The Routledge International Handbook of Online Deviance Roderick S. Graham, Stephan G. Humer, Claire Seungeun Lee, Veronika Nagy, 2024-09-16 Covering a wide range of different online platforms including social media sites and chatrooms this volume is a comprehensive exploration of the current state of sociological and criminological scholarship focused on online deviance Understanding deviance broadly the handbook acknowledges both an objective normative approach and a subjective reactivist approach to the topic putting into sharp relief the distinctions between cybercrime and online deviance on the one hand and wider concerns of online communities related to online deviance on the other Divided into five sections the first section is devoted primarily to scholarship about the theories and methods foundational to exploring online deviance The second section Gender Sex and Sexuality presents empirical research on expressions of gender sex and sexuality in online spaces considered deviant The third section Violence and Aggression highlights scholarship on types of violent communications such as hate speech and cyberstalking The fourth section Communities and Culture describes empirical research on online communities and networks that can be described as deviant by wider society Lastly the fifth section Regional Perspectives highlights research in which a terrestrial location is impactful to the online phenomena studied Providing a window into future scholarship over the next several years and acknowledging the ephemeral nature of research on digital technology The Routledge International Handbook on Online Deviance is essential reading for students and scholars of Criminology and Sociology focused on deviant online behaviour It will also appeal to those working in related areas within Internet Digital Studies Media Communication Studies Psychology and Cybersecurity

New Methods and Theory on Immigrant Integration Daniel Rauhut, 2023-11-03 Looking beyond urban immigration this ground breaking book explores how immigrants can become a part of local communities in remote regions Contributors argue that immigrant integration is place dependent and develop new theories methodologies and policies that address the specific dynamics of immigration to peripheral areas

Meinong's Theory of Knowledge Marie-Luise Schubert Kalsi, 2012-12-06 In recent years there has been a renewal of interest in Meinong's work but since the bulk of it is still encased in his quite forbidding German most students are limited to the few available translations and to secondary sources Unfortunately Meinong has been much maligned only in a few instances with good reason and has consequently been dealt with lightly Meinong stood at a very important junction of European philosophical and scientific thought In all fields physics chemistry mathematics psychology philosophy revolutionary strides were being made Philosophy on the other hand had run its post Kantian course New philosophical thinkers came from different disciplines For example Frege and later Russell were mathematicians Boltzmann and Mach were physicists Earlier Bolzano and then Brentano were originally theologians and Meinong was a historian 1 The sciences with their new insights and theories offered an enormous wealth of information which needed to be absorbed philosophically but traditional philosophy could not deal with it Physics presented a picture of reality which did not

fit into the traditional schemes of empiricism or idealism Ontological and epistemological questions became once again wide open issues For example atoms at first were still considered to be theoretical entities

New Materials for Thermoelectric Applications: Theory and Experiment Veljko Zlatić, Alex Hewson, 2012-10-17 Thermoelectric devices could play an important role in making efficient use of our energy resources but their efficiency would need to be increased for their wide scale application There is a multidisciplinary search for materials with an enhanced thermoelectric responses for use in such devices This volume covers the latest ideas and developments in this research field covering topics ranging from the fabrication and characterization of new materials particularly those with strong electron correlation use of nanostructured layered materials and composites through to theoretical work to gain a deeper understanding of thermoelectric behavior It should be a useful guide and stimulus to all working in this very topical field

A Humean Critique of David Hume's Theory of Knowledge Jeremy J. White, 1998 A Humean Critique of David Hume's Theory of Knowledge provides the first full length Aristotelian Thomistic critique of Hume's most mature and familiar work While giving Hume proper respect and appreciation for his achievement Jeremy White engages in a thoughtful critique through an approach based in Hume's own method He successfully uncovers Hume's unconscious indebtedness to his seventeenth century predecessors including Locke and Bacon whom he persistently discredited White's discovery of Hume's assumptions and premises for building his philosophy provide much enlightenment regarding his ideas The author's intimacy with the processes of Hume's mind and from where he drew his conclusions translates into a tremendous ease and comfort in gaining an understanding of Hume's epistemology and his underlying metaphysical assumptions

