Human Values And Natural Science:

Science and Human Values Jacob Bronowski, 2011-10-01 The Impact Of Science On Ethics And Human Values

Science & Human Val Jacob Bronowski, 1990-03-14 Thought provoking essays on science as an integral part of the culture of our age from a leader in the scientific humanism movement A profoundly moving brilliantly perceptive essay by a truly civilized man Scientific American **Commentary on Human Values and Natural Science**, 1969 *The Moral*

Landscape Sam Harris, 2011-09-13 Sam Harris dismantles the most common justification for religious faith that a moral system cannot be based on science Human Values and Natural Science Ervin Laszlo, James B. Wilbur, 1970 *The Limits of Concept Formation in Natural Science* Heinrich Rickert, 1986-10-31 This book is Heinrich Rickert's most important work It presents his systematic theory of knowledge and philosophy of science *The Natural Science of the Human Species*

Konrad Lorenz, 1997-08 This translation contains a synopsis of all the ideas that made Lorenz famous as the founder of ethology the study of comparative animal behavior edited from the author's posthumous works by Agnes von Cranach Here Am I Where Are You The Behavior of the Greylag Goose was thought to be Konrad Lorenz's last book However in 1991 the Russian Manuscript was discovered in an attic and its subsequent publication in German has become a scientific sensation Written under the most extreme conditions in Soviet prison camps the Russian Manuscript was the first outline of a large scale work on behavioral science This translation contains a synopsis of all the ideas that made Lorenz famous as the founder of ethology the study of comparative animal behavior **Papers from the International Conference on Human Values and Natural Science** Ervin Laszlo, 1969 *Modern Science and Human Values* William W. Lowrance, 1985 A thought provoking discussion of the various ways in which science technology and medicine influence social philosophies and choices Social attitudes values and ethics are analysed for their roles in decision and policy making Citing case studies the continuing debate surrounding sociobiology the role of peer review in formulating recombinant DNA research policy societal guidance of medical experimentation and the application of risk assessment to nuclear reactor safety Lowrance argues that society will be better served by a technical stewardship that extends beyond narrowly defined concepts of responsibility This book will be of great interest to a wide range of medical researchers scientists ethicists and lay readers **Human Significance in Theology and the Natural Sciences** Christopher L. Fisher, 2010-02-03 The Medieval Worldview that Regarded Human Beings as at the Center of God's plans for His universe has long been regarded as obsolete its synthesis of Christian theology and Greek philosophy having collapsed under the weight of Copernicus Galileo and Darwin The popular stereotype is that Science both in the Copernican revolution that dethroned the earth centered view of the cosmos and in subsequent developments in evolutionary theory and general relativity has marginalized and trivialized human existence revealing humanity's place in the cosmos to be accidental peripheral and ultimately meaningless However an investigation into both modern Christian theology and contemporary twenty first century Science reveals just the opposite providing solid evidence

in the interdisciplinary dialogue concerning the significance of humanity within the universe In this important study Christopher Fisher analyzes several modern theologians including Wolfhart Pannenberg Karl Rahner and John Zizioulas to reveal how contemporary ecumenical theology is deeply and intrinsically committed to a high view of human cosmic significance as a consequence of Christianity's indelible Trinitarian and incarnational faith Fisher then demonstrates how research in contemporary natural Science confirms this finding in its own way as recent primate intelligence studies artificial intelligence research and even the quest for extra terrestrial intelligence reveal the wonder of human uniqueness A contemporary version of the teleological argument also resurfaces in consideration of cosmic evolutionary perspectives on human existence Even ecological concerns take on a new poignancy with the realization that among material creatures only human beings are capable of addressing the world's situation This interdisciplinary study uncovers the surprising coherence and convergence of Christian Theology and Natural Science on the subject of human existence and significance here at the beginning of the twenty first century and it highlights the very unique role of humanity in global and cosmic history Through an incisive study of several leading twentieth century theologians Chris Fisher explores the ecumenical consensus for a strong reading of human cosmic significance While acknowledging problems surrounding earlier forms of anthropocentrism he argues that Christian theology remains wedded to a high understanding of the place of human beings in the economy of creation and salvation This is a valuable contribution to an important debate in contemporary theology David Fergusson University of Edinburgh This is a fascinating work on the interface between theology and science The author's remarkable breadth of knowledge clarity of thought and lucid writing style enable him to help the reader to understand the coherence between science and faith This scholarly work is an irenic and well informed presentation of the Christian faith and will become one of the primary textbooks in theology philosophy of religion and philosophy of science Laurence W Wood Asbury Theological Seminary *Human Values and Natural Science* Ervin Laszlo, James B. Wilbur, 1970 Marx, Durkheim, Weber Ken Morrison, 2006-08-11 This Second Edition is a thoroughly revised expanded version of the bestselling student text in classical social theory Author Kenneth Morrison provides an authoritative accessible undergraduate guide to the three pivotal figures in the classical tradition Readable and stimulating the Second Edition of Marx Durkheim Weber *Formations of Modern Social Thought* explains the key ideas of these thinkers and situates them in their historical and philosophical contexts *Reenchanted Science* Anne Harrington, 2020-09-01 By the 1920s in Central Europe it had become a truism among intellectuals that natural science had disenchanting the world and in particular had reduced humans to mere mechanisms devoid of higher purpose But could a new science of wholeness heal what the old science of the machine had wrought Some contemporary scientists thought it could These years saw the spread of a new holistic science designed to nourish the heart as well as the head to reenchanted even as it explained Critics since have linked this holism to a German irrationalism that is supposed to have paved the way to Nazism In a penetrating analysis of this science Anne Harrington

