purpose of vocational education and training VET and grounded in the reality of a small cohort of young South Africans and an institution seeking to serve them Skills for Human Development moves beyond the inadequacies of the dominant human capital orthodoxy to present a rich theoretical and practical alternative for VET Offering a human development and capability

approach it brings social justice to the forefront of the discussion of VET's purpose at the national institutional and individual levels. In doing so, this book insists that VET should be about enlarging people's opportunities to live a flourishing life rather than simply being about narrow employability and productivity. It argues that human development approaches while acknowledging the importance of work in its broadest sense offer a better way of bringing together VET and development than the current human capital inspired orthodoxy. Offering a transformative vision for skills development, this book considers the potential contribution skills development could make to broader human development as well as to economic development. Points to an alternative approach to the current and flawed deficit assumptions of VET learners. Presents for the first time an alternative evaluative frame for judging VET purpose and quality. Presents a timely account of current vocational and education training that is high on the agenda of international policymakers. Taking a broad perspective, Skills for Human Development presents a comprehensive and unique framework which bridges theory, policy and practice to give VET institutions a new way of thinking about their practice and VET policymakers a new way of engaging with global messages of sustainable human development. It is a vital resource for those working on the human development and skills approach in multiple disciplines and offers a grounding framework for international policymakers interested in this growing area.

Work and Wellbeing in the Nordic Countries Helge Hvid, Eivind Falkum, 2018-12-07 The Nordic countries have the world's best working life. Unlike in many other countries, global competition has not created inequality, uncertainty, long working hours, standardization and restrictive managerial control. The main reason for this lies in the way interests are expressed and conflicts are resolved. Both employees and employers are well organized and both recognize the interests of the other. Working life develops in a constant interaction between conflict and compromise. This book examines working conditions in Norway, Denmark, Sweden and Finland. It explores how these good working conditions are created and maintained. The chapters explain how work organization is formed, how education, training and work place learning give access to the labour market, how work is managed in the public sector, how precarious work unfolds in the Nordic countries. Work and Wellbeing in the Nordic Countries is addressed to all those who have interest in the quality of working life. It will be of particular use to all students, academics and policy makers working in the fields of social policy, wellbeing, management studies, employment relations, work sociology and work psychology. **The SAGE Encyclopedia of Lifespan Human Development** Dr Marc Bornstein, Marc H.
