Knowledge Management Praxis:

Knowledge Management Praxis Kurt April, Farzad Ahmadi Izadi, Farzad Ahmadi, 2004-02 A pragmatic approach to knowledge management that integrates normative strategic and operational considerations is presented in this introduction to applying knowledge management theory in business Best practices and sound praxis from international organizations provide strategic drivers measurements and baselines for identifying relevant knowledge and information Emphasis is placed on creating a comprehensive shared language of knowledge management that is accessible to junior middle and senior managers translating theory into simple implementation steps and providing a framework for embedding knowledge management into organizations **Knowledge Management Praxis**, 2004 [Internet Guide to Knowledge Management and Intellectual Capital](#) Sabine Pekarz, 2002-03-07 Inhaltsangabe Abstract This survey has shown that although the internet is full of information it is difficult to find the information required fast Before starting an internet survey it is essential to be conscious of the intention of the search and the expected results and to translate this into one or more keywords The intention of the keyword searches knowledge management and intellectual capital was to find out how the topic is treated on different pages The categorization by content has shown that a main part of the links can be assigned in the advertisement categories This is the case for both the hits of MetaCrawler and those of Umap A further community of the results of the two search instruments is that the categories knowledge base and best practices only take a small part whereas the categories content discussion and collection of resources are relatively well attended Great importance has been attached to the category content discussion in the index and chapter 6 is fully dedicated to interesting links concerning the content This is because the discussion of the topics combined with definitions and explanations is the background and the basis for the rest of the categories As the assignment to the category content discussion does not declare anything about the quality of the discussions the index in chapter 4 has to be included in the study Strictly speaking a great part of those links is dedicated to advertisement and gives some explanations concerning the topics It has been detected that most of the pages with content discussion give only a short introduction into the topic The pages that examine the topics more closely are an exception to the rule Five links of this minority are introduced in chapter 6 Two of them are very interesting pages concerning the content They are listed at top position because different opinions concerning knowledge management and intellectual capital are introduced the topics are treated in great detail and the explanations are good and quite easy to duplicate In order to find out if the results are capable to represent the totality the reliability of the categorization built up with Umap artificial intelligence and that built by human intelligence have been analyzed with the means of hypotheses The test of the hypotheses that are based on a comparison of the results and processes of the categorizations has shown that the categorization by

Knowledge Risk Management Susanne Durst, Thomas Henschel, 2020-02-04 This book provides an in depth introduction to knowledge risk management KRM as well as methods tools and cases to address knowledge risk management

issues in both the public and private sector It focuses on the integration of knowledge risks into the holistic risk management of organizations In addition this book is accompanied by an external website that includes additional checklists videos and company cases The combination of a sound theoretical framework along with practical instruments tools and ancillary materials makes this book a unique interactive book for professionals managers and executives as well as students academics and policy makers

Creating Futures Andrew Dorac-Kakabadse,2017-11-22 This title was first published in 2000 This volume focuses on the influence of and additionally explores the value adding contribution of information systems and related technologies on the development of society and private and public sector enterprises The chapters are stand alone units representing the research work and thinking of the Cranfield School of Management The initial chapters examine the impact of IS IT on society and organizations As the book progresses attention is then given to exploring the effects of IS IT on individuals within the information arena and more broadly within varying walks of life

Information Services for a Sustainable Society Madeleine C. Fombad,Collence Takaingenhamo Chisita,Omwoyo Bosire Onyancha,Mabel K. Minishi-Majanja,2023-07-24 The publication seeks to establish how information professionals are providing information services in in a sustainable society in an era of information disorder It also provides the strategic direction to strengthen the global voice of libraries inspiring and enhancing professional practice as well as enhancing international cooperation and collaboration among LIS educators and practitioners The contents is divided according to the following key sub themes that resonate with the title as outlined below Library and information services in the information age Data and records in an era of information disorder Archives data curation and preservation in the digital era Data science analytics and visualization Information ethics in the digital era Information

deluge in the digital era Information and knowledge management Fourth Industrial revolution The highlighted themes explore critical issues relating to how libraries archives and related institutions are responding to the seismic shifts in the information landscape amidst a myriad of challenges and opportunities The sub themes bring together a tapestry of articles that explore the status experiences and future prospects of the dynamic library and information science practice

Diversity K. April,M. Shockley,2006-11-28 This unique collection of papers from authors whose experience and nationalities are themselves diverse captures intellectual and personal reflections on diversity The authors offer unique perspectives into diversity on an individual level as well as the experiential challenges of implementing diversity programs at the country public sector company and civil society levels In doing so the book identifies a variety of elements that define a multi faceted reality that is at once contradictory deeply personal artistic emotionally evocative and intellectually stimulating

Storytelling Organizational Practices David M. Boje,2014-06-20 Once upon a time the practice of storytelling was about collecting interesting stories about the past and converting them into soundbite pitches Now it is more about foretelling the ways the future is approaching the present prompting a re storying of the past Storytelling has progressed and is about a diversity of voices not just one teller of one past it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies Within this exciting new book David M Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future This after all is where management practice concentrates its storytelling while much of the theory and method work is all about how the past might recur in the future Storytelling Organizational Practices takes the reader on a journey from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re storying of the past

A Global Approach to Data Value Maximization Paolo Dell'Aversana,2019-04-17 This book presents a systematic discussion about methods and techniques used to extract the maximum informative value from complex data sets A multitude of approaches and techniques can be applied for that purpose including data fusion and model integration multimodal data analysis in different physical domains audio video display of data through techniques of sonification multimedia machine learning and hybrid methods of data analysis The book begins with the domain of geosciences before moving on to other scientific areas like diagnostic medicine and various engineering sectors As such it will appeal to a large audience including geologists and geophysicists data scientists physicians and cognitive scientists and experts in social sciences and knowledge management
