## **Homeopathy Life Basics:**

**The Basics of Life** Dr Bodo Koehler, MD, 2022-02-01 What are the foundations of life and what is Life supporting Medicine To sustain life and support life processes nature makes tremendous efforts If something has gone wrong in the organism and illness occurs it is never a trifle but a fundamental disorder This indicates complicated interrelationships They are for the most part unexplored Despite everything there are always very simple principles that need to be recognised This book identifies such principles from which often amazingly simple guidelines for nutrition and medical treatment can be derived However it is crucial that no suppressive and destructive measures are used but rather supportive integrating methods The author broadens the horizon with well founded scientific research results which lead to completely new insights and enable a different life supporting view of the human being The author Dr Bodo Koehler MD born in 1948 is an internist with extensive additional training in naturopathic medicine and has almost 50 years of experience in clinics and his own practice Through intensive research work and active exchange with many top class scientists he has acquired an extensive range of knowledge This has resulted in several specialist books and over 150 publications as well as his own therapy methods and the development of medical devices The author is active as a lecturer at home and abroad **Homoeopathy**

**Life Science of the Era** , *What is Life?* Hans-Peter Durr, Fritz Albert Popp, Wolfram Schommers, 2002 The book of Erwin Schrödinger about life evokes a variety of basic questions concerning the understanding of life in terms of modern physics rather than biochemistry Problems of organization and regulation of biological systems cannot be understood by revealing only the chemical processes of the living state A group of reputable physicists among them the followers of Heisenberg and Fröhlich and biologists came to this same conclusion through several workshops on this topic This book contains their contributions written from different viewpoints of theoretical physics and modern biology These articles are valuable not only for understanding life but also for creating new and non invasive diagnostic and therapeutic tools in medicine they also contribute importantly to a deeper understanding of evolutionary processes including the development of consciousness

MESSAGE OF HIS HOLINESS THE 14TH DALAI LAMA Leaving aside the complex question of the creation and evolution of our universe we can at least agree that each of us is the product of our own parents In general our conception took place not just in the context of sexual desire but from our parents decision to have a child Such decisions are founded on responsibility and altruism the parent s compassionate commitment to care of their child until it is able to take care of itself Thus from the very moment of our conception our parents love is directly in our creation Moreover we are completely dependent upon our mothers care from the earliest stages of our growth According to some scientists a pregnant woman s mental state be it calm or agitated has a direct physical effect on her unborn child The expression of love is also very important at the time of birth Since the very first thing we do is suck milk from our mothers breast we naturally feel close to her and she must feel love for us in order to feed us properly if she feels anger or resentment her milk may not flow freely Then there is the critical period of brain development from the time of birth up to at least the age of three or four during which time loving physical contact is the single most important factor for the normal growth of the child If the child is not held hugged cuddled or loved its development will be impaired and its brain will not mature properly Since a child cannot survive without the care of others love is its most important nourishment The happiness of childhood the allaying of the child s many fears and the healthy development of its self confidence all depend directly upon love Nowadays many children grow up in unhappy homes If they do not receive proper affection in later life they will rarely love their parents and not infrequently will find it hard to love others This is very sad As children grow older and enter school their need for support must be met by their teachers If a teacher not only imparts academic education but also assumes

responsibility for preparing students for life his or her pupils will feel trust and respect and what has been taught will leave an indelible impression on their minds On the other hand subjects taught by a teacher who does not show true concern for his or her students overall well being will be regarded as temporary and not retained for long Above is an excerpt from the section on Articles and messages relating to His Holiness the Dalai Lama s commitment to promote basic human values <https://www.dalailama.com/messages/compassion-and-human-values/compassion> *The Handbook of Homeopathy* Gerhard Koehler, 1989 Directed primarily to the therapist this is also an excellent introduction to homeopathy for the layperson seeking information Includes sections on Hahnemann s Chronic Diseases and Organon **Fundamentals of**
