The Constitution of Poland Mirosław Granat, Katarzyna Granat, 2019-11-28 This book focuses on the Polish Constitution of 1997, concentrating on its structure, substance and some of the institutional choices made by the drafters. The core of the Constitution is similar to other liberal democratic constitutions, but in addition it regulates a number of issues such as public finances and sources of law that are new to Polish constitutionalism and to constitutionalism in general. It considers in a detailed manner certain institutional choices made in the Constitution, such as the bicameral parliament, the peculiar structure of the executive branch, as well as the principle of independence of courts and judges, fundamental rights and local government. The book is a vital resource for all those interested in Poland's Constitution and the rich comparative constitutional insights the country offers. In addition to explaining the 1997 Constitution in its political, historical and social context, the book tackles the radical changes in particular within the judicial branch introduced by the new governing majority since 2015. These new regulations are constitutional in character but without formally changing the Constitution, they challenge the rule of law, a key component of membership in the European Union. Despite the negative nature of these recent developments, the anchoring of Polish constitutional law in European constitutionalism presents a source of optimism that the 1997 Constitution will regain its position as the supreme law of the state.

Constitutions in Authoritarian Regimes Tom Ginsburg, Alberto Simpser, 2014 This volume explores the form and function of constitutions in countries without fully articulated institutions of limited government.

Power Beyond Constitutions Miloš Brunclík, Michal Kubát, Attila Vincze, Miluše Kindlová, Marek Antoš, Filip Horák, Lukáš Hájek, 2023-07-12 This research monograph examines presidential constitutional conventions and the role they play in the political systems of four Central European countries: the Czech Republic, Slovakia, Hungary, and Poland. As primarily unwritten rules of constitutional practice, constitutional conventions represent political arrangements and, as such, are political in origin. Not only do constitutional conventions in general and presidential constitutional conventions in particular have significant political implications; they shape both the everyday operation and character of regimes. Central Europe represents a particularly useful example on which the role of constitutional conventions can be studied and assessed. Polish Constitutional Documents 1790-1848 Anna Tarnowska, 2008-11-03 This volume of the edition presents exceptional documents from the early period of European constitutionalism, including the Constitution of May 3rd 1791 from the closing phase of the Polish Aristocratic Republic and the Grodno Constitution of 1793. It incorporates the constitutional texts of the Napoleonic epoch such as those concerning the duchy of Warsaw of 1807 and of the period in which Poland ceased to exist as a sovereign state, the so-called Constitution of 1815, the 1825 amendment, and the organic statute of 1832. Among the most interesting and hitherto almost unknown constitutional projects of Galicia, which belonged to the Habsburg Monarchy following the partition of Poland in 1772, are the Magna Charta Leopoldina of 1790 and two versions of the Lemberg Petition of 1848. Documents pertaining to constitutions of the Free City of Krakow, also known as the Republic of Krakow, including constitutions from 1815, 1818, and 1833 with amendments, have also been edited. In keeping with the publication series editing principles, this volume contains a total of 21 documents in all the original languages in which they were

published at the time including Polish French German Latin Russian and old Ukrainian The texts have been edited and annotated by the law historian Anna Tarnowska Nicolaus Copernicus University Torun
