HOSPITAL ADMINISTRATION AND HUMAN RESOURCE MANAGEMENT D. K. Sharma, R. C. Goyal, 2013-11-13 As in the previous editions this substantially revised and updated edition continues to discuss in detail the various methods of

organizing a hospital's Human Resource Department. It also shows how the use of scientific techniques can improve the services of the hospital and ultimately benefit the patients as well as the hospital itself. The Sixth Edition brings in new concepts and new ideas and takes into account the contemporary challenges of hospitals in the human resource management area. What is New to This Edition: One entire new section on Twelfth Five Year Plan 2012-2017. Two New Chapters: Chapter 6 on Patient Safety and Chapter 7 on Hospital Information System. New Supreme Court Judgements on Consumer Protection replacing the older judgements. Intended primarily as a text for students pursuing Master of Hospital Administration, MHA postgraduate diploma courses in Hospital Administration or Health Care Services and undergraduate and postgraduate courses in nursing, B.Sc. M.Sc. Nursing, the book would be equally useful for all those engaged in hospital administration, nursing administration and human resource management.

What the Reviewers Say

Disruptive Artificial Intelligence and Sustainable Human Resource Management Anamika Pandey, Balamurugan Balusamy, Naveen Chilamkurti, 2023-12-14.

It is well established that every organization is founded with a specific purpose and goals. Virtually all business organizations obtain measurements and metrics dealing with outcomes and results. However, what is reflected on the balance sheet does not necessarily show the actual worth of the organizations and ensure their survival and sustainability. Thus, the question arises: what exactly makes the organizations sustainable and thriving in an ever-changing environment? There are several examples of companies like Faber-Castell, Bank of Ireland, Chivas, DuPont, and many more which have been able to sustain and survive over more than 200 years and still have a successful existence in the present era. Thus, it is important for the organization to pay equal attention to its three bottom lines: i.e. people, profit, and planet, for its sustainability, which not only meet the needs of the present generation but should have a futuristic approach as well. In the present era, organizations are adopting a new normal working dynamic and coping with the post-pandemic situations to sustain themselves in the business environment. Technology plays a significant role in this new working dynamic, and cutting-edge technologies like machine learning, artificial intelligence, blockchain, ChatGPT, Internet of Things, and much more effectively facilitate human functioning at work. The book aims to contribute to understanding and developing sustainable human resource management processes and practices aligned with recent technologies. It highlights the interconnection among the three bottom-line sustainable approaches for the growth and development of the organization. Topics discussed in this book include Disruptive Technologies and HR Sustainability, Convergence of Innovative Technologies, HR and Organizational Growth, Triple bottom line Sustainability for HRM, Business-oriented Talent analytics, and HR.
