For quick, reliable coverage of women's issues in developing countries, here is a concise reference work written by a team of more than 80 international experts. The Encyclopedia comprises 68 essays that cover the entire Third World from Africa to Asia, from the Near East to South and Central America, from the South Pacific to the Caribbean. A feminist viewpoint enhances the coverage. Informed throughout by a feminist perspective, the Encyclopedia focuses on traditional women's concerns such as political participation, human rights, nutrition, housework, the family, equality, health, and more. But the coverage also extends to such issues as domestic and sexual violence, creation of women-friendly cities, patriarchal ideologies, religious beliefs, the needs of older women, new jobs and exploitation in industrial production, AIDS, the gender consequences of ecological devastation, movements for change, and other areas of increasing awareness. Geographical entries cover all the major regions and countries and discuss conditions and issues in each area. Spotlights the newest and best sources. An introduction by the editor illuminates the most important issues faced by Third World women today and analyzes the drastically changed global situation and how the changes impacted on the material presented in the Encyclopedia. Reference aids make information retrieval easy. Gender and Development in Nigeria Funmi Soetan,Bola Akanji,2018-08-15 In this edited volume Nigerian

scholars from a variety of disciplines examine the relationship between gender and Nigeria's pathways of development in the last 100 years of its nationhood. This analysis is set against the background of unequal power dynamics between women and men and specifically the ways in which social, cultural, political and economic construction of gender has influenced Nigeria's course of development through her colonial and post colonial history. The influence of the nature of economic governance, policy and institutional frameworks, the nature of resource availability and re distribution between women and men in terms of goods and services, knowledge and skills, policies and budgets and the outcomes and impacts for women and men are seen in terms of women's economic empowerment, equal participation and development benefits. This rich collection of empirical works therefore provides not just the rhetoric but the evidence to indict gender power relations in Nigeria especially at the institutional level. This volume unpacks and explores this recurrent problem with a the goal of identifying new pathways for gender relations.

Women and the UN Rebecca Adami, Dan Plesch, 2021-07-28. This book provides a critical history of influential women in the United Nations and seeks to inspire empowerment with role models from bygone eras. The women whose voices this book presents helped shape UN conventions, declarations and policies with relevance to the international human rights of women throughout the world today. From the founding of the UN up until the Latin American feminist movements that pushed for gender equality in the UN Charter and the Security Council Resolutions on the role of women in peace and conflict, the volume reflects on how women delegates from different parts of the world have negotiated and disagreed on human rights issues related to gender within the UN throughout time. In doing so, it sheds new light on how these hidden historical narratives enrich theoretical studies in international relations and global agency today. In view of contemporary feminist and postmodern critiques of the origin of human rights, uncovering women's history of the United Nations from both Southern and Western perspectives allows us to consider questions of feminism and agency in international relations afresh. With contributions from leading scholars and practitioners of law, diplomacy, history and development studies and brought together by a theoretical commentary by the Editors, *Women and the UN* will appeal to anyone whose research covers human rights, gender equality, international development or the history of civil society. Developing Power Arvonne S. Fraser, Irene Tinker, 2004. Founders of the global women's movement share personal accounts about the trials and challenges of their work.

Higher Education and Equality of Opportunity Fred A. Lazin, N. Jayaram, Matt Evans, 2012-07-10. The movement to broaden access to public universities, the dominant strategy during the 1970s and 1980s, has largely shifted to enable the marketplace rather than the government to shape the contours of higher education. Government funding is being reduced, affirmative action and other programs designed to insure broader access are in decline, and personal fulfillment is replacing a public good designed to insure greater equality of opportunities. This book explores the impact of diminishing

government resources and expanding market forces in developing and developed countries to either foster or lessen equality of opportunities in higher education for different racial ethnic religious and gender groupings What are the consequences of a market driven higher education for student access teaching and scholarship Through case studies this book explores issues such as access of minority groups within the larger societies the place of foreign students in a national system and access for students with mental health difficulties and evaluates the success of funding schemes designed to expand opportunities and access The research provides an interesting contrast of the diversity and uniqueness of higher education in the United States France Australia India Israel South Korea The Netherlands Ghana and several other countries while at the same time revealing surprising commonalities These studies reveal world wide trends in higher education including a cutback in government financing a decline in access and a receding of affirmative action This book is an important addition to the literature on higher education during the age of globalization and the decline of government funding of higher education The studies provide important data about the current situation in higher education in countries around the world

