Home Schooling Frederick M. Lawrence, 2007 From left to right on the political spectrum there is at least one note of agreement the nation's school system has not delivered universal quality education Accordingly debate has raged over how to rectify this situation Should the government increase funding encourage privatisation some of both Another option though has emerged and is seemingly gaining popularity home schooling Citing both substandard education and displeasure with school environments and curricula many parents have decided to teach their own children Supporters say it is well within their rights to raise their children as they see fit and that at home learning is superior to the public system Detractors claim that home schooled children are deprived of social interaction and the broad based education provided by the system Neither side wants to cede ground making the issue of home schooling an integral part of a wider national debate on education In this book the specific topic of home schooling is presented from all relevant sides to give a complete picture of the present status of the issue and its potential for future resolution Following this overview is a thorough and carefully selected bibliography of literature about home schooling from all viewpoints Easy access to his important resource is then provided via author title and subject indexes

Homeschooling James G. Dwyer, Shawn F. Peters, 2019-04-15 In *Homeschooling The History and Philosophy of a Controversial Practice* James G Dwyer and Shawn F Peters examine homeschooling's history its methods and the fundamental questions at the root of the heated debate over whether and how the state should oversee and regulate it The authors trace the evolution of homeschooling and the law relating to it from before America's founding to the present day In the process they analyze the many arguments made for and against it and set them in the context of larger questions about school and education They then tackle the question of regulation and they do so within a rigorous moral framework one that is constructed from a clear eyed assessment of what rights and duties children parents and the state each possess Viewing the question through that lens allows Dwyer and Peters to even handedly evaluate the competing arguments and ultimately generate policy prescriptions Homeschooling is the definitive study of a vexed question one that ultimately affects all citizens regardless of their educational background

Jameson Brewer,2021-01-25 In this volume the author offers an exploratory analysis of the history of homeschooling in the United

States current curricular practices religious and political rationales for homeschooling a critique of the claims by homeschooling advocates that the practice leads to greater efficiency and effectiveness and what homeschooling and individualistic oriented approaches mean for society Teaching the next generation at home is with little doubt the oldest form of educating children Yet this simplistic understanding of homeschooling does not adequately capture the growth of homeschooling as a practice in the 21st century nor is it a widely accessible form of school choice for most families While many parents keep their children out of formal schooling public and private for myriad reasons what is clear is that homeschooling is the epitome of a conceiving of education as an individualistic good a commodity that can or should be done outside of a conception of the common good a reasonable understanding of teaching as a profession and the elevation of ideological echo chambers of information which can have deleterious impacts on the students who are homeschooled and society broadly
