Chapter 9 Introduction

- Sexual expression is a process through which we reveal our sexual selves. Sexual expression involves more than simply sexual behaviors; it involves our feelings as well. “Behavior can never be unemotional,” one scholar observes (Blechman, 1990). If a woman chooses someone with hereditary health problems, she risks passing on his poor genes to her children. An important component of this theory addresses gender differences in short-term and long-term heterosexual relationships from an evolutionary mating perspective. This theory posits that males and females face different adaptive problems in “casual,” or short-term,
