Hume On Miracles Thoemmes Preb Key Ibues:

Hume on Miracles Stanley Tweyman, 1996 This is the first volume of a two volume set containing the most important secondary literature on Hume on Religion Focusing on responses to the Essay on Miracles the material included in this volume ranges from 1751 to 1883 **David Hume's Argument Against Miracles** Francis Beckwith, 1989-09-30 In this book the author offers a critical analysis of David Hume's argument against miracles from his Enquiry Concerning Human Understanding Of Miracles is one of the most influential works written in defense of the position that belief in supernatural occurrences is not reasonable Using Hume's work as a point of departure the author addresses the two most important epistemological questions asked about miracles Is it ever reasonable to ascribe a divine source to an anomalous event in order to identify it as miraculous and What theoretically entails sufficient evidence that a miracle has actually taken place Contemporary rehabilitations of Hume's argument as put forth by Antony Flew Alastair McKinnon and Patrick Nowell Smith are evaluated Contents Defining the Miraculous Hume's Argument Part 1 Hume's Argument Part 2 The Rationality of Belief and the Existence of God Contemporary Rehabilitations of Hume's Argument and Miracles and Evidence **Hume's Abject Failure** John Earman, 2000-11-23 This vital study offers a new interpretation of Hume's famous Of Miracles which notoriously argues against the possibility of miracles By situating Hume's popular argument in the context of the eighteenth century debate on miracles Earman shows Hume's argument to be largely unoriginal and chiefly without merit where it is original Yet Earman constructively conceives how progress can be made on the issues that Hume's essay so provocatively posed about the ability of eyewitness testimony to establish the credibility of marvelous and miraculous events *David Hume on Miracles, Evidence, and Probability* William L. Vanderburgh, 2019-04-04 David Hume's argument against believing in miracles has attracted nearly continuous attention from philosophers and theologians since it was first published in 1748 Hume's many commentators however both pro and con have often misunderstood key aspects of Hume's account of evidential probability and as a result have misrepresented Hume's argument and conclusions regarding miracles in fundamental ways This book argues that Hume's account of probability descends from a long and laudable tradition that goes back to ancient Roman and medieval law That account is entirely and deliberately non mathematical As a result any analysis of Hume's argument in terms of the mathematical theory of probability is doomed to failure Recovering the knowledge of this ancient tradition of probable reasoning leads us to a correct interpretation of Hume's argument against miracles enables a more accurate understanding of many other episodes in the history of science and of philosophy and may be also useful in contemporary attempts to weigh evidence in epistemically complex situations where confirmation theory and mathematical probability theory have proven to be less helpful than we would have hoped **A Dissertation on Miracles** George Campbell, 1823 **A Dissertation on Miracles: containing an examination of the principles advanced by David Hume, Esq; in an Essay on miracles** George CAMPBELL (Professor of Divinity in Marischal College.), 1812 *The*

Everlasting Check Alexander George, 2016-01-05 Alexander George's lucid interpretation of Hume's *Of Miracles* provides fresh insights into this provocative text explaining the concepts and claims involved. He also shows why Hume's argument fails to engage with committed religious thought and why philosophical argumentation so often proves ineffective in shaking people's deeply held beliefs.

The Great Debate on Miracles Robert M. Burns, 1981 This book consists of a survey of the great debate on miracles which though it was a major feature of the English literary scene in the period in question has never before been researched in depth. The arguments of Boyle, Locke, Clarke and Butler along with those of others are considered and Hume's famous essay *Of Miracles* is examined more closely than ever before.

A Dissertation on Miracles George Campbell, 1766 [A Dissertation on Miracles](#) George Campbell, 1834 [An Examination of Hume's Argument on the Subject of Miracles](#), 1976 [A Dissertation on Miracles](#) George Campbell, 1797 [Reported Miracles](#) Joseph Houston, 1994-04-21 Suppose that one is presented with a report of a miracle as an exception to nature's usual course. Should one believe the report and so come to favour the idea that a god has acted miraculously? Hume argued that no reasonable person should do anything of the kind. Many religiously sceptical philosophers agree with him and have both defended and developed his reasoning. Some theologians concur or offer other reasons why those who are believers in God should also refuse to accept accounts of miracles as accurate reportage. This book argues to the contrary. For Houston, miracle stories may contribute towards the reasonableness of belief in God and appropriately attested may be accepted by believers in God. To bolster his case he examines historically and intellectually significant writings about the miraculous. And having argued for the rejection of Hume he explores the implications of this rejection for science, history and theology.

A Dissertation on Miracles George Campbell, 1797 **David Hume and the Eighteenth Century Debate on Miracles** Stuart Cole, 2004 *An Essay on Mr. Hume's Essay on Miracles* William ADAMS (D.D., Master of Pembroke College, Oxford.), 1754 **Hume and the Problem of Miracles: A Solution** Michael Levine, Michael P. Levine, 1989 This book

developed from sections of my doctoral dissertation *The Possibility of Religious Knowledge Causation Coherentism and Foundationalism* Brown University 1982 However it actually had its beginnings much earlier when as an undergraduate at the University of Virginia I first read Hume's *Of Miracles* and became interested in it Fascinated would be too strong My teacher put the following marginal comment in a paper I wrote about it Suppose someone told you that they had been impregnated by an angel whispering into their ear Wouldn't you think they had gone dotty She had spent time in England I thought about it I agreed that I would not have believed such testimony but did not think this had much to do with Hume's argument against belief in miracles What surprised me even more was the secondary literature I became convinced that Hume's argument was misunderstood My main thesis is established in Part I This explains Hume's argument against justified belief in miracles and shows how it follows from and is intrinsically connected with his more general metaphysics Part II Part I It should give the reader a more complete understanding builds on of both the structure of Hume's argument and of his crucial and questionable premises Chapters 5 and 11 are perhaps the most technical in the book but they are also the least necessary They can be skipped by the reader who is only interested in Hume on miracles

Hume's argument against miracles Liz Meyers, 2025-02-17 Essay from the year 2023 in the subject Philosophy Miscellaneous grade 1 4 University of Luxembourg Philosophy course From Descartes to Hume language English abstract In our life we are confronted with numerous alleged miracles like miracle babies miracle drugs or even inventions and products that are supposed to work miracles While this use of the term miracle is very broad often arbitrary and due to our linguistic usage miracles embedded in religious context find a very different connotation and impact Theistic religions are mainly based on miracles rely on them or use them to explain convince and encourage belief in their God Miracles thereby should they really exist evoke different reactions While some see in miracles how their God manifests himself others see if at all only unusual natural events In philosophy the religious use of miracles forms a problem that raises two different questions What is a miracle And Can we ever have good reason to believe that a miracle has actually taken place These two questions were addressed by numerous philosophers and theologians among them the famous Scottish philosopher economist and historian David Hume In his 1748 work *An Inquiry Concerning Human Understanding* he presents both a definition of miracles and a critique of the credibility of reported miracles which is until today often referenced in the scientific discussion about miracles The aim of this paper is to answer the following questions What is Hume's argument concerning Miracles What criticisms can be raised against his approach And Is Hume's position convincing To answer these the work will be divided into four different sections The first segment consists of the introduction and is intended to provide a brief introduction and present the structure of this essay In the second part I portray Hume's definition of miracles followed by his argumentation regarding the credibility of miracles testimonies The third part contains various points of criticism which have been expressed over the years Finally the results are evaluated and it is answered to the third question mentioned above
