Human Factors In Auditory Warnings:

Human Factors in Auditory Warnings Judy Edworthy, Neville A. Stanton, 2019-01-15 First published in 1999 this book provides answers to many of the problems associated with the design and application of auditory warnings It represents the position of contemporary auditory warnings research and development in a single unique volume Application domains include air traffic control aviation emergency services manufacturing medicine military and nuclear power The contributors constitute many key experts in this area some of whom are psychoacousticians some psychologists and some ergonomists Correspondingly the chapters range from those covering basic topics such as audibility and localization of warnings through psychological issues concerned with the relationship between design understanding and the behavioural response to the more general ergonomic issues of implementing the warnings in a particular context Although each of the chapters takes a slightly different perspective they all balance theoretical underpinning with practical application The editors have undertaken to draw all of the contributions together by providing an overview of warnings research at the beginning of the book and summary of the contributions at the end This book will appeal to all involved in the research development design and implementation of auditory warnings

Human Factors in Alarm Design Neville A. Stanton, 1994-02-28 Focusing on the application of human factors and ergonomics in the design of alarm systems this book brings together all the disparate areas in a single volume The aim of the book is to present current human factor issues regarding alarm design in a variety of setting such as industrial alarm systems in process industries aviation autom
