*Growing Architecture* Ferdinand Ludwig, Daniel Schönle, 2022-12-19 A growing living house a building made of a plant seems to be a contradiction in terms Nevertheless the Khasi in eastern India already knew how to connect the branches of rubber trees to form footbridges and in southern Germany lime trees formed the centre of villages for centuries Following on from this the new discipline of Baubotanik is dedicated to designing with trees Built projects prototypes and visionary concepts point the way to a new green architecture This introduction shows the possibilities of such living constructions and goes into the botanical growth laws that guide the design The basics of constructing with trees are presented The book encourages a whole new look at architecture that becomes part of urban nature *Art, Spirituality and Economics* Luk Bouckaert, Knut J. Ims, Peter Rona, 2018-03-05 This volume celebrates the work of Laszlo Zsolnai a leading researcher and scholar in the field of the ethical and spiritual aspects of economic life who has made significant contributions to the connection between ethics spirituality aesthetics and economic theory The book offers a selection of essays concerned with the ethical spiritual and aesthetic context within which economics as a social studies discipline should be situated in order to avoid the sort of dehumanising consequences that theories based on utility maximisation and rational choice necessarily entail It presents the economic activities of human beings not as some sort of preordained obedience to universal laws that operate independently of other human concerns but rather as a part of the human desire for the Aristotelian good life It looks at the various considerations moral spiritual and aesthetic that take part in the formation of economic decisions in sharp contrast with theories that purport to explain economic phenomena solely on the basis of utility maximisation