shows that in fact the story of holism in Germany is a politically heterogeneous story with multiple endings Its alliances with Nazism were not inevitable but resulted from reorganizational processes that ultimately brought commitments to wholeness and race healing and death into a common framework Before 1933 holistic science was a uniquely authoritative voice in cultural debates on the costs of modernization It attracted not only scientists with Nazi sympathies but also moderates and leftists some of whom left enduring humanistic legacies Neither a reduction of science to its politics nor a vision in which the sociocultural environment is a backdrop to the internal work of science this story instead emphasizes how metaphor and imagery allow science to engage real phenomena of the laboratory in ways that are richly generative of human meanings and porous to the social and political imperatives of the hour

Human Values and the Mind of Man Ervin Laszlo, James B. Wilbur *NFA*, 2021-09-30 First Published in 1971 *Human Values and the Mind of Man* examines how value questions have been treated in traditional theories of human nature It discusses the following topics theory of mind as seen through the rules of the generation of languages the implications for human value of automata theory the nervous system higher mental processes and human values value consequences of various positions on the mind body problem the implications of self actualization theory for human value and specific value problems in the philosophy of mind The book presents an interdisciplinary dialogue centred around thoughts about man and their implications for human action decision and nature of what we call the human mind This book is an essential read for philosophers psychologists scientists and humanists

The Routledge Companion to Historical Theory Chiel van den Akker, 2021-11-15 This Companion provides a wide ranging and up to date overview of the conceptual issues that history as a discipline and mode of thought gives rise to The book offers both historical and systematic treatments of these issues as well as addressing their contemporary relevance Structured in three parts Modes and Schools of Historical Thought Epistemology and Metaphysics of History and Issues and Challenges in Historical Theory it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order An international team of experts both discuss the basis of their topic and present their own view offering the reader a cutting edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought the metaphysics of historical existence the politics of history writing and the intelligibility of the historical process The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence

Human Values and Natural Science, 1970 *Axiology: Science of Value* Archie J. Bahm, 2021-11-01 This book expounds the basic principles of Axiology as a major field of philosophical inquiry Those principles can be discovered and demonstrated by scientific method In treating scientific inquiry the book throws light on what values are and how they are known It explores questions of Good and Bad Ends and Means and Appearance and Reality as applied to values Axiology argues the author provides the basis for ethics as the science of oughtness the power that a greater good has over a lesser good in

compelling our choices The book concludes with a survey of efforts to establish Axiology as a science *Interpretive Social Science* Mark Bevir, Jason Blakely, 2018 This volume introduces and argues for the fundamental importance of an interpretive approach to explaining social and political reality *Kant, Science, and Human Nature* Robert Hanna, 2006-10-19 Robert Hanna argues for the importance of Kant's theories of the epistemological metaphysical and practical foundations of the exact sciences relegated to the dustbin of the history of philosophy for most of the 20th century Hanna's earlier book *Kant and the Foundations of Analytic Philosophy* OUP 2001 explores basic conceptual and historical connections between Immanuel Kant's 18th century Critical Philosophy and the tradition of mainstream analytic philosophy from Frege to Quine The central topics of the analytic tradition in its early and middle periods were meaning and necessity But the central theme of mainstream analytic philosophy after 1950 is scientific naturalism which holds to use Wilfrid Sellars's apt phrase that science is the measure of all things This type of naturalism is explicitly reductive *Kant Science and Human Nature* has two aims one negative and one positive Its negative aim is to develop a Kantian critique of scientific naturalism But its positive and more fundamental aim is to work out the elements of a humane realistic and nonreductive Kantian account of the foundations of the exact sciences According to this account the essential properties of the natural world are directly knowable through human sense perception empirical realism and practical reason is both explanatorily and ontologically prior to theoretical reason the primacy of the practical **Understanding Human Values** Milton Rokeach, 2008-06-30 This volume presents theoretical methodological and empirical advances in understanding and also in the effects of understanding individual and societal values
