision support Computational Intelligence for Decision Support makes this task manageable

This book assesses the state of nanotechnology and microelectronics and examines many issues such as climate change trade innovation diffusion etc with a theme focused on facilitating the structures for the adoption and penetration of the

technologies into developing nations Provided by publisher **Current Trends in Knowledge Acquisition** Bob Wielinga, 1990 Knowledge acquisition has become a major area of artificial intelligence and cognitive science research The papers in this book show that the area of knowledge acquisition for knowledge based systems is still a diverse field in which a large number of research topics are being addressed However several main themes run through the papers First the issues of integrating knowledge from different sources and K A tools is a salient topic in many papers A second major topic in the papers is that of knowledge modelling Research in knowledge based systems emphasises the use of generic models of reasoning and its underlying knowledge An important trend in the area of knowledge modelling aims at the formalisation of knowledge models Where the field of knowledge acquisition was without tools and techniques years ago now there is a rapidly growing body of techniques and tools Apart from the integrated workbenches already mentioned above several papers in this book present new tools Although knowledge acquisition and machine learning have been considered as separate subfields of AI there is a tendency for the two fields to come together This publication combines machine learning techniques with more conventional knowledge elicitation techniques A framework is presented in which reasoning problem solving and learning together form a knowledge intensive system that can acquire knowledge from its own experience

Strategic Knowledge Management Technology Petter Gottschalk, 2005 Strategic Knowledge Management Technology applies the knowledge based view of the firm which builds on the resource based theory The value shop is identified as the typical value configuration for knowledge firms This book applies stages of growth model for knowledge management technology where firms develop from the person to tools strategy via the person to person strategy and the person to
