Knowledgevalue Revolution Or A History Of The Future:

The Knowledge-value Revolution, Or, A History of the Future 1991 *The Knowledge-value Revolution, Or, A History of the Future* Taichi Sakaiya,1992 The provocative Japanese bestseller prophesying a new economic and social value system for the coming millennium Sakaiya believes that a knowledge value revolution will unfold as each advanced national faced the flexibility to cope with an utter transformation of its moral standards *The Future* ,1993 **A Modern Guide to Knowledge** Francisco J. Carrillo,2022-11-18 Outlining an integrative theory of knowledge Francisco Javier Carrillo explores how to understand the underlying behavioural basis of the knowledge economy and society Chapters highlight the notion that unless a knowledge based value creation and distribution paradigm is globally adopted the possibilities for integration between a sustainable biosphere and a viable economy are small *Knowledge Cities* Francisco Carrillo,2006-08-14 Knowledge Cities are cities that possess an economy driven by high value added exports created through research technology and brainpower In other words these are cities in which both the private and the public sectors value knowledge nurture knowledge spend money on supporting knowledge dissemination and discovery ie learning and innovation and harness knowledge to create products and services that add value and create wealth Currently there are 65 urban development programs worldwide formally designated as knowledge cities Knowledge based cities fall under a new area of academic research entitled Knowledge Based Development which brings together research in urban development and urban studies and planning with knowledge management and intellectual capital In this book Francisco Javier Carrillo of the Monterrey Institute of Technology ITESM brings together a group of distinguished scholars to outline the theory development and realities of knowledge cities Based on knowledge based development the book shows how knowledge can be and is placed at the center of city planning and economic development to enable knowledge flows and innovation to provide a sustainable environment for high value added products and services **Knowledge Capital** Jay L. Chatzkel,2003 Knowledge Capital How Knowledge Based Enterprises Really Get Built is an integrated structured set of conversations with thought leaders and key practitioners in the fields of intellectual capital and knowledge management who examine in the form of conversations the steps necessary for creating and implementing the various dimensions of a knowledge based enterprise These are the dimensions that need to be effectively addressed for the organization to successfully make the transition from an activity based organization to a truly knowledge based enterprise The conversations that make up Knowledge Capital are not studies of theory separated from practice or practice without a strong theoretical base Rather they are the stories of how knowledge based enterprises really get built in the words of the people who built them While every contributor begins from his or her own unique perspective and background each moves toward a convergent understanding of the core elements perspectives and practices involved These systemic conversations provide a body of knowledge and experience on how to craft and implement strategies as well as the how values learning performance

relationships innovation and change play in the development of usable knowledge environment These explorations together lead to a mapping of what are quickly becoming the foundations of the next stage of the field Knowledge Capital gives the reader a readily accessible collection of insights and experiences essential for the new era in intellectual capital and knowledge management

Knowledge and the City Francisco Javier Carrillo, Tan Yigitcanlar, Blanca García, Antti Lönnqvist, 2014-08-01 This book underlines the growing importance of knowledge for the competitiveness of cities and their regions Examining the role of knowledge in its economic socio cultural spatial and institutional forms for urban and regional development identifying the preconditions for innovative use of urban and regional knowledge assets and resources and developing new methods to evaluate the performance and potential of knowledge based urban and regional development the book provides an in depth and comprehensive understanding of both theoretical and practical aspects of knowledge based development and its implications and prospects for cities and regions

Redeemer Nation Orrin Schwab, 2004 In this book Dr Orrin Schwab develops the concept of the modern technocratic state as part of a global technocratic culture and civilization The author argues that technocratic cultural and institutional forms were and are part of a collective script for Western culture The American script combined the scientific commercial and technological aspects of the Enlightenment with the radical 17th century Protestant belief in America as a new Zion In the twentieth century the synthesis of mission along with global technocratic knowledge and institutions created the Wilsonian liberal technocratic order As the principal agent and protector of the modern capitalist international system America the self defined Redeemer Nation has moved through the controlled anarchy of international relations from one war and crisis to the next confirmed in its self defined role and mission

