**Eastern Europe** Richard Frucht, 2004-12-22 A contemporary analysis of the people cultures and society within the regions that make up Eastern Europe Eastern Europe An Introduction to the People Lands and Culture sheds light on modern day life in the 16 nations comprising Eastern Europe Going beyond the history and politics already well documented in other works this unique three volume series explores the social and cultural aspects of a region often ignored in books and curricula on Western civilization The volumes are organized by geographic proximity and commonality in historical development allowing the countries to be both studied individually and juxtaposed against others in the region The first volume covers the northern tier of states the second looks at lands that were once part of the Hapsburg empire and the third examines the Balkan states Each chapter profiles a single country its geography history political development economy and culture and gives readers a glimpse of the challenges that lie ahead Vignettes on various topics of interest illuminate the unique character of each country Bulgaria, Hungary, Romania, the Czech Republic, and Slovakia Britannica Educational Publishing, 2013-06-01 Bulgaria Hungary Romania the Czech Republic and Slovakia share a remarkably similar trajectory on their individual paths to becoming the nations they are today Each had ties to the Roman Byzantine and Ottoman empires in earlier times all became Eastern bloc countries in the 20th century and all successfully emerged from Communist rule in the late 20th and early 21st centuries These multi layered lands where folk traditions still exist alongside the hallmarks of modern life and the remnants of communist rule are the subjects of this sweeping tome

Lanouette, 2013-09-01 Well known names such as Albert Einstein Enrico Fermi J Robert Oppenheimer and Edward Teller are usually those that surround the creation of the atom bomb One name that is rarely mentioned is Leo Szilard known in scientific circles as father of the atom bomb The man who first developed the idea of harnessing energy from nuclear chain reactions he is curiously buried with barely a trace in the history of this well known and controversial topic Born in Hungary and educated in Berlin he escaped Hitler s Germany in 1933 and that first year developed his concept of nuclear chain reactions In order to prevent Nazi scientists from stealing his ideas he kept his theories secret until he and Albert Einstein pressed the US government to research atomic reactions and designed the first nuclear reactor Though he started his career out lobbying for civilian control of atomic energy he concluded it with founding in 1962 the first political action committee for arms control the Council for a Livable World Besides his career in atomic energy he also studied biology and sparked ideas that won others the Nobel Prize The Salk Institute for Biological Studies in La Jolla California where Szilard spent his final days was developed from his concepts to blend science and social issues Hungarian Heritage Review , 1990 **Double**

**Exile** Tibor Frank, 2009 This is a social history of refugees escaping Hungary after the Bolshevik type revolution of 1919 the ensuing counterrevolution and the rise of anti-Semitism Largely Jewish and German before World War I the Hungarian middle class was torn by the disastrous war the partitioning of Hungary in the Treaty of Trianon and the numerus clausus act XXV in 1920 that seriously curtailed the number of Jews admitted to higher education Hungary's outstanding future professionals whether Jewish Liberal or Socialist felt compelled to leave the country and head to German speaking universities in Austria Czechoslovakia and Germany When Hitler came to power these exiles were to flee again many on the fringes of the huge German emigration Emotionally prepared by their earlier threatening experiences in Hungary they were quick to recognize the need to uproot themselves again Many fled to the United States where their double exile catalyzed the USA into an active enemy of Nazi Germany and stimulated the transplantation of European modernism into American art and music To their surprise the refugees also encountered anti-Semitism in the USA The book is based on extensive archival work in the USA and Germany Hungarian Americans and Their Communities of Cleveland Susan M. Papp, 1981 *Hungarian Studies Newsletter*, 1982 The Botanic Garden by Erasmus Darwin Adam Komisaruk, 2017-07-06 The career of Erasmus Darwin 1731 1802 affords an extraordinary glimpse into the intellectual ferment of late eighteenth and early nineteenth century Britain As a popular poet practicing physician inventor of speaking machines and mechanical birds essayer of natural history from geology to meteorology and proponent of an evolutionary theory that inspired his famous grandson Charles he left a lasting impression on almost every branch of knowledge His magnum opus and the synthesis of his myriad interests is *The Botanic Garden* 1792 an epic poem that aims to enlist the Imagination under the banner of Science Part I *The Economy of Vegetation* sings the praises of British industry as a dance of supernatural creatures while part II *The Loves of the Plants* wittily employs metaphors of human courtship to describe the reproductive cycles of hundreds of flowers Darwin supplements his accomplished verses with often much longer philosophical notes that offer his idiosyncratic perspective on the scholarly controversies of the day Despite a recent surge of academic interest in Darwin however no authoritative critical edition of *The Botanic Garden* exists presenting a barrier to further scholarship This two volume set comprises a complete meticulously transcribed reading text including all the poetry prose apparatus and illustrations along with extensive commentary that situates Darwin within contemporary debates about the natural sciences This set will be of interest to readers as the definitive reference edition of *The Botanic Garden* and due to its efforts to make the work more practically and intellectually accessible to seasoned and novice readers alike The first volume presents a wide ranging and authoritative introduction to *The Botanic Garden* detailing the background to the work and the various contexts in which it should be understood These include aesthetic theory and practice the science of the mind love and sexuality politics spirituality the natural sciences and evolutionary theory and the two Darwins The full text of Part I of the *The Botanic Garden* *The Economy of Vegetation* then follows accompanied by the editors annotations discussion of illustrations and textual notes
