Illustrations Thomas Bayly Howell, 1816 Contextualising Knowledge Jonathan Jenkins Ichikawa, 2017-06-16 Jonathan Ichikawa develops a contextualist semantics for knowledge ascriptions and shows how it can illuminate foundational questions in epistemology He argues that in thinking clearly about knowledge epistemologists must also think about the dynamic aspects of the words we use to talk about knowledge Contextualising Knowledge defends a central theoretical role for knowledge in broader theorising evidence belief justification and assertion are all explained in part in terms of knowledge but none of these connections can properly be understood or appreciated independently from the contextualist approach to knowledge ascriptions The book synthesizes two of the biggest ideas in contemporary epistemology contextualism about knowledge ascriptions and the knowledge first emphasis on the theoretical primacy of knowledge Ichikawa argues that the apparent tension between these ideas can be resolved indeed a central theme of the book is that each has something important to offer the other Ichikawa embraces contextualism emphasizing careful attention to its epistemic assumptions and implications The result is a novel take on central questions about knowledge and its roles in human life and discourse