Managing Knowledge, Governing Society Alain-Marc Rieu, 2021-11-29 Since the 1980s two different paradigms have reshaped industrial societies the Neoliberal paradigm and a Research and Innovation paradigm Both have been conceptualized and translated into strong policies with massive economic and social consequences They provide divergent responses to the environmental transition The Neoliberal paradigm is based on economic models and geopolitical solutions The Research and Innovation paradigm s goal is to manage knowledge differently in order to reorient the evolution of society Since the mid 1990s a version of the Research and Innovation paradigm has led to the design of large scale research and innovation policies This book examines how these policies have evolved and how they can be extended and reformed to respond to present and future environmental constraints It studies the mutation of the conception organization and role of science and technology in the evolution of industrial societies and explores the future of these developments The book offers three unique lines of enquiry The first is to focus not specifically on economics sociology political science or history but on knowledge creation from an institutional and reflexive point of view The second is to establish a convergence between the British school of science and technology studies and the research trends opened by the work of Michel Foucault Both introduced trans disciplinary and policy oriented research associating case studies long term perspectives and theory

The third is to consider climate change as the overwhelming challenge of our time The book is an insightful guide for students scholars and researchers across the humanities and social sciences including philosophy political science law economics business and media **Knowledge For The Anthropocene** Carrillo, Francisco J., Koch, Günter, 2021-11-09 With human induced environmental impacts disrupting human life in deeper ways and at a wider scale than anything previously experienced this multidisciplinary book looks at the ways that current knowledge bases seem inadequate to help us deal with such realities It offers a critical appraisal of the current knowledge infrastructure including science technology innovation education and informal knowledge systems **New Thinking for a New Millennium** Richard A. Slaughter, 2002-11-01 In this book Richard Slaughter draws on the relatively new but rapidly developing field of futures studies to illustrate how our thinking must change in order to deal with the challenges presented by the new millennium In doing so he brings together the latest work from some of the leading international names in futures thinking Part One considers the foundations of futures thinking in history literature and ideas Part Two explores some of the ways that futures studies have been and are being applied in different educational contexts around the world from pre school to postgraduate levels Part Three takes the crucial step from institutional learning to social learning and explores how futures provides us with insights which can help guide our society into the new millennium together with suggestions for the development of the field itself This book is essential reading for teachers students and anyone interested in the perils and promise of the twenty first century

Noonomy Sergey Bodrunov, 2024-11-26 In this visionary work the author suggests an original novel concept the general theory of a new industrial society of the second generation that evolves toward a new quality of public existence noonomy The volume explores the effect of modern technological shifts on human society The author shows that technologies are about to undergo qualitative changes that will create new opportunities for personal development and the satisfaction of wants and simultaneously engender risks associated with growth opportunities of human interference with nature and technogenic stress on the environment Based on the study of cutting edge technologies and resulting socioeconomic shifts Bodrunov makes the conclusion about the upcoming civilizational crisis The crisis can be overcome through the formation of a new industrial society of the second generation reliant on knowledge intensive material production and gradual removal of humans from immediate material production processes These two trends can fully develop only subject to the transition from the current socioeconomic formation to a non economic one the noonomy The book determines the limits of humans as rational self interested agents who make decisions to maximize their own interests who remain the key figure of mainstream economy In order to move beyond these limits and prevent self destruction of human civilization the author proposes a new methodology for the organization of socioeconomic knowledge noonomy which uses technological progress to introduce a rational core into the management of the chaotically developing economy something which the author posits we have failed to accomplish so far due to cultural regression and moral decay Systematically substantiating his theory by drawing on a

