The Human Future Revisited Harrison Brown, 1978-04 *The Human Future Revisited* Harrison Brown, 1978

Agenda, 1979 *Earth And The Human Future* Kirk R Smith, 2019-09-17 During the second half of the twentieth century great changes have occurred in the natural sciences spawned by the leap forward in physics during the war years and the growth in understanding of earth's history and place in the cosmos Also with the new and terrible consequences of full fledged war the nuclear age has brought to the fore the new *The Qur'ān* Karim Samji, 2018-03-19 The corpus coranicum eludes familiar categories and resists strict labels No doubt the threads woven into the fabric are exceptionally textured varied and complex Accordingly the introductory chapter of this book demonstrates the application of form criticism to the text Chapter two then presents a form critical study of the prayer genre It identifies three productive formulae and addresses distinct social settings and forms associated with them The third chapter begins by defining the liturgy genre vis vis prayer in the Qur'an Drawing a line between the hymn and litany forms this chapter treats each in turn Chapter four considers the genre classified as wisdom literature It identifies sapiential formulae and sheds light on wisdom contexts The fifth chapter examines the narrative genre writ large It also surveys narrative blocks of the long saga The subsequent chapter on the proclamation genre inspects a set of vocative formulae which occurs in the messenger situation The concluding chapter looks at the corpus through synchronic and diachronic lenses In the end Qur'anic genres encapsulate the form critical elements of formulae forms and settings as well as an historical dimension A Short History of the Future W. Warren Wagar, 1992-12-30 A dazzling and imaginative combination of fiction and scholarship this speculative history of the future is a memoir of postmodern times This second edition shows how the events of 1989 and their aftermath reinforce Wagar's predictions of the future A breathtaking future history in the manner of Wells and Stapledon unnerving in its mixture of facts fiction and personal perspectives George Zebrowski New York Review of Science Fiction *China Among the Nations of the Pacific* Harrison Brown, 2019-08-27 On May 14 1960 the East West Center was officially created by the Congress of the United States As a part of the celebration of the twentieth anniversary of this event a symposium was held on May 19 1980 at the National Academy of Sciences in Washington D C The subject China and the Nations of the Pacific was selected because the theme for the anniversary year of the East West Center had been established as Building a Pacific Community It has been suggested that international mechanisms for coming to grips with such interdependencies in the Pacific region as trade investment food energy and mineral commodities are inadequate In response to such suggestions hearings have been held in both houses of the Congress of the United States on the idea of a Pacific community This symposium was organized as part of that general discussion The contributors hope that the papers presented here will further stimulate thought and debate on the problems of the Pacific region **Global Environmental Challenges** James Gustave Speth, 2005 This book will change the way we understand the future of our planet It is both alarming and hopeful James Gustave Speth renowned as a

visionary environmentalist leader warns that in spite of all the international negotiations and agreements of the past two decades efforts to protect Earth's environment are not succeeding. Still, he says the challenges are not insurmountable. He offers environmental threats around the world. The author explains why current approaches to critical global environmental problems—Climate change, biodiversity loss, deterioration of marine environments, deforestation, water shortages and others—don't work now and won't work in the future. He provides a stinging critique of the failure of U.S. leadership and offers intriguing insights into why the U.S. has been able to address domestic environmental threats with some success while largely failing at the international level. Setting forth eight specific steps to a sustainable future, Speth convincingly argues that dramatically different and far-reaching actions by citizens and governments are now urgent. If ever a book could be described as essential, this is it.

Red Sky at Morning James Gustave Speth, 2004-01-01. Presents an analysis of the worsening global environmental crisis, citing ten contributors to environmental deterioration, including affluence, the American culture and its values, population, and poverty.

Cultural Relations in the Global Community Verner Courtenay Bickley, Puthenparampil John Philip, 1981. Cultural Relations In The Global Community: Problems And Prospects. Focuses Attention On Emerging Critical Dimensions Of This Modern Interdependent World. While Interdependence Impinges On All Nations In The Field Of Science And Technology, Economics, Politics, Education And Research, Human Health, Environmental Well Being Etc. The Nature And Meaning Of Interdependence Continue To Be Rather Unclear. It Is However Possible To See In Recent Discussions Of The Subject Certain New Trends And Perspectives Which We Are Capable Of Offering A Deeper Understanding Of This Complex And Often Overpowering Reality. The Book Identifies And Examines Some Of The Significant Characteristics Of Interdependence Primarily From A Cultural Point Of View. Authors Of The Different Chapters Have Made An Effort To Take Current Thinking And Interpretations Of Interdependence To A Point Of Further Analysis, Clarification And Appraisal. While They Have Brought To This Task Special Aptitudes And Interests Of Their Own, They Have Done So Without Losing Sight Of The Unity Underlying Them. They Have Thus Been Able To Present An Interconnected And Insightful Picture Of The Contemporary World Capable Of Offering Fresh Approaches To The Theory And Practice Of International And Intercultural Relations.

Preparing for the Future John Ahrens,2020-02-13 Does the present generation have a moral obligation to conserve resources for future generations Must we accept drastic reductions in our standard of living and give up the ideals of individual liberty and technological progress in order to preserve the environment PREPARING FOR THE FUTURE offers an unfashionably optimistic answer to these questions that future generations cannot have a right to a share of existing resources because only living persons can have rights Rejecting the sacrifices that most traditional ethical principles would require of us it advocates instead that members of the present generation may legitimately use all of the resources at their disposal to realize their own values
