Human Needs And The Security Of Nations:

The United Nations Organization Tatah Mentan, 2020-05-19 Saving succeeding generations from the scourge of war was the main motivation for creating the United Nations. Given the ongoing conflicts, wars and terrorist attacks today, one is forced to ask: Is there Hope for International Peace and Security? Where have the safeguards gone? Has the United Nations become powerless in the face of the absence of the safeguards? In this book, Professor Tatah Mentan examines the transformation in UN peace and security operations, analysing its changing role and structure. Tatah Mentan argues that the enemy of peace and security in the global system is the dictatorship of predatory bailed out monopoly capitalism that tells us that building war ships is more important than building alternate energy infrastructure. The real enemies are therefore the publicly bailed out monopolies: Big Media, Big Pharma, Big Oil, the Military Industrial Complex etc, that deny the truth about conflicts and insecurity. As he emphasises, the enemies are those who refuse to think critically, not being intellectually curious and accepting the supremacist fascist and misgovernance that is reducing the world collectively to being cogs in a diabolical machine of neoliberal global capitalism.

Integrated Maritime Security Dr. Prabhakaran Paleri, 2014-05-01 This book is unique in the way that it looks at the much talked about maritime security through the perspective of national security without disconnect in the terrain specific mode of the ocean. The uniqueness is not in the treatment of the concept of maritime security but that of national security in a manner that is different from the beaten notion of physical security of a nation and its people from external and internal threats. National security, according to the author, is more than just military security or the conditions of what is often termed as internal security. It is complex, according to his studied findings. The book provides a warning to governments that any approach to national governance without integrated maritime security can be defeating in the overall objective of maximising national security even for landlocked countries in the modern world. The book provides a comprehensive review and analysis of integrated maritime security, providing ample scope for further research on many of the concepts and terminologies inculcated as findings of research. The interesting aspect is that the author views maritime security as a ghost protocol to hammer his ideas into the earnest listener.

Understanding New Security Threats Michel Gueldry, Gigi Gokcek, Lui Hebron, 2019-02-21 This textbook examines non traditional forms of security and expands the notion of security to include non state actors and non human actors. Proposing an expansive view of non traditional forms of security that go beyond traditionally recognized issues of threats to state and national territory, this new textbook rests on the following premises: traditional state centered threats such as nuclear proliferation and espionage remain a concern; old and new threats combine and create interlocking puzzles, a feature of wicked problems and wicked messes because of the global erosion of borders; new developments of unconventional insecurity interact in ways that frustrate traditional conceptual definitions; conceptual maps and national policies; unconventional security challenges which have traditionally been seen as low politics or soft issues are now being recognized as hard security challenges in the twenty first century; many

of the so called new threats detailed here are in fact very old diseases gender violence food insecurity under development and crime are all traditional security threats but deeply modified today by globalization The chapters offer local and global examples and engage with various theoretical approaches to help readers see the bigger picture Solutions are also suggested to these problems Each chapter contains discussion questions to help readers understand the key points and facilitate class discussion This book will be of great interest to students of international security studies human security global politics and international relations The Palgrave Encyclopedia of Global Security Studies ,2023-02-15 This encyclopedia provides an authoritative guide intended for students of all levels of studies offering multidisciplinary insight and analysis of over 500 headwords covering the main concepts of Security and Non traditional Security and their relation to other scholarly fields and aspects of real world issues in the contemporary geopolitical world Personal Liberties and National Security William Patrick Clark,1982 The Evolving Sphere of Food Security Rosamond L. Naylor,2014-08-18 Hundreds of millions of people still suffer from chronic hunger and food insecurity despite sufficient levels of global food production The poor s inability to afford adequate diets remains the biggest constraint to solving hunger but the dynamics of global food insecurity are complex and demand analysis that extends beyond the traditional domains of economics and agriculture How do the policies used to promote food security in one country affect nutrition food access natural resources and national security in other countries How do the priorities and challenges of achieving food security change over time as countries develop economically The Evolving Sphere of Food Security seeks to answer these two important questions and others by exploring the interconnections of food security to security of many kinds energy water health climate the environment and national security Through personal stories of research in the field and policy advising at local and global scales a multidisciplinary group of scholars provide readers with a real world sense of the opportunities and challenges involved in alleviating food insecurity In sub Saharan Africa for example management of HIV AIDS the establishment of an equitable system of land property rights and investment in solar powered irrigation play an important role in improving food security particularly in the face of global climate change Meanwhile food price spikes associated with the United States biofuels policy continue to have spillover effects on the world s rural poor with implications for stability and national security The Evolving Sphere of Food Security traces four key areas of the food security field 1 the political economy of food and agriculture 2 challenges for the poorest billion 3 agriculture s dependence on resources and the environment and 4 food in a national and international security context This book connects these areas in a way that tells an integrated story about human lives resource use and the policy process Torture and the Military Profession J. Wolfendale,2007-10-04 Wolfendale argues that the prevalence of military torture is linked to military training methods that cultivate the psychological dispositions connected to crimes of obedience While these methods are used the military has no credible claim to professional status The United Nations As a Dispute Settlement System Connie Peck,1996-05-23 This text reviews the preventive diplomacy of the United Nations

suggesting that the Security Council is not well suited to the task What is needed it argues is a less political and more professional approach namely a larger and more autonomous role for the Secretary General and the development of a greater specialist capacity within the Secretariat The work gives appropriate weight to the importance of peace building both before and after conflict as an integral part of conflict prevention and the United Nations role therein **Routledge**

Rethinking Security in the Twenty-First Century Edwin Daniel Jacob, 2016-12-09 This edited volume helps bridge the elusive gap between theory and practice in dealing with the issue of security broadly conceived A quarter of a century has passed since the crumbling of the Berlin Wall Yet our notions of security remain mired in Cold War thinking whose realist ethos is predicated on holding the nation state's power interests and survival as the guiding unit of analysis in international relations Security is ever changing Confronting new dangers to the individual the state and the international order calls for new categories that speak to the new influence of globalization international institutions and transnational threats Composed of original essays by a cosmopolitan mix of leading figures inside and outside the academy