wide range of sources and extensive empirical data Dr Bodrunov incorporates various components of rational socio philosophical political and economic analysis with institutional theory and sociocultural analysis and focuses on the geopolitical economy approach to the issue under consideration The volume begins with a discussion of the basic principles of the research method used in the book along with the an explanation of how the key role of material production constitutes an essential principle that underlies the approach to explaining social development processes The author emphasizes an essential and ever increasing role of knowledge in the development of production technologies that occurs through a change in technological modes and is accompanied by changes in the structure of manufactured products and evolution in the level of saturation and structure of human wants The volume then assesses the first steps towards transitioning to a new stage of industrial production a new type of knowledge intensive material production that manufactures knowledge intensive products The volume considers the risks associated with the unchecked development of new technologies which while expanding opportunities for the satisfaction of human wants also increases environmental stress and requires the need for finding occupations for people who used to be employed in dying professions The volume examines how humans withdrawal from immediate production and the disappearance of economic relations serves as a non economic way of regulating production activities of an autonomous technosphere by steering its development in accordance with personal development needs Introducing the English speaking audience to a wide array of Russian twentieth century authors that are little known abroad and whose studies on technological economic and sociocultural transformations hold truly global significance this eye opening book will be of interest to those teaching and interested in the social philosophy of development of the human civilization and strategy of social and economic development

A New Development Model and China's Future Deng Yingtao,2014-04-24 The need for China to find a new environmentally sustainable development path is accepted widely among Chinese scholars and policy makers This book makes available for the first time to an English speaking audience Deng Yingtao s ground breaking book New Development Model and China s Future Published in 1991 the book was far ahead of its time Deng subjects the development model of the high income countries to rigorous analysis and

explores the environmental implications of China following this model His clear conclusion is that the carrying capacity of the physical environment and nature is limited that economic and social development should not exceed the carrying capacity of resources and that China should not adopt the western development path Based on insights from economics engineering and human psychology the book analyses the environmental impact of the current western development model demonstrates the catastrophic impact this would have in terms of China s own development and in terms of China s relationship with the world and argues that China s rich intellectual and scientific tradition will allow Chinese people to play a central role in finding the solution to the profound environmental and development challenges the world currently faces Innovation Strategy for the Knowledge Economy Debra M Amidon,2009-11-03 Innovation Strategy for the Knowledge Economy is intended for managers who have practiced the best of quality and re engineering management techniques and are ready to transform their organizations with the systematic notions of knowledge creation and application It is for organization leaders who prefer to be inspired with innovation strategy than hit over the head with change management techniques It does not deal with barriers hurdles or conflicts to be resolved rather it paints a possible vision of how we can take advantage of our collective learning to move an enterprise forward This book provides the reader with a sound practical framework for instituting innovation strategy beyond the traditional definition of flow of parts or finances At the core is an understanding of the dual value of knowledge content and innovation process using real time learning as the methodology Innovation Strategy for the Knowledge Economy introduces new managerial concepts such as Value System versus Value Chain Strategic Business Network SBN versus Strategic Business Unit SBU Customer Success versus Customer Satisfaction It is an invaluable resource for both managers and organization leaders Debra Mae Amidon is Founder and Chief Strategist of Entovation International a global innovation research and consulting network with outposts throughout the world Her specialties include knowledge management learning networks customer innovation and enterprise transformation Ms Amidon holds degrees from Boston University Columbia and MIT where she was an Alfred P Sloan Fellow *Dynamic Leadership Models for Global Business: Enhancing Digitally Connected Environments* Smith, Peter A. C.,Cockburn, Tom,2013-01-31 As global business systems are becoming ever more complex and they continue to grow and expand it is increasingly more difficult to stand out as an effective and efficient leader Dynamic Leadership Models for Global Business Enhancing Digitally Connected Environments describes various models on how to become an outstanding leader in today s rapidly growing global business environments This book seeks to provide positive instruction which illuminates a practical path to becoming a successful leader in such large and competitive markets The approach is consistent with any existing leadership development program or it may be undertaken as an individual initiative The Nation ,1910 **Knowledge Management** Raman,2009 KM is an IT subject Right Wrong Knowledge and its management is a prerogative of everyone Since the magic of information transforming itself into knowledge which in turn becomes information at the next level thus continuing the eternal cycle of

