Globalizing International Theory A. Layug,John M. Hobson,2022-09-30 Globalizing International Theory adds to the literature on non Western international relations IR theory by probing the question of what it means to globalize international theory The book starts with the premise that international theory is unfinished incomplete and homogenous because it provides a limited conception of the international which in turn derives from its partiality that reflects its narrow Western centric bias The contributors argue that the IR vision of the world is projected through a polarizing Western filtered lens Rather than utilizing an objective set of explanatory tools for explaining world politics the reality is that orthodox IR theory only tells us why the West is best and why the Rest should become like the West This means that international theory is not truly international In provincializing Western international theory this volume navigates beyond the Eurocentric and imperial frontier of the prevailing limited conception of the international to explore the hidden contributions to international theory which can be found in the non Western world Bringing in excluded non Western conceptions of international theory highlights a broader conception of the international The book provides a framework for theorizing globally exploring the fundamental problems with Western IR theory and how to overcome them This book will be used by advanced undergraduate and postgraduate students scholars researchers and IR theorists worldwide who are interested in non Western IR theory It will help navigate the problem of internationalness in the face of the grand theoretical problem of our time the use and misuse of international theory in making sense of and responding to the complex global realities of the twenty first century

Ashbrook,1988 For those who know little about Professor Paul Tillich this book will introduce them to both his ideas and the kind of person he was For those who are already familiar with him and his work this book will remind them of what he was like and the way he thought In either case this book is a liberal education in itself as it weaves together the warmth of his person with the range of his insights **An Atheism that Is Not**

Humanist Emerges in French Thought Stefanos Geroulanos,2010-03-08 French philosophy changed dramatically in the

second quarter of the twentieth century In the wake of World War I and later the Nazi and Soviet disasters major philosophers such as Kojve Levinas Heidegger Koyr Sartre Merleau Ponty and Hyppolite argued that man could no longer fill the void left by the death of God without also calling up the worst in human history and denigrating the dignity of the human subject In response they contributed to a new belief that man should no longer be viewed as the basis for existence thought and ethics rather human nature became dependent on other concepts and structures including Being language thought and culture This argument which was to be paramount for existentialism and structuralism came to dominate postwar thought This intellectual history of these developments argues that at their heart lay a new atheism that rejected humanism as insufficient and ultimately violent

Nothing Sacred Stathis Gourgouris, 2024-05-07 Nothing Sacred makes a bold call for reconceptualizing the projects of humanism and democracy as creative sources of emancipatory meaning from the immediate political sphere to the farthest reaches of planetary ways of living Restaging Aristotle's classic notion of the political animal in broad historical and geographical frames Stathis Gourgouris explores the autopoietic capacities of human being in society while developing new frameworks of anticolonial humanism and radical democracy as the only worthy adversaries of neoliberal capitalism This reconfigured anthropological horizon enables us to imagine new ways of living by learning to pursue a radical politics of autonomy and a planetary vision that upholds life affirming coexistence and equal sharing against the fetishism of hierarchy and servitude money and technologic sovereignty and endless growth Written with daring erudition and anarchic contestation this book seeks the political through a poetic perspective Nothing Sacred rejects niche thinking in the academy and engages a vast domain of reflections on the problem of human being in today's dismal world

We Ingolf U. Dalferth, 2024-08-27 We exist we exist as humans and as humans we can exist in a human or inhuman way We are not responsible for the fact that we exist or that we are human but we are responsible for how we live as humans Therefore we need to become clear about what it means to be human and to live in a human way today

As in a Mirror. John Calvin and Karl Barth on Knowing God C. van der Kooi, 2005-01-01 What does it really mean to know God What are the grounds for knowing God what feeds that knowledge and what is really known In his search for answers to these questions in two panels the author paints for us a clear picture of what Calvin and Barth had to say about knowing God Calvin against the background of pre modern culture Barth in response to a post Kantian culture inclined to agnosticism Between them like a hinge between the two panels we find the philosophy of Kant The two epochal theological figures are placed next to each other but without this being at the expense of the power of either The study does not stop with detached historical analysis but nourishes the author's own reflection toward a systematic design

European Existentialism Nino Langiulli, 2018-01-18 European Existentialism is a rich collection of major texts and is made all the more significant by the range and depth of its contributions This book aims to give greater intelligibility to existentialism by providing samples from antecedents of and influences upon it Although existentialism is regarded as an example of twentieth century philosophizing

the book presents nineteenth century thinkers such as Kierkegaard and Nietzsche as its forerunners. Thinkers such as Dilthey, Husserl and Scheler frequently associated with other trends in philosophy such as historicism and phenomenology are included because of their influence upon existentialism. Informative biographies of each author represented are also included. European Existentialism includes a broad range of philosophers working in the existentialist mode not only French and German but also Spanish, Italian, Jewish and Russian philosophers. This volume is also distinctive in that it omits existentialists from the literary world. While Dostoevsky is often included in other existentialist collections, Langiulli represents Russian philosophy with a selection by Berdyaev. In his new introduction, Langiulli discusses how the themes of existentialism have led to contemporary aberrations. He uses the language of political rights as an example whereas we once referred to freedom of speech we have transformed that phrase into a much wider category: freedom of expression. Langiulli also examines various trends that have derived from existentialism: postmodernism, deconstructionism and multiculturalism. Langiulli's introduction and the contributions place existentialism as a genuine tradition in the history of philosophy. European Existentialism is an invaluable collection for philosophers, educators and all those interested in the existentialist tradition.