Dimensions of Personalized and Precision Medicine Ernst R. Berndt, Dana P. Goldman, John Rowe, 2019-04-22 Personalized and precision medicine PPM the targeting of therapies according to an individual's genetic, environmental, or lifestyle characteristics is becoming an increasingly important approach in health care treatment and prevention. The advancement of PPM is a challenge in traditional clinical reimbursement and regulatory landscapes because it is costly to develop and introduces a wide range of scientific, clinical, ethical, and socioeconomic issues. PPM raises a multitude of economic issues including how information on accurate diagnosis and treatment success will be disseminated and who will bear the cost; changes to physician training to incorporate genetics, probability, and statistics; and economic considerations, questions about whether the benefits of PPM will be confined to developed countries or will diffuse to emerging economies with less developed health care systems; the effects of patient heterogeneity on cost-effectiveness analysis; and opportunities for PPM's growth beyond treatment of acute illness such as prevention and reversal of chronic conditions. This volume explores the intersection of the scientific, clinical, and economic factors affecting the development of PPM, including its effects on the drug pipeline, on reimbursement of PPM diagnostics and treatments, and on funding of the requisite underlying research, and it examines recent empirical applications of PPM.

Hume's Skepticism in the Treatise of Human Nature Robert J. Fogelin, 2019-04-25 This work first published in 1985 offers a general interpretation of Hume's *Treatise of Human Nature*. Most Hume scholarship has either neglected or downplayed an important aspect of Hume's position: his scepticism. This book puts that right, examining in close detail the sceptical arguments in Hume's philosophy. *Journal of the American Medical Association* American Medical Association, 1896

The Role of Public Sector in Local Economic and Territorial Development Maroš Finka, Matej Jaško, Milan Husár, 2018-08-31 The book covers the topic of the role of public sector in the economic and territorial development across several dimensions of spatial planning: e.g. theoretical, methodological, planning, leadership, executive, regional policies, services of general interest, sectoral, energy, tourism, air quality, or social. The book delivers up-to-date knowledge built on interactions between representatives of different stakeholders of economic and territorial development with the research represented by renowned experts and academicians. This is mirrored in the content of the book, delivering in a consistent form the conceptual explanations combined with the examples of the role of the public sector in fostering the local economies within the frame of spatial planning. The book reflects and transfers the expert knowledge which has been generated during more than a decade of scientific and research activities of Space-net. Presents a comprehensive view on different aspects of the involvement of public sector in the local and regional spatial development. Includes a combination of macro-regionally specific perspectives with the generalized knowledge. Provides knowledge from various researchers from prestigious European scientific and research teams.

EU Cohesion Policy and Spatial Governance Rauhut, Daniel, Sielker, Franziska, Humer, Alois, 2021-07-31 Discussing the ongoing and future challenges of EU Cohesion Policy, this book critically addresses the economic, social, and

territorial challenges at the heart of the EU's policy. It identifies the multifaceted and dynamic nature of the policy as well as the cohesion's goal interlinkage with other policies and considers unresolved questions of strategic importance in territorial governance, urban and regional inequalities and social aspects and wellbeing.

The Purpose of Life in Economics Lall Ramrattan, Michael Szenberg, 2022-10-19 This book is a compilation of economic views on the purpose of life. It follows a unique approach starting with propositions from diverse fields that act as governing laws of the purpose of life in economics then guiding the reader through the physical, philosophical and psychological views of the purpose of life as economics and economic theories can find their roots in all these areas. The book concludes with the purpose of life presented through economic doctrines from the pre-classical to classical to neo-classical schools of economic thought through the lens of economic development and from the perspective of several religious doctrines.

The French Tutor; Or the Theory and Practice of the French Language, Etc V. J. PEYTON, 1773
Introduction to the Theory of Laser-Atom Interactions Marvin H. Mittleman, 2013-03-09 This book grew out of a graduate course given in the Physics Department of the City College of New York for the first time during the 1976-1977 academic year and a series of lectures given at the Catholic University of Louvain at Louvain-la-Neuve, Belgium during the Spring and Summer of 1977. I am indebted to Professor F. Brouillard and the DYMO group at that institution for the stimulation and hospitality provided during that period. In both cases the lectures were at a level that assumed only a knowledge of elementary quantum mechanics of a typical first-year graduate course. I have tried to continue that level of discussion in this book and to make it self-contained for any discussions that go beyond that level. In some sections of the book the problems dealt with are too complicated to provide the entire description here. In that case references to the original work are given.

Youth Studies and Generations Vitor Sérgio Ferreira, 2020-03-25 There is currently much discourse about generations in the public sphere. A sequence of letters conflates generations and age cohorts born in the last few decades: generation X, Y or Z, as well as multiple categories are used to describe today's young people as a generation that is distinct from its predecessors. Despite the popularity of generational labels in media, politics or even academia, the use of generation as a conceptual tool in youth studies has been controversial. This Special Issue allows readers to better understand the key issues regarding the use of generation as a theoretical concept and/or as a social category in the field of youth studies, shedding light on the controversies, trends and cautions that go through it.