Feminist Legal Theory (Vol. 2) Frances Olsen, 1995-10 A collection of previously published articles

Just Methods Alison M. Jaggar, 2015-11-17 The supplemented edition of this important reader includes a substantive new introduction by the author on the changing nature of feminist methodology It takes into account the implications of a major new study included for the first time in this book on poverty and gender in equality and it includes an article discussing the ways in which this study was conducted using the research methods put forward by the first edition This article begins by explaining why a new and better poverty metric is needed and why developing such a metric requires an alternative methodological approach inspired by feminism Feminist research is a growing tradition of inquiry that aims to produce knowledge not biased by inequitable assumptions about gender and related categories such as class race religion sexuality and nationality Just Methods is designed for upper level undergraduate and graduate students in a range of disciplines Rather than being concerned with particular techniques of inquiry the interdisciplinary readings in this book address broad questions of research methodology They are designed to help researchers think critically and constructively about the epistemological and ethical implications of various approaches to research selection and research design evidence gathering techniques and publication of results A key theme running through the readings is the complex interrelationship between social power and inequality on the one hand and the production of knowledge on the other A second and related theme is the inseparability of research projects and methodologies from ethical and political values

The Chemical Element Javier García-Martínez, Elena Serrano-Torregrosa, 2011-09-19

In the International Year of Chemistry, prominent scientists highlight the major advances in the fight against the largest problems faced by humanity from the point of view of chemistry, showing how their science is essential to ensuring our long term survival. Following the UN Millennium Development Goals, the authors examine the ten most critical areas including energy, climate, food, water and health. All of them are opinion leaders in their fields or high ranking decision makers in national and international institutions. Intended to provide an intellectual basis for the future development of chemistry, this book is aimed at a wide readership including students, professionals, engineers, scientists, environmentalists and anyone interested in a more sustainable future. **Rethinking Development Geographies** Marcus Power, 2004-08-02

Development as a concept is notoriously imprecise, vague and presumptuous. Struggles over the meaning of this fiercely contested term have had profound implications on the destinies of people and places across the globe. *Rethinking Development Geographies* offers a stimulating and critical introduction to the study of geography and development. In doing so, it sets out to explore the spatiality of development, thinking and practices. The book highlights the geopolitical nature of development and its origins in Empire and the Cold War. It also reflects critically on the historical engagement of geographers with the Tropics, the Third World and the South. The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed. The interconnections between globalization and development are highlighted through an examination of local, national and transnational resistance to various forms of development. The text provides an accessible introduction to the complex and confusing world of contemporary global development. Informative diagrams, cartoons and case studies are used throughout. While exploring global geographies of economic and political change, *Rethinking Development Geographies* is also grounded in a concern with people and places, the view from below, the views of women and the view from the South.

Gender, Society and Development Maitrayee Mukhopadhyay, Shamim Meer, 2008. This is an area that needs considerable research and this publication explores some of the key issues at stake. *Gender Parity and Multicultural Feminism* Ruth Rubio-Marín, Will Kymlicka, 2018-09-25. Around the world we see a participatory turn in the pursuit of gender equality, exemplified by the adoption of gender quotas in national legislatures to promote women's role as decision makers. We also see a pluralism turn with increasing legal recognition given to the customary law or religious law of minority groups and indigenous peoples. To date, the former trend has primarily benefitted majority women and the latter has primarily benefitted minority men. Neither has effectively ensured the participation of minority women. In response, multicultural

feminists have proposed institutional innovations to strengthen the voice of minority women both at the state level and in decisions about the interpretation and evolution of cultural and religious practices This volume explores the connection between gender parity and multicultural feminism both at the level of theory and in practice The authors explore a range of cases from Europe Latin America the Middle East and Africa in relation to state law customary law religious law and indigenous law While many obstacles remain and many women continue to suffer from the paradox of multicultural vulnerability these innovations in theory and practice offer new prospects for reconciling gender equality and pluralism