Social and Legal Theory in the Age of Decoloniality Warikandwa, Tapiwa Victor, 2018-06-08. Right from the enslavement era through to the colonial and contemporary eras, Africans have been denied their human essence, portrayed as indistinct from animals or beasts for imperial burdens. Africans have been historically dispossessed and exploited. Postulating the theory of global jurisprudential apartheid, the book accounts for biases in various legal systems, norms, values and conventions that bind Africans while affording impunity to Western states. Drawing on contemporary notions of animism, transhumanism, posthumanism and science and technology studies, the book critically interrogates the possibility of a jurisprudence of anticipation which is attentive to the emergent New World Order that engineers human beings to become nonhumans while nonhumans become humans. Connecting discourses on decoloniality with jurisprudence in the areas of family law, environment, indigenisation, property, migration, constitutionalism, employment and labour law, commercial law and Ubuntu, the book also juggles with emergent issues around Earth Jurisprudence, ecocentrism, wild law, rights of nature, Earth Court and Earth Tribunal. Arguing for decoloniality that attends to global jurisprudential apartheid, this tome is handy for legal scholars and practitioners, social scientists, civil society organisations, policy makers and researchers interested in transformation, decoloniality and Pan Africanism.

The Classics in South America Germán Campos Muñoz, 2021-04-08. This volume examines

the long and complex history of the Greco Roman tradition in South America arguing that the Classics have played a crucial though often overlooked role in the self definition in the New World Chronicling and theorizing this history through a detailed analysis of five key moments chosen from the early and late colonial period the emancipatory era and the 20th and 21st centuries it also examines an eclectic selection of both literary and cinematographic works and artefacts such as maps letters scientific treatises songs monuments political speeches and even the drafts of proposals for curricular changes across Latin America The heterogeneous cases analysed in this book reveal cultural anxieties that recur through different periods fundamentally related to the newness of the continent and the formation of identities imagined as both Western and non Western a genealogy of apprehensions that South American intellectuals and political figures have typically experienced when thinking of their own role in world history In tracing this genealogy *The Classics in South America* innovatively reformulates our understanding of well known episodes in the cultural history of the region while providing a theoretical and historical resource for further studies of the importance of the Classical tradition across Latin America *The Embers and the Stars* Erazim Kohák, 2015-07-10 It is hard to put this profound book into a category Despite the author's criticisms of Thoreau it is more like *Walden* than any other book I have read The book makes great strides toward bringing the best insights from medieval philosophy and from contemporary environmental ethics together Anyone interested in both of these areas must read this book Daniel A Dombrowski *The Thomist* Those who share Kohák's concern to understand nature as other than a mere resource or matter in motion will find his temporally oriented interpretation of nature instructive It is here in particular that Kohák turns moments of experience to account philosophically turning what we habitually overlook or avoid into an opportunity and basis for self knowledge This is an impassioned attempt to see the vital order of nature and the moral order of our humanity as one Ethics ***The Human Becoming School of Thought*** Rosemarie Rizzo Parse, 1998-03-10 In this new book the renowned nursing scholar Dr Rosemarie Rizzo Parse revisits the concepts first presented in her seminal work *Man Living Health A Theory of Nursing* and prepares the groundwork for further exploration as we enter the 21st Century Developing from philosophical foundations laid down *The Chinese Classic of Family Reverence* Henry Rosemont, Roger T. Ames, 2008-11-30 Few if any philosophical schools have championed family values as persistently as the early Confucians and a great deal can be learned by attending to what they had to say on the subject In the Confucian tradition human morality and the personal realization it inspires are grounded in the cultivation of family feeling One may even go so far as to say that for China family reverence was a necessary condition for developing any of the other human qualities of excellence On the basis of the present translation of the *Xiaojing* Classic of Family Reverence and supplemental passages found in other early philosophical writings Professors Rosemont and Ames articulate a specifically Confucian conception of role ethics that in its emphasis on a relational conception of the person is markedly different from most early and contemporary dominant Western moral theories This Confucian role ethics takes as its inspiration the perceived

necessity of family feeling as the entry point in the development of moral competence and as a guide to the religious life as well. In the lengthy introduction two senior scholars offer their perspective on the historical philosophical and religious dimensions of the Xiaojing. Together with this introduction a lexicon of key terms presents a context for the Xiaojing and provides guidelines for interpreting the text historically in China as well as suggesting its contemporary significance for all societies. The inclusion of the Chinese text adds yet another dimension to this important study. The Chinese Classic of Family Reverence is sure to appeal to specialists of comparative and Chinese philosophy and to all readers interested in the enduring importance of the family.