knowledge quest has always fascinated people throughout the ages This book is about celebrating knowledge for its own sake and emphasising that unless it is shared there would be no new knowledge Also knowledge per se can never be costed or priced it is only the process of acquiring it storing it and disseminating it that can be expressed in economic terms Knowledge is free and that is the way it has always been or will ever be The book has evolved as the author went about understanding the esoteric concept of KM and sought to unravel what it really stood for Key Featuresv A comprehensive look at KM as a subject First of its kind a resource book on KMv Clear view of knowledge the way of its creation and the manner of its managementv Classical approach to KMv Modern approach to KMv KM modelsv KM tools and their applicationv The mystique of how information becomes knowledgev Datamining and datawarehousing explainedv KM and its application in the corporate sectorv Case studies galorev Most comprehensive list of further readings extensive group and individual exercises for students of KM

George Yeo On Bonsai, Banyan And The Tao Asad-ul Iqbal Latif, Huay Leng Lee, 2015-05-18 Since his undergraduate days in Cambridge George Yeo has spoken and written much in and out of government Many remember the things which he said or wrote years ago This book is a compilation of some of his best speeches and writings which were selected by Asad Latif and Lee Huay Leng in consultation with him The book has a rather unusual title because there are many aspects to George Yeo which makes him difficult to classify As a student leader he was radical but conciliatory In the Singapore Armed Forces he was atypical moving from the Army to the Air Force before becoming Director of Joint Operations and Planning In politics he is fondly remembered by artists journalists doctors businessmen and foreign diplomats and by his colleagues and constituents His own staff said he had a curious mind They complained that he rarely used the drafts which they had prepared for him George Yeo describes himself as a Taoist even though he is a Roman Catholic and is now on the Papal staff Buddhists are surprised he championed the revival of Nalanda University as an international project He remains close to Singaporeans of different races and religions even though he has a deep sense of his own ancestral roots and religion In politics he has been described both as a liberal and a conservative In his Parliamentary maiden speech he spoke of the importance of democracy but has repeated many times that democracy is only a means and not an end in itself He has a deep interest in history which partly explains his seeing the re emergence of China and India earlier than most others The bonsai and the banyan are metaphors he uses for Singapore Singapore is a city state and must never have an inflated view of itself The bonsai describes Singapore modestly but he adds that the bonsai can be intensely interesting and valuable The banyan provides shade and we are grateful for it but too much makes us weak As for the Tao that perhaps is what gives unity to his many interests

Superhuman Japan Marie Thorsten, 2012-03-15 This book examines the imaginative narratives that shaped the attitudes of Americans and others toward Japan Focusing on cultural aspects of economic nationalism and US Japan relations during the trade war Marie Thorsten uses examples from public discourse film documentaries novels acts of racism and comparison of international education assessments to examine the way in which

Japan has been constituted in a global political gaze as an economic hegemon. In times of heightened rivalry we often try to find superior others so that we can motivate ourselves against an imagined future of decline. During the Cold War Americans and other nations in the West took advantage of being the underdog against the perceived superiority of the Soviet Union, especially by turning the Sputnik launch of 1957 into a lodestone for an educational renaissance. As postwar Japanese power became increasingly threatening, American policymakers again tried to fashion Japan into another Sputnik to motivate American people. This book explores 1980s Bubble Japan as a Superhuman Other in the consciousness of Americans, especially as reflected in popular culture and policy discourses. Making Japan into a Superhuman often resorted into the same stereotyping that invented Japan as a Subhuman. It was difficult for many to see that America, Japan, and other nations were actually sharing the same global economic circumstances affecting attitudes toward knowledge and nation. This book will be of interest to students and scholars of Japanese politics, International Relations, and Japanese culture and society.
